

CITY OF SOLANA BEACH
SOLANA BEACH CITY COUNCIL, SUCCESSOR AGENCY TO THE REDEVELOPMENT AGENCY,
PUBLIC FINANCING AUTHORITY, & HOUSING AUTHORITY

AGENDA

Joint REGULAR Meeting
Wednesday, January 10, 2024 * 6:00 p.m.

City Hall / Council Chambers, 635 S. Highway 101, Solana Beach, California

- City Council meetings are video recorded and archived as a permanent record. The [video](#) recording captures the complete proceedings of the meeting and is available for viewing on the City's website.
- Posted Reports & Supplemental Docs contain records up to the cut off time prior to meetings for processing new submittals. Complete records containing meeting handouts, PowerPoints, etc. can be obtained through a [Records Request](#).

PUBLIC MEETING ACCESS

The Regular Meetings of the City Council are scheduled for the 2nd and 4th Wednesdays and are broadcast live. The video taping of meetings are maintained as a permanent record and contain a detailed account of the proceedings. Council meeting tapings are archived and available for viewing on the City's [Public Meetings](#) webpage.

WATCH THE MEETING

- Live web-streaming: Meetings web-stream live on the City's website on the City's [Public Meetings](#) webpage. Find the large Live Meeting button.
- Live Broadcast on Local Govt. Channel: Meetings are broadcast live on Cox Communications - Channel 19 / Spectrum (Time Warner)-Channel 24 / AT&T U-verse Channel 99.
- Archived videos online: The video taping of meetings are maintained as a permanent record and contain a detailed account of the proceedings. Council meeting tapings are archived and available for viewing on the City's [Public Meetings](#) webpage.

AGENDA MATERIALS

A full City Council agenda packet including relative supporting documentation is available at City Hall, the Solana Beach Branch [Library](#) (157 Stevens Ave.), La Colonia Community Ctr., and online www.cityofsolanabeach.org. Agendas are posted at least 72 hours prior to regular meetings and at least 24 hours prior to special meetings. Writings and documents regarding an agenda of an open session meeting, [received](#) after the official posting, and distributed to the Council for consideration, will be made available for public viewing at the same time. In addition, items received at least 1 hour 30 minutes prior to the meeting time will be uploaded online with the agenda posting. Materials submitted for consideration should be forwarded to the [City Clerk's Department](#) 858-720-2400. The designated location for viewing of hard copies is the City Clerk's office at City Hall during normal business hours.

PUBLIC COMMENTS

Written correspondence (supplemental items) regarding an agenda item at an open session meeting should be submitted to the City Clerk's Office at clerkoffice@cosb.org with a) Subject line to include the meeting date b) Include the Agenda Item # as listed on the Agenda.

- Correspondence received after the official posting of the agenda, but two hours prior to the meeting start time, on the meeting day, will be distributed to Council and made available online along with the agenda posting. All submittals received before the start of the meeting will be made part of the record.
- Written submittals will be added to the record and not read out loud.

And/Or

Verbal Comment Participation:

Please submit a speaker slip to the City Clerk prior to the meeting, or the announcement of the Section/Item, to provide public comment. Allotted times for speaking are outlined on the speaker's slip for each agenda section: Oral Communications, Consent, Public Hearings and Staff Reports.

Public speakers have 3 minutes each to speak on each topic. Time may be donated by another individual

who is present at the meeting to allow an individual up to 6 minutes to speak. Group: Time may be donated by two individuals who are present at the meeting allowing an individual up to 10 minutes to speak. Group Hearings: For public hearings only, time may be donated by two individuals who are present at the meeting allowing an individual up to 15 minutes to speak.

SPECIAL ASSISTANCE NEEDED

In compliance with the Americans with Disabilities Act of 1990, persons with a disability may request an agenda in appropriate alternative formats as required by Section 202. Any person with a disability who requires a modification or accommodation in order to participate in a meeting should direct such request to the [City Clerk's office](#) (858) 720-2400 at least 72 hours prior to the meeting.

As a courtesy to all meeting attendees, please set all electronic devices to silent mode and engage in conversations outside the Council Chambers.

City Clerk

SPEAKERS:

Please submit your speaker slip to the City Clerk prior to the meeting or the announcement of the Item. Allotted times for speaking are outlined on the speaker's slip for Oral Communications, Consent, Public Hearings and Staff Reports.

READING OF ORDINANCES AND RESOLUTIONS:

Pursuant to [Solana Beach Municipal Code](#) Section 2.04.460, at the time of introduction or adoption of an ordinance or adoption of a resolution, the same shall not be read in full unless after the reading of the title, further reading is requested by a member of the Council. If any Councilmember so requests, the ordinance or resolution shall be read in full. In the absence of such a request, this section shall constitute a waiver by the council of such reading.

CALL TO ORDER AND ROLL CALL:

CLOSED SESSION REPORT:

FLAG SALUTE:

APPROVAL OF AGENDA:

PROCLAMATIONS/CERTIFICATES: *Ceremonial*
None at the posting of this agenda

PRESENTATIONS: Ceremonial items that do not contain in-depth discussion and no action/direction.

- San Diego County Sheriff's Annual Report

ORAL COMMUNICATIONS:

Comments relating to items on this evening’s agenda are taken at the time the items are heard. This portion of the agenda provides an opportunity for members of the public to address the City Council on items relating to City business and not appearing on today’s agenda by submitting a speaker slip (located on the back table) to the City Clerk. Pursuant to the Brown Act, no action shall be taken by the City Council on public comment items. Council may refer items to the City Manager for placement on a future agenda. The maximum time allotted for each presentation is THREE MINUTES. No donations of time are permitted (SBMC 2.04.190). Please be aware of the timer light on the Council Dais.

COUNCIL COMMUNITY ANNOUNCEMENTS / COMMENTARY:

An opportunity for City Council to make brief announcements or report on their activities. These items are not agendized for official City business with no action or substantive discussion.

A. CONSENT CALENDAR: (Action Items) (A.1. - A.7.)

Items listed on the Consent Calendar are to be acted in a single action of the City Council unless pulled for discussion. Any member of the public may address the City Council on an item of concern by submitting to the City Clerk a speaker slip (located on the back table) before the Consent Calendar is addressed. Those items removed from the Consent Calendar by a member of the Council will be trailed to the end of the agenda, while Consent Calendar items removed by the public will be heard immediately after approval of the Consent Calendar to hear the public speaker.

All speakers should refer to the public comment section at the beginning of the agenda for details. Please be aware of the timer light on the Council Dais.

A.1. Minutes of the City Council.

Recommendation: That the City Council

- 1. Approve the Minutes of the City Council meetings held on December 13, 2023.

[Item A.1. Report \(click here\)](#)

A.2. Register Of Demands. (File 0300-30)

Recommendation: That the City Council

- 1. Ratify the list of demands for November 25, 2023 – December 15, 2023.

[Item A.2. Report \(click here\)](#)

A.3. General Fund Adopted Budget for Fiscal Year 2023/2024 Changes. (File 0330-30)

Recommendation: That the City Council

- 1. Receive the report listing changes made to the Fiscal Year 2023-2024 General Fund Adopted Budget.

[Item A.3. Report \(click here\)](#)

A.4. 2024 City Council Meeting Schedule Planning. (File 0410-05)

Recommendation: That the City Council

1. Review, edit, and/or approve a 2024 anticipated Council Meeting schedule with proposed cancellations and/or additional meetings.

[Item A.4. Report \(click here\)](#)

A.5. Fire Station Garage Doors Replacement, Maintenance, and As-Needed Repair Services. (File 0700-14)

Recommendation: That the City Council

1. Adopt **Resolution 2024-001**:
 - a. Ratifying the City Manager's decision to execute amendment No. 2 to the Professional Services Agreement with National Garage Door, in an amount of \$48,000, for a total not to exceed amount of \$230,900 for Fiscal Year 2023/24.
 - b. Authorizing a transfer of \$48,000 from the CIP Fund unallocated fund balance for Fiscal Year 2023/24.
 - c. Authorizing the City Treasurer to amend the Fiscal Year 2023/24 Adopted Budget accordingly.

[Item A.5. Report \(click here\)](#)

A.6. Fiscal Year 2022-23 Street Maintenance and Repair Project. (File 0820-35)

Recommendation: That the City Council

1. Adopt **Resolution 2024-004**:
 - a. Authorizing the City Council to accept, as complete, the FY 2022-23 Street Maintenance & Repair Project, Bid No. 2023-07, performed by Quality Construction & Engineering.
 - b. Authorizing the City Clerk to file a Notice of Completion.

[Item A.6. Report \(click here\)](#)

A.7. Code Compliance Vehicle Replacement. (File 0370-26)

Recommendation: That the City Council

1. Approve **Resolution 2024-008** authorizing the purchase of two (2) new Ford Maverick Hybrid pick-up trucks, with equipment upfits, for \$96,680.46 for the Code Compliance Division.

[Item A.7. Report \(click here\)](#)

NOTE: The City Council shall not begin a new agenda item after 10:30 p.m. unless approved by a unanimous vote of all members present. (SBMC 2.04.070)

B. PUBLIC HEARINGS: (B.1.)

This portion of the agenda provides citizens an opportunity to express their views on a specific issue as required by law after proper noticing by submitting a speaker slip (located on the back table) to the

City Clerk. After considering all of the evidence, including written materials and oral testimony, the City Council must make a decision supported by findings and the findings must be supported by substantial evidence in the record. An applicant or designee(s) for a private development/business project, for which the public hearing is being held, is allotted a total of fifteen minutes to speak, as per SBMC 2.04.210. A portion of the fifteen minutes may be saved to respond to those who speak in opposition. *All other speakers should refer to the public comment section at the beginning of the agenda for time allotment.* Please be aware of the timer light on the Council Dais.

B.1. Public Hearing: 825 S. Sierra Ave., Applicant: Del Mar Beach Club Homeowners Association, Case: CUP23-001. (File 0600-40)

Recommendation: That the City Council

1. Conduct the Public Hearing: Open the Public Hearing, Report Council Disclosures, Receive Public Testimony, and Close the Public Hearing.
2. Find the Proposed Project exempt from the requirements of CEQA pursuant to 2023 State California CEQA Guidelines §15269 as emergency conditions exist onsite. The project could also be found exempt from the requirements of CEQA pursuant to Section 152301 of the State California CEQA Guidelines.
3. Adopt **Resolution 2024-010** conditionally approving a Conditional Use Permit for maintenance and repair of the southern 170 feet of an existing 540-foot lower bluff seawall and an upper bluff drilled pier wall running east to west along the southern property line at 825 S. Sierra Avenue, Solana Beach.

[Item B.1. Report \(click here\)](#)

C. STAFF REPORTS: (C.1.)

Submit speaker slips to the City Clerk.

All speakers should refer to the public comment section at the beginning of the agenda for time allotments. Please be aware of the timer light on the Council Dais.

C.1. Army Corps Beach Sand Project Presentation.

No recommendation or report.

WORK PLAN COMMENTS:

Adopted June 28, 2023

COMPENSATION & REIMBURSEMENT DISCLOSURE:

GC: Article 2.3. Compensation: 53232.3. (a) Reimbursable expenses shall include, but not be limited to, meals, lodging, and travel. 53232.3 (d) Members of a legislative body shall provide brief reports on meetings attended at the expense of the local agency "City" at the next regular meeting of the legislative body.

A.7. City Manager Recruitment Services. (File 0550-50)

Recommendation: That the City Council

1. Adopt **Resolution 2023-133** approving the Professional Services Agreement for City Manager Recruitment Services between the City of Solana Beach and Alliance Resource Consulting LLC and authorizing the Mayor to execute the agreement.

[Item A.7. Report \(click here\)](#)

Motion: Moved by Councilmember Edson and second by Councilmember Becker to approve. **Approved 5/0.** Ayes: Heebner, Zito, Edson, Becker, MacDonald. Noes: None. Motion carried unanimously.

B. PUBLIC HEARINGS: (B.1. – B.2.)

This portion of the agenda provides citizens an opportunity to express their views on a specific issue as required by law after proper noticing by submitting a speaker slip (located on the back table) to the City Clerk. After considering all of the evidence, including written materials and oral testimony, the City Council must make a decision supported by findings and the findings must be supported by substantial evidence in the record. An applicant or designee(s) for a private development/business project, for which the public hearing is being held, is allotted a total of fifteen minutes to speak, as per SBMC 2.04.210. A portion of the fifteen minutes may be saved to respond to those who speak in

opposition. *All other speakers should refer to the public comment section at the beginning of the agenda for time allotment.* Please be aware of the timer light on the Council Dais.

B.1. Schedule of User Fees and Charges Update. (File 0390-23)

Recommendation: That the City Council

1. Conduct the Public Hearing: Open the Public Hearing, Report Council Disclosures, Receive Public Testimony, and Close the Public Hearing.
2. Adopt **Resolution 2023-124** updating the Schedule of Fees and Charges effective January 1, 2024.

[Item B.1. Report \(click here\)](#)

Greg Wade, City Manager, introduced the item.

Rachel Jacobs, Finance Director, stated that the capped increase for this year would be 2.5% but that the actual CPI would have increased it by 5.2%.

Mayor Heebner opened the public hearing.

Motion: Moved by Deputy Mayor Zito and second by Councilmember Edson to close the public hearing. **Approved 5/0.** Ayes: Heebner, Zito, Edson, Becker, MacDonald. Noes: None. Motion carried unanimously.

Council discussed the transportation impact fee increase of 15.22% and that the short-term vacation permit fee was low and would be coming back early 2024 for Council review during discussions on short-term vacation rentals.

Motion: Moved by Deputy Mayor Zito and second by Councilmember Edson to approve. **Approved 5/0.** Ayes: Heebner, Zito, Edson, Becker, MacDonald. Noes: None. Motion carried unanimously.

B.2. Public Hearing: 654 Glenmont Dr., Applicant: Saik, Case: DRP22-024. (File 0600-40)

The proposed project meets the minimum zoning requirements under the SBMC, may be found to be consistent with the General Plan and may be found, as conditioned, to meet the discretionary findings required as discussed in this report to approve a DRP. Therefore, Staff recommends that the City Council:

1. Conduct the Public Hearing: Open the Public Hearing, Report Council Disclosures, Receive Public Testimony, and Close the Public Hearing.
2. Find the project exempt from the California Environmental Quality Act pursuant to Section 15303 of the State CEQA Guidelines; and
3. If the City Council makes the requisite findings and approves the project, adopt **Resolution 2023-132** conditionally approving a DRP to demolish a single-story single-family residence, construct a replacement 2,861 square-foot, single-story single-family residence built above a 2,060 square-foot basement living area with

an 899 square-foot basement-level two-car garage, and perform associated improvements at 654 Glenmont Dr., Solana Beach.

[Item B.2. Report \(click here\)](#)

[Item B.2. Updated Report #1 \(added 12-12-23 at 5:45pm\)](#)

[Item B.2. Supplemental Docs \(updated 12-13-23 at 4:25pm\)](#)

Greg Wade, City Manager,

Katie Bensen, Associate Planner,

Mayor Heebner opened the public hearing.

Council disclosures.

Amanda Quipp, Applicant's Architect, presented a PowerPoint (on file) of the proposed project and that they settled on a single story rather than a second story structure to preserve views after discussion with the neighbors.

Shane Noroozi (time donated by Katherine Noroozi) said they lived behind the project, that the project would obstruct views by vegetation proposed in the landscape plans, that their primary view was the to west as sated at the October 26, 2022 Council meeting, that the landscape plan included a 10 ft. tall citrus tree in the backyard and a variety of 10 ft. shrubs atop 2 ft. planters which would reach 13 ft. or higher along the east property line and would exceed the maximum roof height, and that they requested that the landscape not be allowed to exceed the 10 ft. height above the backyard lawn grade.

Amanda Quipp stated that the proposed 10 ft. landscape of the tree and shrubs would not exceed the proposed rooftop.

Council and Applicant's Architects discussed that the hybrid of the plant chosen had a maximum of 10 ft. at maturity and that it was common practice to dig a 5 ft. deep trench to build the retaining wall without reinforcement, if the soil permits, without additional shoring.

Motion: Moved by Deputy Mayor Zito and second by Councilmember Becker to approve. **Approved 5/0.** Ayes: Heebner, Zito, Edson, Becker, MacDonald. Noes: None. Motion carried unanimously.

Motion: Moved by Deputy Mayor Zito and second by Councilmember Edson to approve. **Approved 5/0.** Ayes: Heebner, Zito, Edson, Becker, MacDonald. Noes: None. Motion carried unanimously.

C. STAFF REPORTS: (C.2. – C.4.)

Submit speaker slips to the City Clerk.

All speakers should refer to the public comment section at the beginning of the agenda for time allotments. Please be aware of the timer light on the Council Dais.

C.2. Army Corps Beach Sand Project Presentation.

No recommendation or report.

Greg Wade, City Manager, presented a PowerPoint (on file) reviewing the 50-year project.

Susie Ming, USACE, said that the contractor received Coastal approval today and would reach Solana Beach around the second to third week of January.

Council and Ms. Ming discussed the reasons for this project being conducted in the wintertime which included the environmental window to avoid the February – September nesting season of shore birds, the fact that there are less visitors at the beach when there will be beach closures, and the availability of the necessary dredge on the west coast.

C.3. Adopt (2nd Reading) Ordinance 525 – Accessory Dwelling Unit (ADU). (File 0610-10)

Recommendation: That the City Council

1. Adopt **Ordinance 525** (2nd Reading) amending the City's Accessory Dwelling Unit Ordinance Provisions.

[Item C.3. Report \(click here\)](#)

[Item C.3. Supplemental Docs \(updated 12-13-23 at 11:00am\)](#)

Johanna Canlas, City Attorney, read the title.

Council and Staff discussed the state law removing the owner occupancy requirement for ADUs but not for Junior ADUs.

Motion: Moved by Deputy Mayor Zito and second by Councilmember Edson to approve. **Approved 5/0.** Ayes: Heebner, Zito, Edson, Becker, MacDonald. Noes: None. Motion carried unanimously.

C.4. Council Boards, Committees, Commissions Mid-Term Review. (File 0410-05)

Recommendation: That the City Council

1. Review the Regional Boards/Commissions/Committees and make alternate appointments, if necessary.
2. Review Council Standing Committees and make alternate appointments, if Necessary

[Item C.4. Report \(click here\)](#)

No changes to current terms.

WORK PLAN COMMENTS: None

Adopted June 28, 2023

COMPENSATION & REIMBURSEMENT DISCLOSURE: None

GC: Article 2.3. Compensation: 53232.3. (a) Reimbursable expenses shall include, but not be limited to, meals, lodging, and travel. 53232.3 (d) Members of a legislative body shall provide brief reports on meetings attended at the expense of the local agency "City" at the next regular meeting of the legislative body.

REGIONAL COMMITTEES: (outside agencies, appointed by this Council)

STANDING COMMITTEES: (All Primary Members) (*Permanent Committees*)

CITIZEN COMMISSION(S)

ADJOURN:

Mayor Heebner adjourned the meeting at 7:57 p.m.

STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers
FROM: Gregory Wade, City Manager
MEETING DATE: January 10, 2024
ORIGINATING DEPT: Finance
SUBJECT: Register of Demands

BACKGROUND:

Section 3.04.020 of the Solana Beach Municipal Code requires that the City Council ratify a register of demands which represents all financial demands made upon the City for the applicable period.

Register of Demands: 11/25/2023 through 12/15/2023

Check Register - Disbursement Fund (Attachment 1)		\$	2,126,594.39
Net Payroll Retiree Health	December 6, 2023		3,408.00
Net Payroll Council	December 14, 2023		4,591.04
Net Payroll Staff O12	December 8, 2023		<u>385,902.05</u>
TOTAL		\$	<u>2,520,495.48</u>

DISCUSSION:

Staff certifies that the register of demands has been reviewed for accuracy, that funds are available to pay the above demands, and that the demands comply with the adopted budget.

CEQA COMPLIANCE STATEMENT:

Not a project as defined by CEQA.

FISCAL IMPACT:

The register of demands for November 25, 2023 through December 15, 2023 reflects total expenditures of \$2,520,495.48 from various City sources.

WORK PLAN:

N/A

CITY COUNCIL ACTION: _____

OPTIONS:

- Ratify the register of demands.
- Do not ratify and provide direction.

DEPARTMENT RECOMMENDATION:

Staff recommends that the City Council ratify the above register of demands.

CITY MANAGER'S RECOMMENDATION:

Approve Department Recommendation.

Gregory Wade, City Manager

STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers
FROM: Gregory Wade, City Manager
MEETING DATE: January 10, 2024
ORIGINATING DEPT: Finance
SUBJECT: Report on Changes Made to the General Fund Adopted Budget for Fiscal Year 2023-24

BACKGROUND:

Staff provides a report at each Council meeting that lists changes made to the current Fiscal Year (FY) General Fund Adopted Budget. The information provided in this Staff Report lists the changes made through December 13, 2023.

DISCUSSION:

The following table reports the revenue, expenditures, and transfers for 1) the Adopted General Fund Budget approved by Council on June 28, 2023 (Resolution 2023-089) and 2) any resolutions passed by Council that amended the Adopted General Fund Budget.

GENERAL FUND - ADOPTED BUDGET PLUS CHANGES As of 12/13/2023						
General Fund - Operations						
Date	Action	Description	Revenues	Expenditures	Transfers from GF	Net Surplus
06/28/2023	Reso 2023-089	Adopted Budget	24,472,918	(23,078,124)	(980,000)	\$ 414,794
11/29/2023	Reso 2023-128	Engineering Survey Services		(100,000)		\$ 314,794
						314,794
General Fund - Measure S						
Date	Action	Description	Revenues	Expenditures	Transfers from GF	Net Surplus
06/28/2023	Reso 2023-089	Adopted Budget	4,400,000	(1,124,000)	(733,400)	\$ 2,542,600
						2,542,600
Combined General Fund Net Surplus						\$ 2,857,394

Gregory Wade, City Manager

STAFF REPORT

CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers
FROM: Gregory Wade, City Manager
MEETING DATE: January 10, 2024
ORIGINATING DEPT: City Clerk's Department
SUBJECT: **2024 City Council Meeting Schedule Planning**

BACKGROUND:

Pursuant to Solana Beach Municipal Code Section 2.04.070, *the City Council shall hold Regular meetings in the Council Chambers of City Hall, on a day and time set by resolution.* Pursuant to Resolution 2005-019, regularly scheduled meetings are established for the second (2nd) and fourth (4th) Wednesdays of each month. Historically, certain meeting dates that may conflict with official holidays have been canceled and a short summer break has been observed. Special Meetings may be scheduled to maintain the consistency needed to sustain City operations.

The purpose of this Staff Report is to forecast and review potential holidays, breaks, and possible Special Meeting dates to anticipate the 2024 Council Meeting schedule.

DISCUSSION:

The City Council's anticipated 2024 Regular Meeting schedule (Attachment 1) considers potential conflicts for cancellation or, if needed, to establish additional meetings. Consideration of the annual meeting schedule for the purpose of possible modifications facilitates preparation of an anticipated agenda schedule. Additionally, memorializing a plan allows:

- Adequate time for Staff to prepare Staff Reports and a final agenda packet on time.
- Adequate preparation time for Council to review the agenda.
- Sufficient time for public notification of any cancelled/rescheduled meetings.

Therefore, this item is intended to review and consider potential modifications of the *regularly scheduled* 2024 City Council meeting schedule. Any meeting that may be canceled and rescheduled at this time for planning purposes is not permanent. If a Regular Meeting date is canceled at this time, it is not permanently canceled and may still take place at its *regularly scheduled* date/time/place, per proper noticing requirements.

CITY COUNCIL ACTION:

Regularly scheduled meetings are intended to provide consistency and to meet the public's general expectations. There are specific noticing requirements for Regular and Special Meeting agendas.

Meeting Types

Regular Meetings (established by Resolution)
Special Meetings (called at any time)

Agenda Noticing Requirement

72 hours prior to meeting time.
24 hours prior to meeting time.

Specific City business, such as the adoption of Ordinances, is required to take place only at a Regular Council Meeting. Therefore, the anticipation of canceled meetings is necessary to appropriately coordinate meeting agendas, and related business, in order to effectively manage City operations. Please also note that Special Meetings can be called to replace a canceled meeting, as was the case in November 2023, depending upon workload and items requiring City Council action.

Staff recommends that the Council consider potential schedule conflicts, review proposed recommendations, and, if necessary, provide direction to Staff to prepare a revised calendar for reference and planning.

CEQA COMPLIANCE STATEMENT: N/A

FISCAL IMPACT: N/A

WORK PLAN: N/A

OPTIONS:

- Review and approve proposed 2024 Council Meeting Schedule.
- Cancel and/or reschedule the Council meeting dates due to conflicts with holidays and summer break.
- Consider cancelation or rescheduling of other dates.
- Do not cancel or reschedule any Council meeting dates.

DEPARTMENT RECOMMENDATION:

Staff recommends that City Council review, edit, and/or approve a 2024 anticipated Council Meeting schedule with proposed cancellations and/or additional meetings.

CITY MANAGER'S RECOMMENDATION:

Approve Department Recommendation

Gregory Wade, City Manager

NOTE: The above Regular Meetings that may be *cancelled* at this time, primarily for planning purposes, are not considered a permanent cancellation and may occur at the regularly scheduled time, per required noticing for Regular Meetings (72 hours). If the forecasted Cancellation holds, the Clerk's Office posts a Cancellation notice. Special Meetings may be called through the year, per the required noticing of 24 hrs or more. Always check the City's website www.cityofsolanabeach.org under Public Meetings.

STAFF REPORT

CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers
FROM: Gregory Wade, City Manager
MEETING DATE: January 10, 2024
ORIGINATING DEPT: Public Works Department
SUBJECT: **Council Consideration of Resolution 2024-001 Ratifying the City Manager’s Decision to Execute Amendment No. 2 to the Professional Services Agreement for Door Inspection, Maintenance with National Garage Door**

BACKGROUND:

One element of the City’s facility maintenance responsibilities is maintenance and repairs of the garage doors, swinging double doors, and access control doors for City Hall, Fire Station, the Community Centers, the Marine Safety Center, and the Public Works Maintenance Facility. These services are provided by professional vendors hired by the Public Works Department through a competitive selection process.

On February 22, 2023, the City Council authorized the City Manager to enter into a Professional Services Agreement (PSA) with National Garage Door for replacement of the roll-up doors at the Fire Station and for maintenance of several other doors throughout the City’s facilities.

This item is before the City Council for the consideration of Resolution 2024-001 (Attachment 1) to ratify the City Manager’s decision to execute an amendment to the (PSA) with National Garage Door for the replacement of the Fire Station Garage Doors.

DISCUSSION:

As part of the annual door maintenance and as-needed repairs agreement, the vendor is required to perform routine maintenance at City Hall, the La Colonia Community Center, the Fletcher Cove Community Center, Marine Safety Center, and the Fire Station. This maintenance includes routine inspections, as-needed minor repairs, and replacements of garage doors, including the Garage doors at the Fire Station. National

COUNCIL ACTION:

Garage Door is the City’s current service provider and City Staff has been satisfied with their work performance.

Resolution 2023-016 authorized the City Manager to award a Professional Services Agreement to National Garage Door for the replacement of six roll up doors at the fire station. This PSA encompasses both maintenance and construction elements. The maintenance component of the agreement focuses on preserving existing structures and systems, ensuring their functionality over time. Meanwhile, the construction component of the agreement involves implementing new components or upgrades and enhancing the overall infrastructure. This dual approach ensures a comprehensive strategy for the sustained reliability and development of the designated project.

For the replacement of the six (6) roll up doors at the Fire Station, City Staff selected a color for the garage doors from a brochure that was intended to replicate the color of the existing doors. Following the installation of the first new garage door, it was brought to Staff’s attention that the color selection did not represent the color chosen from the brochure, resulting in garage doors that did not match the aesthetic of the originally approved Fire Station. Recognizing the importance of maintaining a cohesive appearance that reflects our commitment to the community, the City Manager directed Staff to execute a change order with the contractor to order new doors in a color that more closely matches the color of the existing doors. The purpose of this Staff Report is to ratify the City Manager’s decision to execute a change order for the new doors to replace the previously purchased garage doors with ones that align with the design of the fire station. This adjustment not only serves to enhance the visual appearance of the facility, but also ensures that the City meets the expectations of both the community and our dedicated firefighters.

Table 1 provides a breakdown of the PSA with National Garage Door.

**TABLE 1: MAINTENANCE, CONSTRUCTION, AND AS-NEEDED REPAIRS
FISCAL YEAR 2023/24**

ITEM DESCRIPTION	National Garage Door
Approved Amount for Maintenance and As-Needed Repairs	\$ 21,900
Approve Amount to Replace Six Roll up Doors at the Fire Station	\$140,000
Approved Contingency Amount	\$21,000
Additional Needed Funding	\$48,000
TOTAL	\$230,900

Replacing the garage doors is crucial for community and firefighter safety, ensuring efficient emergency response and also protecting our fire safety vehicles and personnel. This investment not only enhances the facility but also aligns with our commitment to public safety and welfare, making it a prudent use of funds.

This item is presented to the City Council to consider ratifying the City Manager's decision to replace the garage doors at the City's Fire Station. The old garage doors will be sent to auction, providing an opportunity for cost recovery. This process not only helps offset expenses for the garage door replacement project but also contributes to the City's fiscal sustainability by generating additional revenue through the sale of surplus items.

CEQA COMPLIANCE STATEMENT:

All work covered by this agreement is exempt per Section 15301(a) of the State CEQA Guidelines pursuant to the California Environmental Quality Act.

FISCAL IMPACT:

The current agreement with National Garage Door is for \$140,000 with a contingency amount of \$21,000, and \$21,900 for maintenance and as-needed repairs, for a total not to exceed amount of \$182,900.

City Staff is recommending that the City Council ratify the City Manager's decision to purchase a new set of replacement garage doors, at a cost of \$48,000 and to appropriate \$48,000 from the CIP Fund unallocated fund balance to provide sufficient funding for the replacement of all six garage doors at the fire station for FY 2023/24, bringing the not to exceed amount to \$230,900. Please note that there was a remaining balance of \$75,211 for the Fiscal Year 2022-23 Street Maintenance & Repair Project, Bid No. 2023-07, that would more than offset this additional expenditure.

WORK PLAN:

This project was not mentioned in the FY 2023/24 Work Plan.

OPTIONS:

- Approve Staff recommendation.
- Approve Staff recommendation with alternative amendments/modifications.
- Provide direction/feedback.

DEPARTMENT RECOMMENDATION:

Staff recommends the City Council:

1. Adopt Resolution 2024-001:

- a. Ratifying the City Manager's decision to execute amendment No. 2 to the Professional Services Agreement with National Garage Door, in an amount of \$48,000, for a total not to exceed amount of \$230,900 for Fiscal Year 2023/24.
- b. Authorizing a transfer of \$48,000 from the CIP Fund unallocated fund balance for Fiscal Year 2023/24.
- c. Authorizing the City Treasurer to amend the Fiscal Year 2023/24 Adopted Budget accordingly.

CITY MANAGER'S RECOMMENDATION:

Approve Department Recommendation.

Gregory Wade, City Manager

Attachments:

1. Resolution 2024-001

RESOLUTION 2024-001

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF SOLANA BEACH, CALIFORNIA, RATIFYING THE CITY MANAGER'S DECISION TO EXECUTE AMENDMENT NO.2 TO THE PROFESSIONAL SERVICES AGREEMENT WITH NATIONAL GARAGE DOOR FOR MAINTENANCE, AS-NEEDED REPAIRS, AND REPLACEMENT OF THE CITY'S GARAGE DOORS

WHEREAS, the Solana Beach Fire Station garage doors have exceeded their useful life, in order to meet the needs and expectations of the community; and

WHEREAS, Resolution 2023-016 authorized the City Manager to award a Professional Services Agreement to National Garage Door for the replacement of six roll up doors at the fire station. Replacing the garage doors is crucial for community and firefighter safety, ensuring efficient emergency response; and

WHEREAS, this resolution is intended to ratify the City Manager's decision to execute a change order for the new doors to replace the previously purchased garage doors with ones that align with the design of the fire station. This adjustment not only serves to enhance the visual appeal of the facility but also ensures that City meets the expectations of both the community and our dedicated firefighters; and

WHEREAS, the old garage doors will be sent to auction, providing an opportunity for cost recovery. This process not only helps offset expenses for the garage door replacement project but also contributes to the City's fiscal sustainability by generating additional revenue through the sale of surplus items.

WHEREAS, the current agreement with National Garage Door is for \$140,000 with a contingency amount of \$21,000, and \$21,900 for maintenance and as-needed repairs, for a total not to exceed amount of \$182,900.

WHEREAS, City Staff are recommending an appropriation of \$48,000 from the CIP Fund unallocated fund balance to provide sufficient funding for the replacement of all six garage doors at the fire station, bringing the not to exceed amount to \$230,900, for FY 2023/24.

NOW, THEREFORE, the City Council of the City of Solana Beach, California, does resolve as follows:

1. That the foregoing recitations are true and correct.

- a. That the City Council ratifies the City Manager's decision to execute amendment No. 2 to the Professional Services Agreement with National Garage Door, in an amount of \$48,000, for a total not to exceed amount of \$230,900 for Fiscal Year 2023/24.
- b. That the City Council authorizes a transfer of \$48,000 from the CIP Fund unallocated fund balance for Fiscal Year 2023/24.
- c. That the City Council authorizes the City Treasurer to amend the Fiscal Year 2023/24 Adopted Budget accordingly.

PASSED AND ADOPTED this 10th day of January 2024, at a regularly scheduled meeting of the City Council of the City of Solana Beach, California by the following vote:

AYES: Councilmembers –
NOES: Councilmembers –
ABSENT: Councilmembers –
ABSTAIN: Councilmembers –

LESA HEEBNER, Mayor

JOHANNA N. CANLAS, City Attorney

ANGELA IVEY, City Clerk

STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers
FROM: Gregory Wade, City Manager
MEETING DATE: January 10, 2024
ORIGINATING DEPT: Engineering Department
SUBJECT: **City Council Consideration of Resolution 2024-004 Authorizing the City Clerk to File a Notice of Completion for the Fiscal Year 2022-23 Street Maintenance & Repair Project**

BACKGROUND:

At the June 28, 2023, City Council (Council) Meeting, Council awarded the construction contract for the Fiscal Year 2022-23 Street Maintenance & Repair Project, Bid No. 2023-07, to Quality Construction & Engineering.

This item is before the Council to consider adoption of Resolution 2024-004 (Attachment 1) to report the final project costs, accept the project as complete, and to direct the City Clerk to file a Notice of Completion.

DISCUSSION:

Quality Construction & Engineering was selected for and completed all work on this project in accordance with the approved plans and specifications of Bid No. 2023-07 to the satisfaction of the City Engineer. The City will release the 5% retention (\$54,989) 35 days after the approval of the Notice of Completion by the Council.

The following are some of the highlights of this annual street maintenance project:

- Pavement overlays on 10 street segments totaling 206,000 square feet (SF).
- Slurry seals on 19 street segments totaling 620,000 SF.
- Replacement of traffic striping and legends on all resurfaced street segments.
- Construction of median curbs on Highland Drive between Lomas Santa Fe Drive and Uno Verde, including preparation of the median area and importing topsoil for future landscaping as a separate project.

CITY COUNCIL ACTION:

- Removal and reconstruction of curb, gutter, and sidewalk, including full width pavement overlay, on South Acacia from Plaza Street to the Distillery parking lot.
- Localized pavement “pothole” repairs (dig-outs) throughout the City totaling 19,000 SF.
- Repainting faded traffic striping at select locations.
- Replacement of damaged sidewalks at locations where additional work was performed.
- Installation of speed cushions including replacement of two sets of speed cushions on North Acacia between Cliff and Estrella and one set on North Granados between El Viento and Cliff.

One change order for additional work was approved, which included:

- Additional restriping on Lomas Santa Fe Drive, Plaza Street, San Andres Drive and Las Banderas Drive.
- Adjustment of bid quantities.
- Deletion of South Sierra sidewalk replacement as the Distillery Parking Lot.
- Addition of concrete art pad in new Highland Drive medians.
- Construction of berm on South Cedros at Marsolan.
- Addition of drain in South Acacia sidewalk.

CEQA COMPLIANCE STATEMENT:

The project is exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15301(c) of the State CEQA Guidelines.

FISCAL IMPACT:

The project was funded by the Fiscal Year (FY) 2022/23 Annual Pavement Management Program and the South Acacia Streetscape Project. The funding includes \$154,000 in Gas Tax Funds, \$315,000 in TransNet Funds (including \$90,000 programmed for South Acacia Streetscape Project), \$400,000 in Road Repair and Accountability Act (SB1) Funds, and \$306,000 in General Funds. The total funding appropriated for this project was \$1,175,000.

The construction base contract amount was \$1,088,838. The City Council authorized a construction contingency in the amount of \$86,162 to match the total project funding of \$1,175,000. One change order was executed in the net amount of \$10,950.06, for a final project cost of \$1,099,788.46. This change order is covered by the approved contingency amount of \$86,161.60, of which \$75,211 was unused and will be returned to the General Fund to be used for other purposes.

WORK PLAN:

Unprioritized Community Character Issues.

OPTIONS:

- Adopt Staff recommendation.
- Deny Staff recommendation and provide direction.

DEPARTMENT RECOMMENDATION:

Staff recommends that the City Council adopt Resolution 2024-004:

1. Authorizing the City Council to accept, as complete, the FY 2022-23 Street Maintenance & Repair Project, Bid No. 2023-07, performed by Quality Construction & Engineering.
2. Authorizing the City Clerk to file a Notice of Completion.

CITY MANAGER'S RECOMMENDATION:

Approve Department Recommendation.

Gregory Wade, City Manager

1. Resolution 2024-004

RESOLUTION 2024-004

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF SOLANA BEACH, CALIFORNIA, ACCEPTING, AS COMPLETE, THE FY 2022-23 STREET MAINTENANCE & REPAIR PROJECT, BID NO. 2023-07 AND AUTHORIZING THE CITY CLERK TO FILE A NOTICE OF COMPLETION

WHEREAS, on June 28, 2023, the City Council awarded a construction contract for the FY 2022-23 Street Maintenance & Repair Project, Bid No. 2023-07, to Quality Construction & Engineering; and

WHEREAS, the FY 2022-23 Street Maintenance & Repair Project has now been completed in accordance with the plans and specifications included as part of the public works contract with Quality Construction & Engineering to the satisfaction of the City Engineer.

NOW, THEREFORE, the City Council of the City of Solana Beach, California, does resolve as follows:

1. That the above recitations are true and correct.
2. That the City Council accepts, as complete, the FY 2022-23 Street Maintenance & Repair Project, Bid No. 2023-07, performed by Quality Construction & Engineering.
3. That the City Council authorizes the City Clerk to file a Notice of Completion for the project.

PASSED AND ADOPTED this 10th day of January 2024, at a regularly scheduled meeting of the City Council of the City of Solana Beach, California by the following vote:

AYES: Councilmembers
NOES: Councilmembers
ABSTAIN: Councilmembers
ABSENT: Councilmembers

LESA HEEBNER, Mayor

APPROVED AS TO FORM:

ATTEST:

JOHANNA N. CANLAS, City Attorney

ANGELA IVEY, City Clerk

STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers
FROM: Gregory Wade, City Manager
MEETING DATE: January 10, 2024
ORIGINATING DEPT: Community Development Department
SUBJECT: **Request to Purchase Two (2) Ford Maverick Hybrid Pickup Trucks for Code Compliance Staff (Resolution 2024-008)**

BACKGROUND:

The Code Compliance Division of the Community Development Department currently operates and maintains a model year 2013 Ford Escape and 2008 Ford Ranger pickup. These vehicles are primarily used by Code Compliance Staff for parking enforcement and field related activities throughout the City. They are also used to transport traffic control devices and illegal signs or materials removed from the City’s right-of-ways. One of the code vehicles is inoperable leaving one vehicle to share amongst code compliance Staff. The remaining code compliance vehicle is ten (10) years old and has been determined that it is also beyond its life expectancy as a regular/daily use vehicle.

This item is before the City Council to consider approving Resolution 2024-008 (Attachment 1) authorizing the purchase of two replacement vehicles for the Code Compliance Division.

DISCUSSION:

The City of Solana Beach’s Code Compliance Division operates and maintains a fleet of two (2) vehicles for the purpose of field inspections, traffic control and parking enforcement patrols. Occasionally, these vehicles must be replaced as they have met the end of their useful life.

The new model year hybrid pickup trucks will replace a fifteen (15) year old Ford Ranger pickup truck and a ten (10) year old Ford Escape that have exceeded their useful lives. They are scheduled for replacement. The Ford Ranger truck has undergone repairs for electrical and instrument issues, as well as chronic battery failures due to an electrical short issue. It presently remains unused. The Ford Escape has been regularly shared between two Staff members for five (5) consecutive days a week. The Community Development Department Director is recommending that both vehicles be replaced with 2024 hybrid model Ford Maverick pick-up trucks. Staff is also recommending safety lighting/vehicle upfit package to be included on each truck, which will add an additional \$6,134.01 to the total price, for a total cost of \$48,340.23 per vehicle. The total cost for both vehicles with upfits would be \$96,680.46. The total cost includes sales tax, DMV registration, tire fee and destination charge.

CITY COUNCIL ACTION: _____ _____

The City's purchasing regulation Section 3.08.130(C) of the Solana Beach Municipal Code authorizes "public agencies" to participate in cooperative purchasing agreements like those established by eBidboard or acquired in cooperation with another government agency. Where no joint powers authority exists, the City may utilize the bid lists of the state or another governmental agency where it is beneficial and economically advantageous to do so, as long as the bid process utilized by the other governmental agency is similar to the City process.

After eBidboard resulted in no responses or interest from local auto dealers, and after careful evaluation of various purchasing options and in consultation with the City Attorney's office, Staff opted to utilize the State of California's Department of General Services Fleet Vehicle Contract. The State contract with auto dealers may also be utilized by any local government agency to place a direct order for any listed vehicle option within the contract but would be subject to inventory availability, per State policy. Staff located a compact Ford pickup truck hybrid option within the State's contract list of vehicles. It was the only compact pickup hybrid option available.

It is anticipated that it will take approximately four to six months for the City to receive the new vehicles. Upon receipt of the new vehicles, Code Compliance Staff will coordinate all necessary steps to get the vehicles into use. Below is a representative picture of the vehicles.

The vehicles will be eco-hybrid/fuel efficient models, consistent with the preference and direction of City Council and they are the only compact sized, alternative fuel pickup available on the State's contract list. The rugged nature of code compliance activities includes, but is not limited to, transporting cones, barricades and illegal signage which makes this compact truck the most appropriate hybrid vehicle type.

CEQA COMPLIANCE STATEMENT:

This action is not subject to review under the California Environmental Quality Act (CEQA).

FISCAL IMPACT:

The new vehicles for the Code Compliance Division will be purchased utilizing funds within the Asset Replacement Fund Reserve specifically identified for and allocated within the budget for this fiscal year to replace the existing Code Compliance vehicles. The base price and options discussed are itemized in Table 1, below. The total cost for the vehicles is \$96,680.46. There are sufficient funds in the Asset Replacement Fund Reserve to cover the cost.

Table 1 – Vehicle Descriptions and Cost

Item	Description	Cost
Two (2) 2024 Ford Maverick Crew Pickup (Hybrid)	Downtown Ford Sacramento	\$76,064.00
Emergency Light Package/Upfitting (x2)	-Provide and install 42" light bar. -Provide and install LED 4-corner strobes. -Provide and Install 100 Watt PA (siren disabled). -Provide and Install lighting/PA system controls.	\$11,610.00
Sales Tax		\$6,788.96
Delivery Fee and CA Tire Tax		\$2,217.50
Total Cost		\$96,680.46

WORK PLAN:

N/A

OPTIONS:

- Adopt Staff recommendation.
- Adopt Staff recommendation with revisions.
- Deny Staff recommendations and provide direction.

DEPARTMENT RECOMMENDATION:

Staff recommends the City Council approve Resolution 2024-008 authorizing the purchase of two (2) new Ford Maverick Hybrid pick-up trucks, with equipment upfits, for \$96,680.46 for the Code Compliance Division.

CITY MANAGER'S RECOMMENDATION:

Approve Department Recommendation.

Gregory Wade, City Manager

Attachment:

1. Resolution 2024-008

RESOLUTION 2024-008

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF SOLANA BEACH, CALIFORNIA, AUTHORIZING THE PURCHASE OF TWO REPLACEMENT VEHICLES FOR THE CODE COMPLIANCE DIVISION

WHEREAS, there are currently two (2) vehicles that are utilized by the Code Compliance Division and both are in need of replacement since they have reached the end of their useful lives; and

WHEREAS, the Code Compliance Division of the Community Development Department's 2008 Ford Ranger and 2013 Ford Escape need to be replaced to support the department's continuity of operations; and

WHEREAS, in accordance with Solana Beach Municipal Code (SBMC) Section 3.08.080, Staff prepared specifications and advertised a notice of inviting bids through a formal competitive bidding process, utilizing eBidboard, for two (2) new Ford Maverick hybrid pickup trucks but did not receive any bids and, therefore, the State of California's Department of General Services Fleet Vehicle Contract is to be utilized; and

WHEREAS, Staff is recommending the Code Compliance Division's vehicles be replaced with two (2) new Ford Maverick Hybrid pick-up trucks with identified upfitting/equipment installation; and

WHEREAS, Staff obtained a quote from Downtown Ford of Sacramento, an auto dealer listed within the State of California's Department of General Services Fleet Vehicle Contract to locate a vehicle that meets the needs of the department.

NOW, THEREFORE, the City Council of the City of Solana Beach, California, does resolve as follows:

1. That the above recitations are true and correct.
2. That the City Council approves the purchase of two (2) Ford Maverick Hybrid pickup trucks, including accessories, for \$84,412.44 from Downtown Ford of Sacramento.
3. That the City Council approves the purchase of vehicle upfitting for emergency lighting, for \$12,268.02.
4. That the City Council approves the expenditure of \$96,680.46 from the Asset Replacement Reserve Fund of monies already identified for the purchase of new vehicles for the Code Compliance Division by adopting the FY 2023-2024 Budget.

PASSED AND ADOPTED this 10th day of January, 2024, at a regular meeting of the City Council of the City of Solana Beach, California by the following vote:

- AYES: Councilmembers –
- NOES: Councilmembers –
- ABSTAIN: Councilmembers –
- ABSENT: Councilmembers –

LESA HEEBER, Mayor

APPROVED AS TO FORM:

ATTEST:

JOHANNA N. CANLAS, City Attorney

ANGELA IVEY, City Clerk

STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers
FROM: Gregory Wade, City Manager
MEETING DATE: January 10, 2024
ORIGINATING DEPT: Community Development Department
SUBJECT: Request for a Conditional Use Permit for the Maintenance and Repair of an existing lower seawall and an existing upper drilled pier wall running east/west on the southern property line at 825 S. Sierra Avenue, Solana Beach. Case No: CUP23-001; Applicant: Del Mar Beach Club Homeowners Association Resolution 2024-010.

BACKGROUND:

The Applicant, the Del Mar Beach Club Homeowners Association, is requesting the approval of a Conditional Use Permit (CUP) for the maintenance and repair of the southern 170-feet of an existing 540-foot-long lower bluff seawall on the coastal bluff below 825 S. Sierra Avenue as well as maintenance and repair of an existing upper bluff drilled pier wall running east/west at the southern property line. The proposed maintenance to the lower seawall would include the installation of a new row of tie-back anchors to provide lateral support as the existing tiebacks are failing, the removal of all spalled concrete and either cleaning or replacing the reinforcing steel, placing a new shotcrete cover over the repaired area, and the installation of weep holes at or above 7 MSL. The maintenance of the upper bluff pier wall would include the placement of a reinforced shotcrete skin on the existing 18-inch drilled piers for the length of the exposure which is approximately 4 feet and if additional tiebacks are necessary an additional three rows would be installed. The entire project would require 20 cubic yards of grading. The approximately 12-acre lot is located in the High Residential (HR) Zone and developed with 192 condominiums.

This issue before the City Council is whether to approve, approve with conditions or deny the Applicant's request for a Conditional Use Permit (CUP) as contained in Resolution 2024-010 (Attachment 1).

CITY COUNCIL ACTION:

DISCUSSION:

The existing condominium complex was constructed in the early 1970's prior to the enactment of the Coastal Act. In 1980, the 540 foot long, 15-foot-high lower bluff seawall was constructed with the approval of the California Coastal Commission (CCC). In 1984, deeper foundation footings and backfill were approved because the existing wall had become undermined by the loss of sand. In 1989, a 40-foot long, 15-foot high, mid-bluff retaining wall and the installation of 29, 18-inch drilled piers was constructed to underpin the southwest corner of the condominium structure. In March of 2001, the City and the CCC approved the installation of five, 36-inch diameter drilled piers ranging from 28 to 70 feet deep perpendicular to the beach below in the southwest corner of the condominium complex. With each project, it was determined that the existing condominium complex or the shoreline structure was threatened and that the proposed construction measures were necessary to protect the complex. As a condition of approval for the 2001 project, the Applicant paid and in-lieu sand replenishment fee as the work extended the life of the seawall for approximately 30 years.

The Applicant has provided an "Updated Geotechnical Recommendations – Proposed Maintenance Repairs Existing Lower Bluff Seawall & South Property Line Upper Bluff Caisson System" from Soil Engineering Construction, Inc. which indicates that the existing bluff retention devices (BRD's) have been adversely affected by ongoing erosion and bluff failures and have either been chemically or physically weathered due to the exposure to the elements including sea air and wave action. According to their assessment, maintenance and repair in two areas is necessary in order to extend the life of the BRD's: 1) The repair of the southern 170-feet of an existing 540-foot-long lower bluff seawall and 2) The repair of the existing upper bluff drilled pier wall running east/west at the southern property line.

Proposed maintenance to the lower seawall would include the installation of a new row of tie-back anchors to provide lateral support as the existing tiebacks are failing, the removal of all spalled concrete and either cleaning or replacing the reinforcing steel, placing a new shotcrete cover over the repaired area, and the installation of weep holes at or above 7 MSL. In addition, the underside of the lower concrete landing of the existing staircase has experienced spalling and requires moderate concrete patching and two columns supporting the lower landing have substantially deteriorated and will be replaced.

The upper bluff pier wall maintenance and repair would include the placement of a reinforced shotcrete skin on the existing 18-inch drilled piers for the length of the exposure which is approximately 4 feet and if additional tiebacks are necessary an additional three rows would be installed.

This CUP application is before the City Council because the Applicant's Engineers performed tie-back exposure and testing and determined that the existing tiebacks have little to no retention capacity and in their opinion could fail at any time. Such failure would result in significant upper bluff failure that would threaten the existing southernmost condominium structure. The letter from Soil Construction Engineering, Inc. is included in Attachment 3. Therefore, the project has been determined to be an emergency.

Solana Beach Local Coastal Program

A consistency finding with the City's Local Coastal Program (LCP) Land Use Plan (LUP) is required for the proposed project. The City's LUP policies were certified to be consistent with Coastal Act Section 30235 which states: *Revetments, breakwaters, groins, harbor channels, seawalls, cliff retaining walls, and other such construction that alters natural shoreline processes shall be permitted when required to serve coastal-dependent uses or to protect existing structures or public beaches in danger from erosion, and when designed to eliminate or mitigate adverse impacts on local shoreline sand supply.*

Applicable City policies from the City's Certified LUP (as amended) are listed below followed by a discussion of how the project complies or has been conditioned to comply with the City's applicable and relevant LUP policies.

- Certified LUP Policy 4.14 (nonconforming structures)
- Certified LUP Policy 4.26 (irrigation controls for bluff properties)
- Certified LUP Policy 4.28 (stormwater runoff)
- Certified LUP Policy 4.39 (payment of mitigation fees)
- Certified LUP Policy 4.49 (findings)
- Certified LUP Policy 4.50 (impact mitigation fees)
- Certified LUP Policy 4.54 (shoreline protection device maintenance)
- Certified LUP Policy 4.55 (coordination among neighbors)
- Certified LUP Policy 4.58 (development on the bluff)

Policy 4.14: *Existing, lawfully established structures that are located between the sea and the first public road paralleling the sea (or lagoon) built prior to the adopted date of the LUP that do not conform to the provisions of the LCP shall be considered legal nonconforming structures. Such structures may be maintained and repaired, as long as the improvements do not increase the size or degree of non-conformity. Additions and improvements to such structures that are not considered Bluff Top Redevelopment, as defined herein, may be permitted provided that such additions or improvements themselves comply with the current policies and standards of the LCP. Complete demolition and reconstruction or Bluff Top Redevelopment is not permitted unless the entire structure is brought into conformance with the policies and standards of the LCP.*

- **Project Compliance with Policy 4.14:** The main BRD, the lower bluff seawall, was constructed prior to the City's incorporation and prior to the certification of the City's LUP/LCP, however, it was approved by the CCC. Therefore, it is considered a legally existing nonconforming structure that can remain and be maintained and repaired. The proposed project would not increase the size of the nonconformity as proposed.

Policy 4.26: *With respect to bluff properties only, the City will require the removal or capping of any permanent irrigation system within 100 feet of the bluff edge in connection with issuance of discretionary permits for new development, redevelopment, or shoreline protection, or bluff erosion, unless the bluff property owner demonstrates to the satisfaction of the Public Works Director, or the CCC if the project is appealed, that such irrigation has no material impact on bluff erosion (e.g., watering hanging plants over hardscape which drains to the street).*

- **Project Compliance with Policy 4.26:** The project has been conditioned to require the removal or capping of any permanent irrigation system within 100 feet of the bluff edge.

Policy 4.28: All storm water drain systems that currently drain or previously drained towards the west over the bluff shall be capped. These systems should be redesigned to drain directly, or through a sump system, and then pumped to the street in compliance with SWP 2007-0001 and consistent with SUSMP requirements. This policy shall be implemented as a condition of approval for all discretionary permits issued for bluff properties or within 5 years of adoption of the LCP, whichever is sooner.

- **Project Compliance with Policy 4.28:** The project has been conditioned to require that all storm water drain systems that currently drain towards the west over the bluff be capped.

Policy 4.39: Provide for reasonable and feasible mitigation for the impacts of all bluff retention devices which consists of the payment of Sand Mitigation Fees and Public Recreation Fees to the City or other assessing agency.

- **Project Compliance with Policy 4.39:** The project has been conditioned to mitigate for all impacts related to sand supply and public recreation through the payment of impact mitigation fees.

Policy 4.45: The City has adopted preferred bluff retention solutions (see Appendix B) to streamline and expedite the City permit process for bluff retention devices. The preferred bluff retention solutions are designed to meet the following goals and objectives:

- (1) Locate bluff retention devices as far landward as feasible;
- (2) Minimize alteration of the bluff face;
- (3) Minimize visual impacts from public viewing areas; ,
- (4) Minimize impacts to adjacent properties including public bluffs and beach area; and,
- (5) Conduct annual visual inspection and maintenance as needed.

The bluff property owner's licensed Civil or Geotechnical Engineer must examine the device for use in the specific location and take responsibility for the design as the Engineer of Record.

The Bluff Property Owner shall arrange for and pay the costs of:

- (1) The licensed Geotechnical or Civil Engineer;
- (2) The bluff retention device;
- (3) A bond to ensure completion of the bluff retention device;
- (4) Appropriate mitigation; and
- (5) All necessary repairs, maintenance, and if needed removal.

- **Project Compliance with Policy 4.45:** The project Applicant has paid for their licensed Geotechnical Engineer and will pay the construction costs for the maintenance and repair of the existing bluff retention devices and will be conditioned to pay the City a bond to ensure completion of the maintenance and repair bluff retention device. Sand

Supply and Public Recreation Impact Mitigation fees are required to be paid by the Applicant prior to issuance of the construction permit. The Applicant will be responsible for all necessary future repairs and maintenance.

Policy 4.49: *Coastal structures shall be approved by the City only if all the following applicable findings can be made and the stated criteria satisfied. The permit shall be valid until the currently existing structure requiring protection is redeveloped (per definition of Bluff Top Redevelopment in the LUP), is no longer present, or no longer requires a protective device, whichever occurs first and subject to an encroachment/removal agreement approved by the City.*

- (a) *Based upon the advice and recommendation of a licensed Geotechnical or Civil Engineer, the City makes the findings set forth below.*
- (1) *A bluff failure is imminent that would threaten a bluff home, city facility, city infrastructure, and/or other principal structure.*
 - (2) *The coastal structure is more likely than not to preclude the need for a larger coastal structure or upper bluff retention structure. Taking into consideration any applicable conditions of previous permit approvals for development at the subject site, a determination must be made based on a detailed alternatives analysis that none of the following alternatives to the coastal structure are currently feasible, including:*
 - *A Seacave/Notch Infill;*
 - *A smaller coastal structure; or*
 - *Other remedial measures capable of protecting the bluff home, city facility, non-city-owned utilities, and/or city infrastructure, which might include or other non-beach and bluff face stabilizing measures, taking into account impacts on the near and long term integrity and appearance of the natural bluff face, and contiguous bluff properties;*
 - (3) *The bluff property owner did not create the necessity for the coastal structure by unreasonably failing to implement generally accepted erosion and drainage control measures, such as reasonable management of surface drainage, plantings and irrigation, or by otherwise unreasonably acting or failing to act with respect to the bluff property. In determining whether or not the bluff property owner's actions were reasonable, the City shall take into account whether or not the bluff property owner acted intentionally, with or without knowledge, and shall consider all other relevant credible scientific evidence, as well as, relevant facts and circumstances.*
 - (4) *The location, size, design and operational characteristics of the proposed coastal structure will not create a significant adverse effect on adjacent public or private property, natural resources, or public use of, or access to, the beach, beyond the environmental impact typically associated with a similar coastal structure and the coastal structure is the minimum size necessary to protect the principal structure, has been designed to minimize all environmental impacts, and provides mitigation for all coastal and environmental impacts, as provided for in this LCP.*
- (b) *The coastal structure shall meet City Design Standards, which shall include the following criteria to ensure the coastal structure will be:*

- (1) *Constructed to resemble as closely as possible the natural color, texture and form of the adjacent bluffs;*
 - (2) *Landscaped, contoured, maintained and repaired to blend in with the existing environment;*
 - (3) *Designed so that it will serve its primary purpose of protecting the bluff home or other principal structure, provided all other requirements under the implementing ordinances are satisfied, with minimal adverse impacts to the bluff face;*
 - (4) *Reduced in size and scope, to the extent feasible, without adversely impacting the applicant's bluff property and other properties; and*
 - (5) *Placed at the most feasible landward location considering the importance of preserving the maximum amount of natural bluff and ensuring adequate bluff stability to protect the bluff home, City facility, or City infrastructure.*
- (c) *Mitigation for the impacts to shoreline and sand supply, public access and recreation and any other relevant coastal resource impacted by the coastal structure is required and shall be assessed in 20-year increments, starting with the building permit completion certification date. Property owners shall apply for a CDP amendment prior to expiration of each 20-year mitigation period, proposing mitigation for coastal resource impacts associated with retention of the coastal structure beyond the preceding 20-year mitigation period and shall include consideration of alternative feasible measures in which the permittee can modify the coastal structure to lessen the coastal structure's impacts in coastal resources. Monitoring reports to the City and the Coastal Commission shall be required every five years from the date of the CDP issuance until CDP expiration, which evaluate whether or not the coastal structure is still required to protect the existing structure it was designed to protect. The permittee is required to submit a CDP application to remove the authorized coastal structure within six months of a determination that the coastal structure is no longer required to protect the existing structure it was designed to protect.*

- **Project Compliance with Policy 4.49:** The proposed project includes the maintenance and repair of the existing BRD's. The Applicant's Engineer has made a determination that the need for repair is an emergency situation due to the fact that the existing tiebacks of the seawall have little to no retention capacity. The City's third-party geotechnical engineer Construction Testing and Engineering, Inc. (CTE) has reviewed the plans, geotechnical reports, pictures and letters provided by the Applicant and confirmed that the project complies with, or has satisfied all of the findings required in, this policy (Attachment 6). The project has been designed consistent with the engineering design requirements of the City's Certified LUP/LCP. Mitigation has been imposed on the project as a condition of approval.

Policy 4.50: *The bluff property owner shall pay for the cost of the coastal structure or Infill and pay a Sand Mitigation Fee and a Public Recreation Fee per LUP Policy 4.39. These mitigation fees are not intended to be duplicative with fees assessed by other agencies. It is anticipated the fees assessed as required by this LCP will be in conjunction with, and not duplicative of,*

the mitigation fees typically assessed by the CCC and the CSLC for impacts to coastal resources from shoreline protective devices.

- **Project Compliance with Policy 4.50:** The project will be required to mitigate all sand supply and public recreation impacts through the payment of mitigation fees to the City. The Applicant will also be required to obtain all necessary permits and approvals from the CCC and the CSLC prior to the City issuance of a construction permit.

Policy 4.54: Any bluff retention device shall be reasonably maintained and repaired by the bluff property owner on an “as needed” basis, at the bluff property owner’s expense, in accordance with the implementing ordinances and any permit issued by the City. Any authorized assessing entity in which the project lies shall ensure such payments are reimbursed to the City if the bluff property owner fails to perform such work and the City elects to do so, subject to mandatory reimbursement. However, in all cases, after inspection, it is apparent that repair and maintenance is necessary, including maintenance of the color of the structures to ensure a continued match with the surrounding native bluffs, the bluff property owner or assessing entity shall contact the City or CCC office to determine whether permits are necessary, and, if necessary, shall subsequently apply for a coastal development permit for the required maintenance.

- **Project Compliance with Policy 4.54:** The project has been conditioned to include a requirement that the proposed project be repaired and maintained as needed for the life of the structure.

Policy 4.55: To achieve a well maintained, aesthetically pleasing, and safer shoreline, coordination among property owners regarding maintenance and repair of all bluff retention devices is strongly encouraged. This may also result in cost savings through the realization of economies of scale to achieve these goals by coordination through an assessing entity. All bluff retention devices existing as of the date of certification of the LCP, to the extent they do not conform to the requirements of the LCP, shall be deemed non-conforming. A bluff property owner may elect to conform his/her/its bluff property or bluff retention device to the LCP at any time if the City finds that an existing bluff retention device that is required to protect existing principal structures in danger from erosion is structurally unsound, is unsafe, or is materially jeopardizing contiguous private or public principal structures for which there is no other adequate and feasible solution, then the City may require reconstruction of the bluff retention device.

- **Project Compliance with Policy 4.55:** The subject CUP application was collectively submitted by the Del Mar Beach Club Condominium Homeowners Association.

Policy 4.58: Development on the bluffs, including the construction of a bluff retention device, shall include measures to ensure that:

- *No stockpiling of dirt or construction materials shall occur on the beach;*
- *All grading shall be properly covered and sandbags and/or ditches shall be used to prevent runoff and siltation;*
- *Measures to control erosion shall be implemented at the end of each day’s work;*
- *No machinery shall be allowed in the intertidal zone at any time to the extent feasible;*

- *All construction debris shall be properly collected and removed from the beach. Shotcrete/concrete shall be contained through the use of tarps or similar barriers that completely enclose the application area and that prevent shotcrete/concrete contact with beach sands and/or coastal waters.*
- **Project Compliance with Policy 4.58:** Compliance with the requirements of this policy have been included as engineering conditions of approval.

Resolution No. 2024-010 (Attachment 1) contains citations to relevant policies of the City's LUP/LCP as conditions of approval.

Sand Mitigation Fee and Public Recreation Impact Mitigation Fee Deposit

As mentioned before, the lower bluff seawall was constructed prior to the certification of the City of Solana Beach LCP/LUP and the certification of how to calculate the Sand Mitigation Fee and the Public Recreation Impact Mitigation Fee for projects. These calculations are now Appendix A and C of the City's LCP/LUP. Now that the Applicant is proposing maintenance and repair that will extend the life of the southern 170 feet of the lower seawall, the City should calculate and charge the Applicant the Sand Mitigation Fee and the Public Recreation Impact Fee for a period of 20 years for this portion of the wall.

Using these calculations, the Public Recreation Impact Fee would be \$205,700 for the repair of the southern portion of the lower seawall. At the time this report was published Staff was still working with the City's third-party geotechnical engineer to determine the estimated Sand Mitigation Fee which will be provided in a blue folder memo distribution.

Additional maintenance and repairs are proposed with this permit; however, some Sand Mitigation fees were previously paid for the upper bluff work and the Public Recreation Fee would not apply, therefore, the City is not assessing fees for this portion of the project at this time.

It is unclear how the fees would be assessed for maintenance of the columns and landing of the staircase, therefore, a condition of approval will be added to the Resolution indicating that the Applicant is required to pay the Sand Mitigation Fee and the Public Recreation Impact Mitigation Fee in the amount calculated by the City unless the CCC assesses the fee at a higher amount, then we would accept the fee in the amount assessed by the CCC so that the Applicant wouldn't have to return to the City Council for assessment of a different amount of fees.

Compliance with Solana Beach Certified LUP Policies

Staff has evaluated the CUP application taking into account the following factors: (1) the relevant policies of the City's Certified LUP; (2) the conclusions drawn by the (a) City of Solana Beach's independent third-party geotechnical consultant CTE, INC. regarding the need for the project and the appropriateness of the proposed maintenance and repair to be performed to the existing BRD's and (b) the City of Solana Beach City Engineering conditions of approval; and (3) the Applicant's geotechnical reports and supplemental alternatives analysis

(Attachments 4,5, and 6).

After evaluating the project plans, photos, and the geotechnical recommendations report and response letters from the Applicant's Engineers, Soils Engineering Construction, Inc. and Degenkolb Engineers, included in Attachments 4, 5, and 6, and the third-party review findings provided by the City's geotechnical engineering consultant, CTE, Inc., and the City Engineer, Staff concurs that the proposed project has met the standard of imminent danger. Without the proposed project to stabilize the existing BRD's the prospect of bluff failure could threaten the southwestern most condominium building.

Based on the foregoing information, City Staff finds that the proposed project could be found consistent with applicable LUP policies previously cited.

In addition to the required LUP findings, compliance with the Solana Beach Municipal Code is required to support issuance of a Conditional Use Permit.

Compliance with Solana Beach Municipal Code (SBMC) Findings 17.68.010 (F)

- a. That the proposed use is in accord with the general plan, the general intent of this title, and the purposes of the zone in which the site is located.
- b. That the proposed use, together with the conditions applicable thereto, will not be detrimental to the public health, safety, or welfare, or materially injurious to properties or improvements in the vicinity.
- c. That the proposed use complies with each of the applicable provisions of the zoning ordinance, unless a variance is granted pursuant to SBMC 17.68.020.

The proposed project is consistent with required finding (a), whereby shoreline protective devices are a structure/use allowed in the City to protect bluff top principal structures in danger of erosion.

The proposed project is consistent with the required finding (b) whereby the proposed project is needed to address an emergency condition whereby bluff failure has been confirmed to be imminent by Construction Testing and Engineering, Inc. (CTE, Inc. who is one of the City's on call third-party Geotechnical Engineering Firms).

The proposed project is consistent with the required finding (c) whereby the proposed project is consistent with the zoning ordinance which allows for shoreline protection.

CEQA COMPLIANCE STATEMENT:

The proposed project qualifies as an emergency repair pursuant to the California Environmental Quality Act (CEQA) Public Resources Code §§ 21060.3, as evidenced by a licensed geotechnical engineer. Thus, this project is exempt from CEQA per 2023 State CEQA Guidelines §15269(b)(c). The project Engineer also provided a letter confirming that this is an emergency condition which has been provided in attachment 3. The project also qualifies for

and exemption under 15301 existing facilities.

FISCAL IMPACT: N/A

WORK PLAN: N/A

OPTIONS:

- Approve the proposed project and adopt Resolution 2024-010.
- Deny the proposed project.
- Provide alternative direction.

DEPARTMENT RECOMMENDATION:

Staff recommends that the City Council:

1. Conduct the Public Hearing: Open the public hearing, Report Council disclosures, receive public testimony, and close the public hearing.
2. Find the Proposed Project exempt from the requirements of CEQA pursuant to 2023 State California CEQA Guidelines §15269 as emergency conditions exist onsite. The project could also be found exempt from the requirements of CEQA pursuant to Section 15301 of the State California CEQA Guidelines.
3. Adopt Resolution 2024-010 conditionally approving a Conditional Use Permit for maintenance and repair of the southern 170 feet of an existing 540-foot lower bluff seawall and an upper bluff drilled pier wall running east to west along the southern property line at 825 S. Sierra Avenue, Solana Beach.

CITY MANAGER'S RECOMMENDATION:

Approve Department Recommendation.

Gregory Wade, City Manager

RESOLUTION 2024-010

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF SOLANA BEACH, CALIFORNIA, APPROVING A CONDITIONAL USE PERMIT FOR MAINTENANCE AND REPAIR OF THE SOUTHER 170 FEET OF AN EXISTING 540-FOOT-LONG LOWER BLUFF SEAWALL AND MAINTENANCE AND REPAIR OF AN EXISTING UPPER BLUFF DRILLED PIER WALL THAT RUNS EAST/WEST ALONG THE SOUTHERN PROPERTY LINE ON THE BLUFF BELOW THE DEL MAR BEACH CLUB CONDOMINIUM COMPLEX AT 825 SOUTH SIERRA AVENUE IN SOLANA BEACH.

**APPLICANTS: DEL MAR BEACH CLUB
CONDOMINIUM HOMEOWNERS
ASSOCIATION**

CASE NO.: CUP23-001

WHEREAS, the Del Mar Beach Club Condominium Homeowners Association (hereinafter referred to as “Applicant”) has submitted an application for a Conditional Use Permit (CUP) pursuant to Title 17 (Zoning) of the Solana Beach Municipal Code (SBMC); and

WHEREAS, the City Council adopted the Amended Local Coastal Program (LCP) Land Use Plan (LUP) in June 2014 with policies allowing for repair and maintenance of existing, lawfully established structures as long as the improvements do not increase the size or degree of the nonconformity; and

WHEREAS, an Updated Geotechnical Recommendations Report and Project Plans prepared by Soil Construction Engineering, Inc. have been reviewed and confirmed by Construction Testing & Engineering, Inc. (CTE), the City’s third party independent geotechnical consultant, in a letter dated November 16, 2023, indicating the proposed project is required and has been designed consistent with all City requirements; and

WHEREAS, at the duly noticed Public Hearing held on January 10, 2024, the City Council received and considered evidence concerning the proposed application as received; and

WHEREAS, the Public Hearing was conducted pursuant to the provisions of Solana Beach Municipal Code Section 17.72.030; and

WHEREAS, the City Council of the City of Solana Beach found the proposed project exempt from the California Environmental Quality Act pursuant because the proposed project qualifies as an emergency repair pursuant to the CEQA Public Resources Code §§ 21060.3, as evidenced by a licensed geotechnical engineer. the project is exempt from CEQA per 2023 State CEQA Guidelines §15269(b)(c) and Guidelines § 15301; and

WHEREAS, this decision is based upon the evidence contained in the subject application, testimony of CTE, evidence presented at the Hearing and any information the

City Council gathered by viewing the site and the area as disclosed at the Hearing.

NOW THEREFORE, the City Council of the City of Solana Beach, California, does resolve as follows:

1. That the foregoing recitations are true and correct.
2. That the project is categorically exempt from the requirements of CEQA pursuant to 2023 State California CEQA Guidelines 15301 and the proposed project qualifies as an emergency repair pursuant to the CEQA Public Resources Code §§ 21060.3, as evidenced by a licensed geotechnical engineer. the project is exempt from CEQA per 2023 State CEQA Guidelines §15269(b)(c).
3. That the request for a CUP for the maintenance and repair of the southern 170-foot of an existing 540-foot-long lower bluff seawall on the coastal bluff below 825 S. Sierra Avenue as well as maintenance and repair of an existing upper bluff drilled pier wall running east/west at the southern property line is conditionally approved based upon the following Findings and subject to the following Conditions:

4. FINDINGS

A. Compliance with Solana Beach Municipal Code (SBMC) Findings 17.68.010 for a Conditional Use Permit:

I. Before granting a conditional use permit, the planning director or city council shall make all of the following findings:

a. That the proposed use is in accord with the general plan, the general intent of this title, and the purposes of the zone in which the site is located.

General Plan Consistency

The City Council finds the proposed project to be consistent with the following General Plan policies in the City's Land Use (LU) Element for residential land uses as repair and maintenance of deteriorating existing legal structures is permitted:

- Policy LU-5.1: To ensure that development does not create adverse environmental, geographic, or geologic impacts, the City Council shall maintain ordinances for the preservation of hillsides, floodplains, sensitive biological areas, canyons, wetlands, coastal lands, scenic public views and, where feasible, private views. The Council shall also continue to regulate development of property within special hazard areas, including floodplains, coastal bluffs, and steep hillside areas.

- Policy LU-7.5: Protect, maintain, and where feasible, enhance and restore coastal resources consistent with the Local Coastal Program.

Local Coastal Plan/Land Use Plan Consistency

The Solana Beach City Council adopted an LCP/LUP on February 27, 2013 (amended and certified on June 11, 2014). Although the LUP has been certified by the California Coastal Commission, the Local Implementation Plan (LIP) portion of the LCP has not yet been certified; as such, the provisions of the LUP are considered by the Coastal Commission to be advisory rather than mandatory at this time.

The purpose of the LUP is to implement the State's goals for the coastal zone. The City's LUP provides long-term goals that promote the beneficial use of lands in the City and the beach and shoreline for residents and visitors alike. The LUP allows for existing structures to be maintained and repaired pursuant to the following policies:

- Policy 4.14: Existing, lawfully established structures that are located between the sea and the first public road paralleling the sea (or lagoon) built prior to the adopted date of the LUP that do not conform to the provisions of the LCP shall be considered legal nonconforming structures. Such structures may be maintained and repaired, as long as the improvements do not increase the size or degree of non-conformity. Additions and improvements to such structures that are not considered Bluff Top Redevelopment, as defined herein, may be permitted provided that such additions or improvements themselves comply with the current policies and standards of the LCP. Complete demolition and reconstruction or Bluff Top Redevelopment is not permitted unless the entire structure is brought into conformance with the policies and standards of the LCP. See also Policy 5.45 which addresses non-Bluff Properties.

The City Council finds the proposed project to be consistent with the LCP/LUP as the existing Bluff Retention Devices (BRD's) were constructed with the approval of the California Coastal Commission prior to the Certification of the City's LCP/LUP and the proposed maintenance and repair would not enlarge or expand the wall.

Specific Plans and Special Overlays

The proposed project is located within the Coastal Zone. As a condition of project approval, the Applicant will be required to obtain a Coastal Development Permit, Waiver, or Exemption from the California Coastal Commission prior to the issuance of a grading permit.

Zoning Ordinance Consistency

The project is consistent with the Zoning Ordinance in that shoreline protective devices are a structure/use allowed in the City to protect bluff top principal structures in danger of erosion.

- b. That the proposed use, together with the conditions applicable thereto, will not be detrimental to the public health, safety, or welfare, or materially injurious to+ properties or improvements in the vicinity.*

The proposed project is consistent with the required finding (b) whereby the proposed project is needed to address an emergency condition whereby bluff failure has been confirmed to be imminent by Construction Testing and Engineering, Inc. (CTE, Inc. who is one of the City's on call third-party Geotechnical Engineering Firms).

- c. That the proposed use complies with each of the applicable provisions of the zoning ordinance, unless a variance is granted pursuant to SBMC 17.68.020.*

The project has been reviewed by the City Engineer, the City's third-party Geotechnical Engineer and found to be in compliance with the Zoning Ordinance, the LCP/LUP and the Zoning Ordinance and necessary to prevent bluff failures that would threaten the existing structures.

- 2. If the conditional use permit is for the purpose of permitting an expansion, restoration, or extension of a nonconforming use or structure then only the findings of Chapter 17.16 SBMC must be made.*

No expansion, restoration or extension of a nonconforming structure is proposed with the project.

5. CONDITIONS

Prior to use or development of the property in reliance on this permit, the Applicant shall provide for and adhere to the following conditions:

A. Community Development Department Conditions:

- I. Grading Permit plans must be in substantial conformance with the plans presented to the City Council on January 10, 2024 and located in the project file with a submittal date of October 16, 2023.
- II. The Applicant shall obtain required California Coastal Commission (CCC) approval of a Coastal Development permit, waiver or exemption as determined necessary by the CCC, prior to the

issuance of a Grading Permit.

- III. Any bluff retention device shall be reasonably maintained and repaired by the bluff property owner on an “as needed” basis, at the bluff property owner’s expense, in accordance with the implementing ordinances and any permit issued by the City. Any authorized assessing entity in which the project lies shall ensure such payments are reimbursed to the City if the bluff property owner fails to perform such work and the City elects to do so, subject to mandatory reimbursement. However, in all cases, after inspection, it is apparent that repair and maintenance is necessary, including maintenance of the color of the structures to ensure a continued match with the existing structures, the bluff property owner or assessing entity shall contact the City or CCC office to determine whether permits are necessary and, if necessary, shall subsequently apply for a coastal development permit for the required maintenance.
 - IV. All construction debris shall be properly collected and removed from the area of work.
 - V. The Applicant is required to remove or cap any permanent irrigation system within 100 feet of the bluff edge.
 - VI. The Applicant is required to cap all storm water drain systems that currently drain towards the west over the bluff.
 - VII. Prior to the issuance of a Grading Permit the Applicant shall pay the Sand Mitigation Fee in the amount calculated by the City and the Public Recreation Impact Mitigation Fee in the amount of \$205,700. If the California Coastal Commission assesses the fee in a higher amount the Applicant shall pay the City the mitigation fees assessed by the CCC.
- B. Engineering Department Conditions: Prior to obtaining any building or grading permits pursuant to this project, the Applicants shall:
- I. Prepare, execute and record a declaration of restrictions on real property approved by the City Attorney whereby the applicant or the applicant’s successors in interest to the property will construct and maintain the shoreline defense structure in accordance with Conditions of this approval.
 - II. The declaration of restrictions shall include an agreement by the Applicant to defend, indemnify, and hold harmless the City, its agents, officers, and employees from any and all claims, actions, proceedings, damages, judgments, or costs, including attorney’s fees, against the

City or its agents, officers, or employees, relating to any claim for damages from any injury to person or property caused by the shoreline defense structure or by its failure.

- III. Said declaration of restrictions shall be acknowledged and recorded in the office of the County Recorder.
- IV. Per Policy 4.49 of the certified LUP, an Encroachment Maintenance and Removal Agreement is required when the proposed Bluff Retention Device (BRD) is located in whole or in part on public land. In order to determine if an Encroachment Removal Agreement is required for this project, submit an engineering plan clearly showing the property lines, existing topography and the location of the proposed BRD.
- V. Obtain required California Coastal Commission Permits prior to the issuance of any structure and grading permits or present evidence that an emergency waiver has been granted.
- VI. Obtain any other permits or emergency waivers, which may be required from State and Federal agencies including the State Lands Commission and the U.S. Army Corps of Engineers.
- VII. The project shall be designed and shall provide appropriate data to confirm the submitted design to the satisfaction of the City Engineer. This shall include, but is not limited to, a geotechnical report.
- VIII. The property owners shall post securities to guarantee proper care and use of the Fletcher Cove Beach Access Ramp. No construction materials to be off-loaded on the ramp, at the end of the ramp or any public property including streets and Fletcher Cove Park. No washing of equipment shall occur unless a containment system is properly utilized.
- IX. For all projects on which equipment is driven on the Fletcher Cove Beach Access Ramp, the ramp and adjacent parking lot must be swept daily to remove sand that has been tracked onto the ramp and parking lot. At least once a week, the access ramp and parking lot must be swept with a street sweeper that is capable of cleaning the streets and parking lots of paper, glass, dirt, silt, sand, rocks, litter and miscellaneous debris. The street sweeper shall be equipped with dual gutter brooms, and vacuum equipment may be used. If any sand is tracked outside the parking lot, these areas (including city streets) must also be cleaned weekly with a street sweeper.
- X. The property owners shall pay all inspection and plan check fees as required by the City.

- XI. Plans and specifications for the project shall be approved by the City Engineer in addition to approvals from the Director of Planning as may be required, and shall substantially conform to the plans submitted by the Applicant. All bluff stabilization devices shall produce a natural appearing bluff to the satisfaction of the City Engineer and the Community development director. Project implementation shall provide a final product mimicking a naturally appearing bluff in terms of colors, textures, forms and angles.
- XII. A grading/drainage plan shall be prepared by a registered civil engineer in accordance with the current Grading Ordinance and be submitted to the City Engineer for approval and permit issuance.
- XIII. The Applicant shall post with the City a Performance Bond equal to the full amount of the work to be completed to guarantee that once started, construction will be completed per approved plans.
- XIV. The Applicant shall submit a Certificate of Insurance naming the City of Solana Beach as an additional insured in the amount of \$2,000,000 on a policy of general liability insurance issued by an insurance company licensed to do business in California, and meeting the requirements established by City Council resolution for insurance companies doing business with the City, covering injuries to persons and property during the construction period.
- XV. The Applicant shall obtain a Special Use (Marine Safety) Permit specifying the conditions governing use of vehicles, use of the Fletcher Cove Beach Access Ramp, and entry upon and use of areas of the public beach for construction equipment and vehicles. Evidence of permit issuance shall be submitted to the City Engineer before issuance of the permit for the project.
- XVI. The Applicant shall have on file evidence from the Marine Safety Department and the City Engineer that arrangements have been made to satisfy the following criteria:
 - a. Prior to usage of the Solana Beach Fletcher Cove ramp or parking lot, a cash deposit, bond or other secured agreement to cover the following impact charges shall be deposited:
 - i. A five-dollar and thirty-cents (\$6.00) per round trip vehicle charge for all construction related vehicles using the ramp.
 - ii. A two-dollar and seventy cents (\$3.00) per ton fee, or less if approved by the City Council, based on the estimated weight of the vehicle and load for all vehicles in excess of $\frac{3}{4}$ ton capacity,

excluding any vehicles solely transporting beach grade replenishment sand.

- iii. A twenty-seven dollar (\$31) per day charge for the first 30 days escalating to fifty-three dollars (\$57) per day for the 31st and subsequent days charge shall be collected to encourage a timely completion of all projects, unless otherwise modified for good cause by the City Council or City Manager.
 - iv. Any damage caused to the Solana Beach Fletcher Cove ramp and parking lot.
- b. At least one City of Solana Beach Lifeguard shall be contracted, at the Applicant's expense, through the Captain of Marine Safety, to monitor all activities in order to insure full compliance with the conditions of this permit. The lifeguard(s) shall be on duty at all times when any construction activity takes place. Additional lifeguards may be required at the discretion of the Captain of Marine Safety. In addition to the lifeguard staffing cost, the Applicant shall also pay a Marine Safety equipment use fee of four-dollar and sixty-four cents (\$4.64) per hour, based on the number of the number of hours the lifeguards are contracted for the project.
 - c. If construction access is from Fletcher Cove Park, precautions shall be taken to avoid damage to the beach access ramp during construction and repairs. If damage to the ramp occurs, it shall be repaired to a condition equivalent to the condition at the start of construction activity to the satisfaction of the City of Solana Beach City Engineer. All City owned work areas including Fletcher Cove Park and access ramp shall be videotaped prior to the commencement of the project. The videotape shall establish the "as-is" condition. In any areas missed by the videotape, the City Engineer will determine "as-is" condition.
- XVII. Beach quality sand from the excavation for the proposed project shall be deposited and spread on the beach in front of this site unless unique and/or inappropriate conditions are encountered. The Applicant should reference this condition to other permitting agencies.
 - XVIII. An encroachment permit from the Engineering Department is required if a crane, construction materials, etc. are envisioned to be stationed in the public right of way. The City does not guarantee that an encroachment permit will be approved.
 - XIX. Any grout mixture used on the project that may be visible from the beach or surrounding areas shall be of similar color as the surrounding natural bluffs. Color samples shall be submitted and approved by the City prior to placing the grout.

- XX. The structure and any exposed construction shall mimic the natural contours, color and texture to the maximum extent practicable, as determined by the City Engineer and Community Development Director.
- XXI. A carved, colored and textured facade on the face of the structure matching the adjacent bluff areas shall be constructed. The façade shall match the contours, both vertically and horizontally, and the texture of the adjacent natural bluffs to the maximum extent feasible. Coastal bluff colored grouting shall be used and shall be submitted to the City Engineer before approval of the plans. A test prism shall be cast and delivered to a testing lab during construction.
- XXII. A qualified, licensed and insured contractor shall perform all required work as outlined by certified/registered engineering geologist or Registered Civil Engineer on the construction plans. Special and general notes on said plans shall be followed to the satisfaction of the City Engineer or his designee.
- XXIII. Lateral pedestrian and Marine Safety vehicular access through the construction area, shall be provided past the site at all times, subject to high tides and safety issues. A 30-foot wide safety/construction work zone shall be provided during work hours to separate the work zone from the open public beach.
- XXIV. No construction activities may occur on the beach during the busier recreational season, which is defined as the period between Memorial Day and Labor Day of any year. The contractor shall obtain approval from the City of Solana Beach Engineering and Marine Safety Departments regarding the use and timing of the Fletcher Cove parking lot and beach access ramp for all construction related access, staging and parking issues if such use becomes required.
- XXV. Pursuant to SBMC Section 7.34.100, Construction hours are limited to 7:00 a.m. to 7:00 p.m., Monday through Friday, and 8:00 a.m. to 7:00 p.m. on Saturday. No work is allowed on Sunday or holidays unless specifically approved pursuant to SBMC Section 7.34.100.B. Engines shall not be started, no construction-related materials shall be moved, or any other construction-related activities occur outside these hours. Work is not permitted on the beach on Saturdays without the written approval of the City Manager.

Prior to Final Inspection of the project, the Applicant shall:

- I. Submit certification to the City Engineer from the Geotechnical Engineer and the Civil Engineer of Record for the project that they

have inspected the project and certify that it was constructed per the approved plan, specifying the date of the plan.

- II. The applicant and/or contractor shall repair any damage caused to the Solana Beach property and facilities, including but not limited to, Fletcher Cove ramp and parking lot to the satisfaction of the City Engineer.

The Applicant shall provide for and adhere to the following Conditions:

- I. All development on the site shall substantially conform to the final Conditional Use Permit Plan approved by the City Council.
- II. The property owner shall be responsible to immediately remove, in perpetuity, any graffiti or other markings should they appear on the project exterior face. If erosion exposes the steel rebar, the Applicant or their successor in interest shall arrange to apply a sculptor-coat of concrete over the exposed steel to match the natural bluff. The property owner shall be responsible for the removal of the structure or any portion thereof.
- III. If requested by the City Manager or his designee, the property owner or their successor in interest shall install and maintain signage about unstable bluffs fronting their property.
- IV. The applicant shall provide "As-Built" plans and all certifications required to the City, before the City will release the performance bond as indicated in condition 1.XII.

C. City Council Condition:

- I. N/A.

6. **ENFORCEMENT:** Pursuant to SBMC 17.72.120(B) failure to satisfy any and all of the above-mentioned conditions of approval is subject to the imposition of penalties as set forth in SBMC Chapters 1.1.6 and 1.18 in addition to any applicable revocation proceedings.
7. **EXPIRATION:** The Development Review Permit for the project will expire 24 months from the date of authorization from the California Coastal Commission in the form of a Coastal Development Permit, Waiver, or Exemption unless the Applicant has obtained a Grading Permit and commenced construction prior to that date, and diligently pursued construction to completion. An extension of the application may be granted by the City Council.
8. **INDEMNIFICATION AGREEMENT:** The Applicant shall defend, indemnify, and hold harmless the City, its agents, officers, and employees from any and all claims,

actions, proceedings, damages, judgments, or costs, including attorney’s fees, against the City or its agents, officers, or employees, relating to the issuance of this permit including, but not limited to, any action to attack, set aside, void, challenge, or annul this development approval and any environmental document or decision. The City will promptly notify Applicant of any claim, action, or proceeding. The City may elect to conduct its own defense, participate in its own defense, or obtain independent legal counsel in defense of any claim related to this indemnification. In the event of such election, Applicant shall pay all of the costs related thereto, including without limitation reasonable attorney’s fees and costs. In the event of a disagreement between the City and Applicant regarding litigation issues, the City shall have the authority to control the litigation and make litigation related decisions, including, but not limited to, settlement or other disposition of the matter. However, the Applicant shall not be required to pay or perform any settlement unless such settlement is approved by Applicant.

- 9. NOTICE TO APPLICANT: Pursuant to Government Code Section 66020, you are hereby notified that the 90-day period to protest the imposition of the fees, dedications, reservations or other exactions described in this resolution commences on the effective date of this resolution. To protest the imposition of any fee, dedications, reservations or other exactions described in this resolution you must comply with the provisions of Government Code Section 66020. Generally the resolution is effective upon expiration of the tenth day following the date of adoption of this resolution, unless the resolution is appealed or called for review as provided in the Solana Beach Zoning Ordinance.

PASSED AND ADOPTED at a regular meeting of the City Council of the City of Solana Beach, California, held on the 10th day of January, 2024, by the following vote:

 - DRAWINGS INDICATE GENERAL AND TYPICAL DETAILS OF CONSTRUCTION. WHERE CONDITIONS ARE NOT SPECIFICALLY INDICATED BUT ARE OF SIMILAR CHARACTER TO DETAILS SHOWN, USE SIMILAR DETAILS OF CONSTRUCTION, SUBJECT TO REVIEW BY THE ENGINEER.
 - DETAILS ON SHEETS TITLED "TYPICAL DETAILS" APPLY TO SITUATIONS OCCURRING ON THE PROJECT THAT ARE THE SAME OR SIMILAR TO THOSE SPECIFICALLY REFERENCED. SUCH DETAILS ARE NOT NOTED AT EACH LOCATION THAT THEY OCCUR.
 - DO NOT SCALE THE DRAWINGS.
 - PROVIDE MEASURES NECESSARY TO PROTECT THE STRUCTURE DURING CONSTRUCTION. SUCH MEASURES INCLUDE, BUT MAY NOT BE LIMITED TO, BRACING AND SHORING FOR LOADS DURING CONSTRUCTION. RETAIN A REGISTERED CIVIL ENGINEER WHO IS PROPERLY QUALIFIED TO DESIGN BRACING, SHORING, ETC. VISITS TO THE SITE BY THE ENGINEER WILL NOT INCLUDE OBSERVATION OF THE ABOVE NOTED ITEMS.
 - INFORMATION SHOWN ON THE DRAWINGS RELATED TO EXISTING CONDITIONS REPRESENTS THE PRESENT KNOWLEDGE, BUT WITHOUT GUARANTEE OF ACCURACY. REPORT CONDITIONS THAT CONFLICT WITH THE CONTRACT DOCUMENTS TO THE ENGINEER. DO NOT DEVIATE FROM THE CONTRACT DOCUMENTS WITHOUT WRITTEN DIRECTION FROM THE ENGINEER.
 - THE CONTRACTOR IS SOLELY RESPONSIBLE FOR PROVIDING A SAFE PLACE TO WORK AND MEETING THE REQUIREMENTS OF ALL APPLICABLE JURISDICTIONS. EXECUTE WORK TO ENSURE THE SAFETY OF PERSONS AND ADJACENT PROPERTY AGAINST DAMAGE BY FALLING DEBRIS AND OTHER HAZARDS IN CONNECTION WITH THIS WORK.
 - NOTWITHSTANDING THE MINIMUM STANDARDS SET FORTH IN THE EXCAVATION AND GRADING CODE, AND NOTWITHSTANDING THE APPROVAL OF THESE GRADING PLANS, THE PERMITEE IS RESPONSIBLE FOR THE PREVENTION OF DAMAGE TO THE ADJACENT PROPERTY. NO PERSON SHALL EXCAVATE ON LAND SO CLOSE TO THE PROPERTY LINE AS TO ENDANGER ANY ADJOINING PUBLIC STREET, SIDEWALK, ALLEY, FUNCTION OF ANY SEWAGE DISPOSAL SYSTEM, OR ANY OTHER PUBLIC OR PRIVATE PROPERTY WITHOUT SUPPORTING AND PROTECTING SUCH PROPERTY FROM SETTLING, CRACKING, EROSION, SILTING SCOUR OR OTHER DAMAGE WHICH MIGHT RESULT FROM THE GRADING DESCRIBED IN THIS PLAN. THE CITY WILL HOLD THE PERMITEE RESPONSIBLE FOR CORRECTION ON NON-DEDICATED IMPROVEMENTS, WHICH DAMAGE ADJACENT PROPERTY.
 - THE DESIGN IS BASED ON ANTICIPATED SOIL CONDITIONS ON THE BASIS OF THE BORINGS AND SOIL REPORT PREPARED BY SOIL ENGINEERING CONSTRUCTION, TITLED "UPDATED GEOTECHNICAL RECOMMENDATIONS - PROPOSED MAINTENANCE REPAIRS EXISTING LOWER BLUFF SEAWALL & SOUTH PROPERTY LINE UPPER BLUFF CAISSON SYSTEM", DATED FEBRUARY 8, 2023. IF THE ACTUAL FIELD CONDITIONS VARY FROM THE ASSUMED CONDITIONS, ADJUSTMENTS WILL BE MADE AT THE DIRECTION OF THE GEOTECHNICAL ENGINEER AND THE STRUCTURAL ENGINEER.
 - ELEVATIONS SHOWN ARE FROM THE ORIGINAL DRAWINGS. VERIFY IN FIELD & NOTIFY ENGINEER OF ANY DISCREPANCIES BEFORE PROCEEDING.

- II. SUBMITTALS**
- SUBMIT REQUIRED SUBMITTALS TO THE ENGINEER FOR REVIEW.
 - CONCRETE REINFORCING STEEL:
 - SHOP DRAWINGS FOR FABRICATION, BENDING AND PLACEMENT OF CONCRETE REINFORCEMENT IN ACCORDANCE WITH ACI 315 'DETAILS AND DETAILING OF CONCRETE REINFORCEMENT'.
 - CAST-IN-PLACE CONCRETE: MIX DESIGNS PREPARED, STAMPED AND SIGNED BY A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF CALIFORNIA FOR EACH CLASS OF CONCRETE. INCLUDE RESULTS OF SLUMP, SHRINKAGE AND COMPRESSION TESTS USED TO ESTABLISH MIX PROPORTIONS AND CERTIFIED MATERIAL CERTIFICATES FOR EACH COMPONENT OF THE MIX.
 - PROPOSED CONSTRUCTION JOINT AND CONTROL JOINT LOCATIONS FOR REVIEW.
 - PRODUCT DATA FOR CURING MATERIALS.
 - PRODUCT DATA FOR NON-SHRINK GROUT.
 - SHOTCRETE:
 - MIX DESIGNS PREPARED, STAMPED AND SIGNED BY A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF CALIFORNIA FOR EACH CLASS OF CONCRETE. INCLUDE RESULTS OF SLUMP, SHRINKAGE AND COMPRESSION TESTS USED TO ESTABLISH MIX PROPORTIONS AND CERTIFIED MATERIAL CERTIFICATES FOR EACH COMPONENT OF THE MIX.
 - PROPOSED CONSTRUCTION JOINT AND CONTROL JOINT LOCATIONS FOR REVIEW.
 - PRODUCT DATA FOR CURING MATERIALS.
 - STRUCTURAL STEEL:
 - SHOP DRAWINGS PRIOR TO FABRICATION IN ACCORDANCE WITH AISC 303 'CODE OF STANDARD PRACTICE FOR STEEL BUILDINGS AND BRIDGES'.
 - SUBMIT WELDING PROCEDURE SPECIFICATION (WPS) PER AWS D1.1 FOR EACH TYPE OF WELD TO BE USED ON THE PROJECT AND PRODUCT DATA FOR WELDING ELECTRODES, CLEARLY IDENTIFYING LOCATIONS FOR USE OF ELECTRODES.
 - ADHESIVE ANCHORS:
 - PRODUCT DATA FOR EACH TYPE OF ADHESIVE ANCHORING SYSTEM USED.
 - SEQUENCING PLAN FOR ALL WORK, INCLUDING DEMOLITION AND COLUMN SHORING, INDICATING SEQUENTIAL AND CONCURRENT OPERATIONS.
 - SHOP DRAWINGS FOR ALL TIEBACKS INDICATING THE ASTM MATERIAL DESIGNATIONS, MEMBER DIMENSIONS, INSTALLATION PROCEDURES, EMBEDMENT DEPTHS, DESIGN LOADS, AND CONNECTION DETAILS.
 - CERTIFIED MILL TEST REPORTS FOR EACH OF THE FOLLOWING:
 - EACH HEAT OF TIEBACK.
 - TEST DATA CERTIFYING THAT TIEBACK HAS SUITABLE PHYSICAL PROPERTIES TO FULLY DEVELOP THE MINIMUM GUARANTEED ULTIMATE TENSILE STRENGTH OF THE TIEBACK.

- III. FORMWORK**
- DESIGN AND CONSTRUCT FORMWORK IN ACCORDANCE WITH ACI 347 'RECOMMENDED PRACTICE FOR CONCRETE FORMWORK' AND ACI 301 'SPECIFICATIONS FOR STRUCTURAL CONCRETE' UNLESS OTHERWISE NOTED.
 - PROVIDE POUR POCKETS IN FORMS AND UNDER EXISTING STRUCTURAL MEMBERS AS REQUIRED TO PREVENT AIR POCKETS AND/OR 'HONEYCOMB' UNDER OR AROUND THE EXISTING MEMBERS. CONCRETE CAST WITH AIR POCKETS AND/OR 'HONEYCOMB' UNDER OR AROUND THE MEMBERS IS NOT ACCEPTABLE.
 - PROVIDE 3/4 INCH x 3/4 INCH CHAMFER STRIPS ON ALL EXTERNAL CORNERS OF BEAMS, COLUMNS AND WALLS, UNLESS OTHERWISE NOTED.
 - REMOVE FORMS AND SHORES IN ACCORDANCE WITH THE FOLLOWING:

LOCATION	REMOVE NO SOONER THAN
BOTTOM FORMS AND SHORES FOR MILDLY REINFORCED SLABS, BEAMS AND GIRDETS SIDE FORMS FOR BEAMS AND GIRDETS	72 HOURS
COLUMNS AND WALLS	72 HOURS
FOOTINGS AND GRADE BEAMS	48 HOURS
 - PROVIDE CURING WHERE FORMS ARE REMOVED IN LESS THAN 7 DAYS.
 - FOAM FILL: ASTM C578, EXPANDED POLYSTYRENE (EPS) WITH MINIMUM COMPRESSIVE STRENGTH OF 40 PSI AT 10% DEFORMATION.

- IV. REINFORCING STEEL**
- FABRICATE AND PLACE REINFORCING STEEL IN ACCORDANCE WITH ACI 315 'DETAILS AND DETAILING OF CONCRETE REINFORCEMENT' AND ACI 301 'SPECIFICATIONS FOR STRUCTURAL CONCRETE', UNLESS OTHERWISE NOTED.
 - REINFORCING TO CONFORM TO THE FOLLOWING, UNLESS OTHERWISE NOTED:

REINFORCING STEEL #5 AND SMALLER	TYPE
#5 AND LARGER & BARS TO BE WELDED	ASTM A615, 60 KSI
HIGH STRENGTH REINF WHERE NOTED ON DWGS	ASTM A706, 60 KSI
1/2 INCH DIAMETER LOW RELAXATION SEVEN-WIRE POST-TENSIONING STRAND	ASTM A416, 270 KSI
WELDED STEEL WIRE FABRIC	ASTM A185, 70 KSI
SMOOTH DOWELS IN SLAB ON GRADE	ASTM A36, 36 KSI
 - ACCURATELY POSITION, SUPPORT, AND SECURE REINFORCEMENT FROM DISPLACING DUE TO FORMWORK, CONSTRUCTION, OR CONCRETE PLACEMENT OPERATIONS. LOCATE AND SUPPORT REINFORCING BY METAL CHAIRS, RUNNERS, BOLSTERS, SPACERS, AND HANGERS AT A MAXIMUM 3-FOOT SPACING.
 - MECHANICAL COUPLERS: TYPE 2 PER ACI-318, UNLESS OTHERWISE NOTED.
 - WELD REINFORCING STEEL IN ACCORDANCE WITH AWS D1.4 USING QUALIFIED WELDERS.
 - TERMINATE REINFORCING STEEL IN STANDARD HOOKS, UNLESS OTHERWISE SHOWN.
 - ALL STEEL REINFORCEMENT TO EPOXY COATED.

- V. EPOXY-COATED REINFORCEMENT**
- REINFORCEMENT SHALL BE SHOP FABRICATED PRIOR TO COATING AND SHALL CONFORM TO THE REQUIREMENTS OF AASHTO M 284.
 - VISIBLE VOIDS IN THE COATING, REGARDLESS OF CAUSE, SHALL BE PATCHED IF THE TOTAL AREA OF VOIDS EXCEEDS 0.25% OF THE SURFACE AREA OF THE BAR. BARS THAT REQUIRE SURFACE PATCHING LESS THAN 5% OF THE TOTAL SURFACE AREA OF THE BAR MAY BE FIELD COATED WITH AN APPROVED PATCH MATERIAL SUPPLIED BY THE EPOXY FABRICATOR. BARS WHICH REQUIRE SURFACE PATCHING IN EXCESS OF 5% OF THE TOTAL SURFACE AREA OF THE BAR WILL BE REJECTED.
 - ALL SYSTEMS FOR HANDLING COATED BARS SHALL HAVE PADDED CONTACT AREAS FOR THE BARS WHENEVER POSSIBLE. ALL BUNDLING BANDS SHALL BE PADDED AND ALL BUNDLES SHALL BE LIFTED WITH STRONG BACK, MULTIPLE SUPPORTS OR A PLATFORM BRIDGE SO AS TO PREVENT BAR-TO-BAR ABRASION FROM SAGS IN THE BAR BUNDLE.
 - ALL STEEL REINFORCEMENT TO BE EPOXY COATED.

- VI. CAST-IN-PLACE CONCRETE**
- PROPORTION, MIX, TRANSPORT AND PLACE CAST-IN-PLACE CONCRETE IN ACCORDANCE WITH ACI 301 'SPECIFICATIONS FOR STRUCTURAL CONCRETE' UNLESS OTHERWISE NOTED.
 - CONCRETE IS REINFORCED AND CAST-IN-PLACE UNLESS OTHERWISE NOTED. WHERE REINFORCING IS NOT SPECIFICALLY SHOWN OR WHERE DETAILS ARE NOT GIVEN, PROVIDE REINFORCING SIMILAR TO THAT SHOWN FOR SIMILAR CONDITIONS, SUBJECT TO REVIEW BY THE OWNER'S REPRESENTATIVE.
 - ROUGHEN CONCRETE SURFACES OF CONSTRUCTION JOINTS TO 1/4 INCH AMPLITUDE AND CLEAN OF LAITANCE, FOREIGN MATTER, AND LOOSE PARTICLES AT THE FOLLOWING LOCATIONS [WHERE CAST AGAINST EXISTING CONCRETE, AT WALL, COLUMN AND BEAM JOINTS, WHERE CAST EXISTING MASONRY/STONE, ETC.]
 - REFER TO ARCHITECTURAL AND MECHANICAL DRAWINGS FOR LOCATIONS OF ADDITIONAL CONCRETE CURBS AND HOUSEKEEPING PADS NOT SHOWN.
 - CONCRETE CLEAR COVER TO REINFORCING BARS IS AS FOLLOWS, UNLESS OTHERWISE NOTED:

LOCATION	CLEAR COVER
CONCRETE PLACED AGAINST EARTH FORMED SURFACES EXPOSED TO WEATHER OR IN CONTACT WITH EARTH: #6 BARS AND LARGER	2 INCHES
#5 BARS AND SMALLER	1 1/2 INCHES
SLABS ON GRADE (TOP CLEARANCE) BEAMS, GIRDETS AND COLUMNS NOT EXPOSED TO WEATHER OR EARTH WALL OR SLAB SURFACES NOT EXPOSED TO WEATHER OR EARTH	1 1/2 INCHES
#5 & SMALLER	3/4 INCH
#6 & #7	1 INCH
#8, #9, #10 & #11	1 1/2 INCHES
#14 & #18	2 1/2 INCHES

- CONCRETE TYPES:**
- SEAWALL AND BLUFF INFILL AND STAIR COLUMNS:
 - 28-DAY STRENGTH: F_c = 5,000 PSI
 - TYPE: NORMAL WEIGHT
 - WATER-CEMENT RATIO: 0.40 MAX
 - WATER-SOLUBLE CHLORIDE ION CONTENT IN CEMENT: 0.15 MAX
 - WATER-SOLUBLE CHLORIDE ION CONTENT THAT IS CONTRIBUTED FROM THE INGREDIENTS INCLUDING WATER, AGGREGATES, CEMENTITIOUS MATERIALS, AND ADMIXTURES SHALL BE DETERMINED ON THE CONCRETE MIXTURE BY ASTM C1218 AT AGE BETWEEN 28 AND 42 DAYS.
 - DRYING SHRINKAGE: PER ASTM C192 & C157, MEASURED AT 28 DAYS AIR DRY AGE.
 - TYPICAL: 0.050 MAXIMUM.
 - PROVIDE SHRINKAGE REDUCING ADMIXTURE WHEN SHRINKAGE TEST DATA NOT AVAILABLE.
 - FLY ASH: ASTM C618, CLASS F. MINIMUM OF [2] PERCENT OF CEMENTITIOUS MATERIAL BY WEIGHT.
 - ADMIXTURES TO BE COMPATIBLE WITH ALL OTHER COMPONENTS IN THE MIX AND INCLUDED IN THE MIX DESIGN. WHEN USED COMPLY THE FOLLOWING:
 - AIR ENTRAINMENT: ASTM C260.
 - WATER REDUCING, RETARDING AND ACCELERATING: ASTM C494, TYPES A THROUGH G.
 - SHRINKAGE REDUCING: ASTM C494 & ASTM C157.
 - CONTINUOUSLY MOIST CURE CONCRETE SLABS ON GRADE FOR 7 DAYS MINIMUM USING WATER FOG SPRAYS, PONDING, SATURATED ABSORPTIVE COVERS OR MOISTURE RETAINING COVERS.
 - LIQUID CURING COMPOUND: ASTM C309, TYPE1, CLEAR OR TRANSLUCENT.
 - FOR SURFACES TO BE FINISHED, CONFIRM THAT CURING COMPOUND IS COMPATIBLE WITH FINISH.
 - NON-SHRINK GROUT: ASTM C1107, WITH MINIMUM COMPRESSIVE STRENGTH OF 7,000 PSI.

- VII. SHOTCRETE**
- PROPORTION, MIX, TRANSPORT AND PLACE SHOTCRETE IN ACCORDANCE WITH ACI 506.2 'SPECIFICATION FOR SHOTCRETE' U.O.N. TOLERANCES FOR SHOTCRETE TO CONFORM TO ACI 117 'STANDARD SPECIFICATION FOR TOLERANCES FOR CONCRETE CONSTRUCTION AND MATERIALS' FOR CAST-IN-PLACE CONCRETE.
 - USE SHOTCRETE ONLY WHERE DESIGNATED ON THE DRAWINGS. NO SUBSTITUTION OF SHOTCRETE FOR CAST-IN-PLACE CONCRETE IS ALLOWED.
 - COMPLY WITH THE REQUIREMENTS OF THE CAST-IN-PLACE CONCRETE AND REINFORCING STEEL SECTIONS OF THESE GENERAL NOTES, EXCEPT AS MODIFIED IN THIS SECTION.
 - SHOTCRETE TYPES:

LOCATION	28-DAY STRENGTH
SEAWALL	5,000 PSI
 - MAXIMUM AGGREGATE SIZE: 3/8 INCH.
 - MEAN CORE GRADE PER ACI 506.2: 2.5.
 - A PREQUALIFICATION TEST PANEL IS REQUIRED FOR EACH NOZZLEMAN. EACH TEST PANEL TO BE 4 FEET BY 4 FEET BY 8 INCHES THICK AND TO HAVE REINFORCING STEEL SIMILAR TO THE MOST CONGESTED CONDITION ON THE PROJECT. A MEAN TEST PANEL CORE GRADE IS REQUIRED FOR EACH NOZZLEMAN.
 - CLEAN SUBSTRATES AND FORMS OF LOOSE OR UNSOUND MATERIAL PRIOR TO THE PLACEMENT OF SHOTCRETE. WET CEMENTITIOUS OR ABSORPTIVE SUBSTRATES AND FORMS PRIOR TO SHOOTING. DO NOT PLACE SHOTCRETE AGAINST SURFACES WITH STANDING OR RUNNING WATER.
 - COMPLETELY FILL AREAS AND COMPLETELY ENCASE REINFORCEMENT. REMOVE REBOUND AND OTHER LOOSE MATERIAL FROM NEW CONSTRUCTION.
 - DO NOT REUSE REBOUND OR OVERSPRAY.
 - FINISHED APPEARANCE / COSMETIC SHOTCRETE: IT IS THE INTENT OF THESE SPECIFICATIONS THAT THE COMPLETED FACING COSMETIC SHOTCRETE ON ANCHORED WALLS HAVE AN UNEVEN SURFACE PROFILE AND COLOR SIMILAR IN APPEARANCE TO THAT OF THE ADJACENT BLUFFS.
 - KEEP SHOTCRETE CONTINUOUSLY MOIST BY DIRECT WATER APPLICATION FOR 24 HOURS AFTER SHOOTING. FOLLOW BY CURING THE SHOTCRETE WITH A FOG SPRAY OR AN APPROVED MOISTURE-RETAINING COVER, MEMBRANE, OR CURING COMPOUND UNTIL 7 DAYS AFTER SHOOTING.
 - LIQUID CURING COMPOUND: ASTM C309, TYPE1, CLEAR OR TRANSLUCENT.
 - FOR SURFACES TO BE FINISHED, CONFIRM THAT CURING IS COMPATIBLE WITH FINISH.
 - APPLY AT TWICE THE MANUFACTURER'S RECOMMENDED COVERAGE.

- VIII. STRUCTURAL STEEL**
- FABRICATE AND ERECT STRUCTURAL STEEL IN ACCORDANCE WITH AISC 360, AISC 303 AND AISC 340. WELDED CONNECTIONS TO CONFORM TO AWS D1.1 AND D1.8.
 - STRUCTURAL STEEL TO CONFORM TO THE FOLLOWING UNLESS OTHERWISE NOTED:

SECTIONS	TYPE
ROLLED SHAPES	ASTM A992
WIDE FLANGES CHANNELS, ANGLES, & OTHER PLATES:	ASTM A36
COLUMN BASE PLATES	ASTM A572, GR 50
BRACE GUSSET PLATES	ASTM A572, GR 50
BEAM SHEAR CONNECTION PLATES	ASTM A572, GR 50
COLUMN CONTINUITY PLATES	ASTM A572, GR 50
BEAM STIFFENER PLATES	ASTM A36
EDGE OF DECK BENT PLATE OTHER	ASTM A36
STEEL PIPE	ASTM A572, GR 50
COLD FORMED STRUCTURAL TUBING (HSS)	ASTM A500 GRADE B
STAINLESS STEEL SHAPES, PLATES & BARS	ASTM A276, TYPE 304L
BOLTS	ASTM F3125 GRADE A325X, F1852X
MACHINE BOLTS	ASTM A307, GRADE A
STAINLESS STEEL BOLTS	ASTM A193 B8M, CLASS 1
ANCHOR RODS	ASTM F1554, GR55 W/WELDABLE SUPPLEMENT S1
ALL-THREAD ROD AND THRU BOLTS	ASTM A36/A572, GR50
HIGH STRENGTH ALL-THREAD ROD	ASTM A193 B7, GR105
STAINLESS STEEL ALL-THREAD ROD	ASTM A193 B8M CLASS 2
HANGER ROD	ASTM A572, GR50
WELDED SHEAR STUD CONNECTORS	ASTM A108, GRADE 1015 TO1020
WELDED THREADED STUDS	ASTM A108, GRADE 1015 TO1020
NUTS FOR BOLTS AND MACHINE BOLTS	ASTM A563
STAINLESS STEEL NUTS	ASTM A194 GR8M
HARDENED WASHERS FOR BOLTS	ASTM F436
UNHARDENED FLAT WASHERS	ASTM F844, ANSI B18 22.1
STAINLESS STEEL WASHERS	ASTM A276, TYPE 304
BEVELED WASHERS	ANSI B18.23.1
 - HOT DIP GALVANIZE IN ACCORDANCE WITH ASTM A123 AND ASTM A153 STRUCTURAL STEEL AND FASTENERS. REPAIR GALVANIZING AFTER WELDING IN ACCORDANCE WITH ASTM A780. HOT-DIP GALVANIZE ASTM F1554 RODS IN ACCORDANCE WITH ASTM F2329.

- ARC-WELDING ELECTRODES/FILLER METALS TO BE LOW HYDROGEN TYPES E70TXX, E7XTXX OR E70XXX MINIMUM AS APPLICABLE. ELECTRODES WITH CHARPY V-NOTCH TESTS VALUES OF A MINIMUM 20 FOOT-POUNDS AT 0 DEGREES FAHRENHEIT AND 40 FOOT-POUNDS AT 70 DEGREES FAHRENHEIT ARE TO BE USED AT ALL WELDS OF THE SEISMIC FORCE RESISTING SYSTEM (SFRS), WHERE DESIGNATED 'DC' ON THE DRAWINGS AND THE FOLLOWING LOCATIONS:
 - COMPLETE JOINT PENETRATION WELDS.
 - BEAM TO COLUMN MOMENT CONNECTIONS - INCLUDING FLANGE, WEB, DOUBLER PLATES, BASE PLATES, AND CONTINUITY PLATE FILLET AND PARTIAL JOINT PENETRATION WELDS.
 - BRACE CONNECTIONS - INCLUDING BRACE, GUSSET, BASE PLATES, BEAM STIFFENER PLATES, AND CONTINUITY PLATE FILLET AND PARTIAL JOINT PENETRATION WELDS.
 - COLLECTORS - SHEAR TABS, FLANGE AND WEB WELDS.
 - WELDERS TO BE QUALIFIED IN ACCORDANCE WITH AWS D1.1 WITH SUPPLEMENTAL QUALIFICATIONS PER AWS D1.8.
 - WHERE FIELD WELDING IS NOTED, THE DESIGNATION IS GIVEN AS A SUGGESTED CONSTRUCTION PROCEDURE ONLY.
- IX. ADHESIVE ANCHORS AND DOWELS**
- ANCHORS AND DOWELS INSTALLED INTO CONCRETE: HILTI HIT-RE-500-V3 (ICC-ESR-3814), SIMPSON STRONG-TIE SET-3G (ICC-ESR-4057) OR DEWALT PURE 110+ (ICC-ESR-3298). ALL EMBEDMENT DEPTHS NOTED ON DRAWINGS ARE EFFECTIVE EMBEDMENT PER MANUFACTURER.
 - THE TESTING LABORATORY IS TO PERFORM TENSION TESTS ON 10% OF ANCHORS AND DOWELS INSTALLED INTO CONCRETE TO THE FOLLOWING TEST LOADS:

ROD DIA OR BAR SIZE	CMIN	TEST LOAD (LBS)	
		ANCHOR LOCATED > CMIN & < 12" FROM EDGE	ANCHOR LOCATED ≥ 12" FROM EDGE
3/8", #3	2"	1,300	1,600
1/2", #4	2 1/2"	2,000	3,400
5/8", #5	3"	2,800	4,200
3/4", #6	4"	3,700	5,000
7/8", #7	4 1/2"	3,700	5,000
1", #8	5"	4,800	6,100

- ANCHORS AND DOWELS INSTALLED INTO UNREINFORCED BRICK MASONRY (URM): HILTI-HY 270 (ICC-ESR-4144), SIMPSON STRONG-TIE SET (ICC-ESR-1772), OR DEWALT AC100+ GOLD (ICC-ESR-4105). USE SCREENS AS SPECIFIED BY THE MANUFACTURER.
- ANCHORS: ASTM A36 THREADED RODS WITH ASTM A563 GRADE A NUTS AND ANSI B18 22.1 TYPE A WASHERS, UNLESS OTHERWISE NOTED. ANCHORS DESIGNATED AS ASTM A193 GRADE B7 THREADED RODS TO USE ASTM A563 GRADE DH HEAVY HEX NUTS AND ASTM F436 WASHERS.
- REBAR DOWELS: ASTM A615 GRADE 60 REINFORCING STEEL.
- INSTALL ANCHORS IN ACCORDANCE WITH LATEST ICC-ESR REPORT AND MANUFACTURER INSTRUCTIONS.
- IF REINFORCEMENT IS ENCOUNTERED DURING DRILLING, ABANDON AND SHIFT THE HOLE LOCATION TO AVOID THE REINFORCEMENT. PROVIDE A MINIMUM OF 2 ANCHOR DIAMETERS OR 1 INCH, WHICHEVER IS LARGER, OF SOUND CONCRETE BETWEEN THE DOWEL AND THE ABANDONED HOLE. FILL THE ABANDONED HOLE WITH NON-SHRINK GROUT. IF THE ANCHOR OR DOWEL MAY NOT BE SHIFTED AS NOTED ABOVE, THE ENGINEER WILL DETERMINE A NEW LOCATION.
- LOCATE REINFORCEMENT AND CONFIRM FINAL ANCHOR LOCATIONS PRIOR TO FABRICATING PLATES, MEMBERS, OR OTHER STEEL ASSEMBLIES ATTACHED WITH ADHESIVE ANCHORS.

- X. EROSION CONTROL NOTES**
- STORM WATER AND NON-STORM WATER DISCHARGE CONTROL: BEST MANAGEMENT PRACTICES SHALL BE DEVELOPED AND IMPLEMENTED TO MANAGE STORM WATER AND NON-STORM WATER DISCHARGES FROM THE SITE AT ALL TIMES DURING EXCAVATION AND GRADING ACTIVITIES.
 - EROSION AND SEDIMENT CONTROL: EROSION PROTECTION SHALL BE EMPHASIZED AS THE MOST IMPORTANT MEASURE FOR KEEPING SEDIMENT ON SITE DURING EXCAVATION AND GRADING ACTIVITIES. SEDIMENT CONTROLS SHOULD BE USED AS A SUPPLEMENT TO EROSION PREVENTION FOR KEEPING SEDIMENT ON SITE.
 - THE TOPS OF ALL SLOPES SHALL BE DIKED OR TRENCHED TO PREVENT WATER FLOWING OVER CRESTS OF SLOPES.
 - THE CONTRACTOR SHALL REPAIR ANY ERODED SLOPES AS DIRECTED BY THE OFFICE OF THE CITY ENGINEER.
 - THE CONTRACTOR SHALL SWEEP ROADWAYS AND ENTRANCES TO AND FROM THE SITE ON A REGULAR BASIS TO KEEP THEM FREE OF SOIL ACCUMULATION AND AT ALL OTHER TIMES DIRECTED BY THE CITY ENGINEER.
 - THE CONTRACTOR SHALL WATER SITE ON A CONTINUOUS BASIS TO MINIMIZE AIR BORNE DUST CREATED FROM GRADING AND HAULING OPERATIONS OR EXCESSIVE WIND CONDITIONS, AND AT ALL TIMES DIRECTED BY THE CITY ENGINEER.
 - IN THE EVENT SILT DOES ENTER THE EXISTING PUBLIC STORM DRAIN SYSTEM, REMOVAL OF THE SILT FROM THE SYSTEM WILL BE AT THE CONTRACTOR'S EXPENSE.

------------------------------	--	------------------------------	--	--	--	---	--	--	--	---	--	--	--	--	--

GENERAL NOTES CONT:

XI. PERMANENT TIEBACKS

1. PERMANENT TIEBACK RODS SHALL BE COLD STRETCHED HIGH STRENGTH ALLOY THREADED STEEL BARS (THREADBARS) FABRICATED FROM STEEL CONFORMING TO ASTM A722 WITH A MINIMUM ULTIMATE TENSILE STRENGTH OF 150,000 PSI (REGULAR GRADE DWYDAG BARS). THE UNBONDED LENGTH SHALL BE COVERED IN A SMOOTH PLASTIC SHEATHING, SUCH AS PVC OR POLYETHYLENE, TO PREVENT BONDING. RODS SHALL BE FULL LENGTH WITHOUT SPLICES OR COUPLERS, UNKINKED, AND FREE FROM NICKS OR ABRASIONS.
2. PERMANENT TIEBACK STRANDS SHALL BE EPOXY COATED, EPOXY-FILLED IN THE INTERSTICES BETWEEN THE STRAND WIRES, GRIT-IMPREGNATED, 0.6-INCH NOMINAL DIAMETER LOW-RELAXATION STRAND, CONSISTING OF 7 STRESS-RELIEVED STEEL WIRES. THE STRAND SHALL BE IN ACCORDANCE WITH ASTM A882. THE STEEL STRAND BENEATH THE COATING SHALL HAVE A MINIMUM ULTIMATE TENSILE STRENGTH OF 270 KSI, IN ACCORDANCE WITH ASTM A416, PLUS SUPPLEMENTS FOR LOW-RELAXATION WIRE AND LOW-RELAXATION STRAND. WIRES SHALL BE FULL LENGTH WITHOUT SPLICES OR COUPLERS, UNKINKED, AND FREE FROM NICKS OR ABRASIONS. USE FLOFIL STRANDS, SUPPLIED BY INSTEEL INDUSTRIES, INC., OR APPROVED EQUIVALENT FOR PERMANENT TIEBACKS.
3. PERMANENT TIEBACK ASSEMBLIES SHALL BE DOUBLE CORROSION PROTECTED OVER THE ENTIRE LENGTH OF THE ANCHOR. DOUBLE CORROSION PROTECTION SHALL CONSIST OF EPOXY COATED BARS, OR EPOXY COATED/FILLED STRANDS, IN CONTINUOUS GROUT, OVER THE UNBONDED LENGTH THE BARS/STRANDS SHALL BE INDIVIDUALLY GREASED AND SHEATHED TO PREVENT BONDING. CORRUGATED PE SHEATHING SHALL BE PROVIDED OVER THE LENGTH OF THE TIEBACK.
4. ANCHORAGES SHALL BE CAPABLE OF DEVELOPING NO LESS THAN 95% OF THE MINIMUM ULTIMATE TENSILE STRENGTH OF THE TENDONS, AND SHALL CONFORM TO THE STATIC STRENGTH REQUIREMENTS OF THE PTI 'GUIDE SPECIFICATION FOR POST-TENSIONING MATERIALS.' AT BARS, ANCHOR HEADS SHALL BE DESIGNED TO ACCEPT THE BAR LOADS AND TRANSFER THE ENTIRE LOAD ONTO THE BEARING PLATE. AT STRANDS, ANCHOR HEADS SHALL BE DESIGNED TO ACCEPT INDIVIDUAL STRAND LOADS, SEAT THE WEDGES, AND TRANSFER THE ENTIRE TENDON LOAD ONTO THE BEARING PLATE.
5. WEDGES FOR STRAND TIEBACKS SHALL BE BITE-THROUGH WEDGES, SPECIFICALLY DESIGNED AND MANUFACTURED FOR EPOXY COATED STRAND. REMOVAL OF EPOXY COATING TO ACCOMMODATE CONVENTIONAL WEDGES IS NOT ALLOWED.
6. CENTRALIZERS AND SPACERS SHALL BE STEEL OR PLASTIC. WOOD SHALL NOT BE USED. CENTRALIZERS SHALL BE DESIGNED TO WITHSTAND LATERAL LOADS FROM THE BARS OR TENDONS. COMBINATION SPACER/CENTRALIZERS ARE ACCEPTABLE. SPACERS AND CENTRALIZERS SHALL NOT RESTRICT THE PASSAGE OF GROUT, AND SHALL BE ATTACHED SO THEY ARE RESTRAINED FROM MOVING UP OR DOWN THE BARS/STRANDS DURING INSTALLATION OR GROUTING.
THE SPACERS AND CENTRALIZERS SHALL MEET THE FOLLOWING ADDITIONAL CRITERIA FOR STRAND TIEBACKS:
 - A. SPACERS SHALL SEPARATE THE TENDON STRANDS SO THAT THE SURFACE OF EACH STRAND CAN BE SURROUNDED BY GROUT AND SO THAT INDIVIDUAL STRANDS HAVE CLEARANCES OF NO LESS THAN 0.5 INCHES FROM EACH OTHER.
 - B. CENTRALIZERS SHALL PROVIDE A MINIMUM 0.5 INCHES OF GROUT COVER BETWEEN THE OUTER PERIMETER ROW OF TENDON STRANDS AND THE BOREHOLE WALL.
 - C. WHERE PE SHEATHING IS PRESENT, CENTRALIZERS SHALL PROVIDE 0.5 INCHES OF GROUT COVER BETWEEN THE STRANDS AND THE SHEATHING AND AT LEAST 0.5 INCHES OF GROUT COVER BETWEEN THE PE SHEATHING AND THE BOREHOLE.
7. ALL METAL COMPONENTS OF THE BARS/STRAND ANCHORAGE SYSTEM SHALL BE COMPATIBLE WITH RESPECT TO THEIR CORROSION POTENTIAL AND THE SOLDIER BEAM CONNECTION.
8. HANDLING, SHIPPING, AND STORAGE SHALL BE CONDUCTED IN A MANNER THAT PROTECTS ALL BARS AND TENDON ASSEMBLIES AND HARDWARE FROM MECHANICAL DAMAGE, ABRASION, CORROSION, CHEMICAL ATTACK, AND DIRT. EACH BARS/TENDON SHALL BE TAGGED AND IDENTIFIABLE AT ALL TIMES. THE CONTRACTOR SHALL PROVIDE PROPER STORAGE FACILITIES ON SITE FOR THE TIME BETWEEN DELIVERY AND INSTALLATION OF BARS/STRANDS AND HARDWARE. STORAGE FACILITIES SHALL BE DRY AND SHALL PROTECT EPOXY-COATED BARS/STRAND FROM EXPOSURE TO SUNLIGHT. IMPROPER HANDLING, SHIPMENT, OR STORAGE WILL BE SUFFICIENT CAUSE FOR REJECTION OF TENDONS.
9. THE BARS/TENDONS SHALL BE HANDLED AND PROTECTED DURING THEIR INSERTION IN THE HOLES IN SUCH A MANNER THAT PREVENTS PHYSICAL DAMAGE AND SHARP BENDS AND PROTECTS THE EPOXY COATING AND OTHER CORROSION PROTECTION ELEMENTS. SPECIAL MEASURES SHALL BE TAKEN TO PREVENT ABRASION OF THE BARS/TENDONS AT THE BOREHOLE COLLAR. FOR STRAND TIEBACKS, EACH TENDON SHALL BE FITTED WITH A PROTECTIVE NOSE CONE PRIOR TO INSERTION TO KEEP INDIVIDUAL STRAND TIPS FROM CATCHING ON THE BOREHOLE WALLS.
10. THE CONTRACTOR SHALL CUT THE BARS/TENDON STRAND LENGTHS PROTRUDING BEYOND THE ANCHOR HEAD. CUTTING OF BARS/TENDON PROTRUSIONS SHALL BE IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS. THE PREFERRED METHOD IS BY ABRASIVE BLADES. USE OF A CUTTING TORCH IS NOT ACCEPTABLE. CARE SHALL BE TAKEN NOT TO DAMAGE THE ANCHOR HEAD HARDWARE PACKAGE. THE EXPOSED CUT ENDS OF THE BARS/STRANDS SHALL BE CORROSION PROTECTED WITH EPOXY MATERIALS PER MANUFACTURER'S RECOMMENDATIONS.
11. STRUCTURAL GROUT FOR TIEBACK HOLES SHALL CONTAIN A MINIMUM OF 10 SACKS OF CEMENT PER CUBIC YARD AND SHALL ATTAIN A MINIMUM COMPRESSIVE STRENGTH OF 4,000 PSI IN 7 DAYS. GROUT SHALL BE PUMPED INTO PLACE FROM THE BACK OF THE HOLE TOWARD THE FRONT. PERMANENT TIEBACKS SHALL BE FULLY GROUTED WITH STRUCTURAL GROUT FROM END TO END.

XII. TIEBACK INSTALLATION

1. TIEBACK DETAILS AND PERFORMANCE SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. THE CONTRACTOR SHALL SELECT MATERIALS AND PROCEDURES SUITABLE FOR THE SITE AND THE PROJECT CONSISTENT WITH THE CONTRACT DOCUMENTS. THE BONDED TIEBACK LENGTHS INDICATED ON THE DRAWINGS ARE FOR GUIDANCE ONLY. THE INDICATED TIEBACK BONDED LENGTHS MAY BE ALTERNATIVELY DETERMINED BASED ON IN SITU TESTING. ULTIMATELY, THE BONDED LENGTHS SHALL BE SUFFICIENT TO DEVELOP THE INDICATED TEST LOADS, AND THE BOREHOLE DIAMETER, ANCHOR LENGTH, INSTALLATION PROCEDURES, CURING TIME, AND ADJUSTMENTS PER ACTUAL FIELD CONDITIONS ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.
2. TIEBACK HOLES SHALL BE EITHER DRILLED WITH CASING OR THE GEOTECHNICAL ENGINEER MAY PERMIT NO CASING BASED ON FIELD OBSERVATIONS. CONTRACTOR TO COORDINATE WITH GEOTECHNICAL ENGINEER REGARDING ALTERNATIVE DRILLING PROCEDURES AT ADVERSE CONDITIONS.
3. HOLES DRILLED FOR TIE-BACK ANCHORS SHALL BE DONE WITHOUT DETRIMENTAL LOSS OF GROUND, SLOUGHING OR CAVING OF MATERIALS, AND WITHOUT ENDANGERING PREVIOUSLY INSTALLED SHORING MEMBERS OR EXISTING FOUNDATIONS.
4. DRILLING SHALL BE PERFORMED WITH CARE IN VICINITY OF POTENTIAL OBSTRUCTIONS. CONTRACTOR SHALL USE CARE IN CONTROLLING AND MEASURING DRILL ANGLE. TIEBACK LENGTHS, ANGLES, AND LOCATIONS HAVE BEEN COORDINATED TO THE FULLEST EXTENT POSSIBLE TO AVOID OBSTRUCTIONS. HOWEVER, IF OBSTRUCTIONS ARE ENCOUNTERED PRIOR TO COMPLETION OF DRILLING, THE HOLE SHALL BE ABANDONED AND FILLED WITH NEAT CEMENT GROUT. NOTIFY THE SHORING ENGINEER FOR DIRECTION. A NEW HOLE WITH THE ANGLE ADJUSTED SHALL BE DRILLED.
5. ALL LOOSE MATERIAL SHALL BE REMOVED FROM THE HOLE PRIOR TO PLACEMENT OF THE TIEBACK. WHERE TIEBACKS EXTEND BELOW WATER TABLE, WATER MAY REMAIN IN THE CASED HOLD PROVIDED GROUT IS PLACED BY A GROUT TUBE EXTENDING TO THE BOTTOM OF THE HOLE.
6. DO NOT INSTALL TIEBACK ROD UNTIL INSPECTOR OF RECORD AND GEOTECHNICAL ENGINEER HAVE VIEWED AND APPROVED THE HOLE.
7. INSTALL GROUT OVER THE FULL LENGTH OF THE TIEBACK. GROUTING METHODS SHALL ENSURE THAT ALL VOIDS ARE FILLED AND THAT TIEBACKS MEET TESTING CRITERIA. ALL TIEBACKS SHALL BE EQUIPPED WITH POST GROUTING TUBES. POST GROUTING PROCEDURES SHALL BE USED AT ALL TIEBACKS.
8. GROUT MIXER SHALL PRODUCE GROUT FREE OF LUMPS AND INDISPENSED CEMENT. GROUTING EQUIPMENT SHALL BE SIZED TO ENABLE THE GROUT TO BE PUMPED IN A CONTINUOUS OPERATION. THE MIXER SHALL BE CAPABLE OF CONTINUOUSLY AGITATING THE GROUT.
9. CONTRACTOR SHALL RECORD GROUT PRESSURE AND QUANTITY OF GROUT PLACED.
10. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH REGROUTING, REDRILLING, OR REPLACEMENT OF TIEBACKS THAT FAIL TO MEET TEST CRITERIA.
11. TIEBACK TESTING MAY COMMENCE 3 DAYS AFTER POST-GROUTING OPERATIONS PROVIDED GROUT COMPRESSIVE STRENGTH HAS REACHED 3000 PSI.
12. AFTER THE HIGH STRENGTH GROUT HAS ACHIEVED 3000 PSI, THE TIEBACK SHALL BE STRESSED IN THE FOLLOWING MANNER:
 - A. INSTALL ANCHORAGE.
 - B. PERFORMANCE TEST SELECT TIEBACKS IN ACCORDANCE WITH THE TIEBACK TESTING SECTION OF THESE GENERAL NOTES.
 - C. PROOF TEST EVERY TIEBACK BY STRESSING TO TEST LOAD SHOWN IN THE SCHEDULE ON S-541 AND MAINTAINING THAT LOAD FOR 30 MINUTES. PROOF TEST IS SUCCESSFUL IF THE CRITERIA FOR PERFORMANCE TESTS, FOUND IN THE TIEBACK TESTING SECTION OF THESE GENERAL NOTES, ARE MET.
 - D. TEMPORARILY STRESS ANCHOR TO MAXIMUM 80% OF GROSS ULTIMATE TENSILE STRENGTH (GUTS) TO COMPENSATE FOR WEDGE SEATING LOSSES. ANCHOR SYSTEMS SUPPLIER TO PROVIDE STRESSING DATA SHEET PRIOR TO STRESSING.
 - E. ADJUST LOAD TO THE LOCK LOAD SHOWN IN THE TIEBACK SCHEDULE AND SECURE ANCHORAGE DEVICES.
13. IF THE TIEBACK FAILS TO MAINTAIN THE TEST LOAD FOR TEN MINUTES, USE POST GROUTING PROCEDURES TO REPAIR TIEBACKS. A TUBE SHALL BE PROVIDED WITH THE TIEBACK FOR SUCH PURPOSES. AFTER POST GROUTING THE TIEBACKS SHALL BE RE-TESTED. IF THE TIEBACK STILL FAILS, AN ADDITIONAL TIEBACK SHALL BE ADDED AT THE DIRECTION OF THE SHORING ENGINEER AT THE CONTRACTOR'S EXPENSE.
14. THE MINIMUM PRESSURE FOR POST GROUTING SHALL BE 300 PSI, SUBJECT TO CONTROL TO PREVENT EXCESSIVE HEAVE OR FRACTURING. POST GROUTING SHALL TAKE PLACE AFTER INITIAL GROUT HAS SET FOR 24 HOURS. POST GROUTING SHALL OCCUR IN THE BONDED LENGTH ONLY. THE POST-GROUT PRESSURE SHALL BE SUFFICIENT TO FRACTURE THE INITIAL GROUT AND THEREAFTER SHALL BE REDUCED TO 300 PSI. THE CONTRACTOR SHALL DETERMINE THE QUANTITY OF GROUT TO BE PLACED AND THE NUMBER OF TIMES TO POST GROUT.

XIII. TIEBACK TESTING

1. REVIEW MILL CERTIFICATIONS FOR ALL TIEBACK STEEL.
2. PERFORM MATERIAL TESTING OF TIEBACKS. TWO SAMPLES OF EACH HEAT SHALL BE TENSION TESTED.
3. PERFORM COMPRESSION TESTS OF TIEBACK GROUT USED DAILY. PREPARE 4 CYLINDERS OR CUBES AND TEST TWO SAMPLES AT 4 DAYS AND 1 SAMPLE AT 7 DAYS. ONE SPECIMEN SHALL BE RETAINED FOR LATER TESTING, IF REQUIRED.
4. VISUALLY INSPECT EACH TIEBACK ASSEMBLY IMMEDIATELY PRIOR TO INSERTION IN THE HOLE. THE PURPOSE OF THE INSPECTION WILL BE TO ASCERTAIN THE SUITABILITY AND ACCEPTABILITY OF THE ASSEMBLY FOR INSERTION INTO THE HOLE. THE PRESENCE OF ANY UNACCEPTABLE CONDITION OR DAMAGE SHALL BE SUFFICIENT CAUSE FOR REJECTION. A PARTIAL LIST OF UNACCEPTABLE CONDITIONS AND TYPES OF DAMAGE INCLUDES: ABRASIONS, KINDS, WELDS, WELD SPLATTERS, AND CUTS. ASSEMBLIES SHALL ALSO BE FREE OF DIRT, GREASE, OIL, DETRIMENTAL RUST, FITTING, AND ALL OTHER DELETERIOUS SUBSTANCES.
5. PROOF-TEST EVERY TIEBACK, UNLESS OTHERWISE NOTED. REFER TO TIEBACK INSTALLATION SECTION OF THESE GENERAL NOTES FOR ADDITIONAL INFORMATION AND PTI MANUAL FOR ADDITIONAL REQUIREMENTS.
6. PERFORMANCE-TEST TWO PERCENT OF THE TIEBACKS, OR A MINIMUM OF THREE TIEBACKS, WHICHEVER IS GREATER. THE FIRST PRODUCTION TIEBACK SHALL BE PERFORMANCE TESTED. THE ENGINEER SHALL SELECT THE REMAINING TIEBACKS TO BE PERFORMANCE TESTED. PERFORMANCE TESTING OF TIEBACKS SHALL BE IN ACCORDANCE WITH PTI (2004) AND THE FOLLOWING PROCEDURES:
 - a. THE PERFORMANCE TEST SHALL BE MADE BY INCREMENTALLY LOADING AND UNLOADING THE TIEBACK IN ACCORDANCE WITH THE SCHEDULE ON S-541. THE LOAD SHALL BE RAISED FROM ONE INCREMENT TO ANOTHER IMMEDIATELY AFTER A DEFLECTION READING. DEFLECTION READINGS SHALL BE RECORDED TO THE NEAREST 0.001 INCHES WITH RESPECT TO AN INDEPENDENT FIXED REFERENCE POINT. THE FIXED REFERENCE FOR MOVEMENT RECORDING SHALL BE A FREE STANDING TRIPOD-MOUNTED DIAL GAUGE WITH A PRECISION OF 0.001 INCHES.
 - b. THE MAXIMUM LOAD IN A PERFORMANCE TEST SHALL BE HELD FOR 10 MINUTES. THE LOAD-HOLD PERIOD SHALL START AS SOON AS THE MAXIMUM LOAD IS APPLIED AND THE TIEBACK MOVEMENT SHALL BE MEASURED AND RECORDED AT 1 MINUTE, 2, 3, 4, 5, 6, AND 10. IF THE ANCHOR MOVEMENT BETWEEN 1 MINUTE AND 10 MINUTES EXCEEDS 0.04 INCHES, THE MAXIMUM LOAD SHALL BE HELD FOR AN ADDITIONAL 50 MINUTES. IF THE LOAD HOLD IS EXTENDED, THE ANCHOR MOVEMENT SHALL BE RECORDED AT 15, 20, 30, 40, 50, AND 60 MINUTES. IF AN ANCHOR FAILS IN CREEP, RE-TESTING WILL NOT BE ALLOWED.
 - c. A TIEBACK PERFORMANCE TEST WITH A 10 MINUTE LOAD HOLD IS ACCEPTABLE IF BOTH OF THE FOLLOWING ARE MET:
 1. THE TIEBACK CARRIES THE MAXIMUM LOAD WITH LESS THAN 0.04 INCHES OF MOVEMENT BETWEEN 1 AND 10 MINUTES.
 2. THE TOTAL MOVEMENT AT THE MAXIMUM LOAD EXCEEDS 80 PERCENT OF THE THEORETICAL ELASTIC ELONGATION OF THE TIEBACK UNBONDED LENGTH.
 - d. IF THE LOAD HOLD IS EXTENDED, THE TEST IS ACCEPTABLE IF THE TIEBACK CARRIES THE MAXIMUM LOAD WITH LESS THAN 0.04 INCHES OF MOVEMENT BETWEEN 6 AND 60 MINUTES AND SATISFIES ITEM c.2. ABOVE.
7. LOCK OFF: SUCCESSFULLY TESTED TIEBACKS SHALL BE LOCKED OFF AT LEAST AT THE DESIGN LOAD OR GREATER (UNLESS OTHERWISE DIRECTED BY THE ENGINEER).
8. ANCHORS SHALL BE STRESSED STRAIGHT AND TRUE. KINKING OR SHARP CURVATURE IN THE ANCHORS UNDER TENSION SHALL BE CAUSE FOR REJECTION.
9. TIEBACKS THAT ULTIMATELY FAIL TO MEET THE TESTING CRITERIA MAY BE RETESTED AT A LOWER LOAD AND ASSIGNED A VALUE EQUAL TO THAT LOAD IF THE ENGINEER APPROVES SUCH AN APPROACH. AN ADDITIONAL TIEBACK SHALL BE INSTALLED TO MAKE UP THE LOAD DIFFERENCE. THE LOCATION OF THE ADDITIONAL TIEBACK WILL BE DETERMINED BY THE ENGINEER.
10. IF A TIEBACK CONTINUES TO FAIL A LOAD TEST, THE TIEBACK MAY BE POST-GROUTED AND RETESTED. IF TIEBACK FAILS AFTER SECOND POST-GROUT, TIEBACK IS REJECTED AND SHALL BE REPLACED.

XIV. STRUCTURAL TESTS, INSPECTIONS, AND OBSERVATIONS

1. AN INDEPENDENT TESTING AGENCY AND SPECIAL INSPECTORS WILL BE RETAINED BY THE OWNER TO PERFORM TESTS AND INSPECTION.
2. THE FOLLOWING ITEMS REQUIRE TESTS AND INSPECTIONS IN ACCORDANCE WITH THE REQUIREMENTS OF THE CHAPTER 'STRUCTURAL TESTS AND INSPECTIONS' OF THE APPLICABLE CODE. REQUIREMENTS FOR TESTS AND INSPECTIONS ARE IDENTIFIED IN THE SPECIFICATIONS.
 - A. REINFORCING STEEL
 - B. CAST-IN-PLACE CONCRETE
 - C. POST-INSTALLED ANCHORS
 - D. REPAIR MORTARS
 - E. TIEBACKS

XV. MONITORING

1. ESTABLISH CONTROL POINTS ALONG THE EXISTING SEAWALL AS IDENTIFIED IN THE ELEVATIONS PRIOR TO START OF EXCAVATION OR CONSTRUCTION OR DEMOLITION. MONITOR ANY MOVEMENT OF SEAWALL DURING TRENCHING, EXCAVATIONS OR DEMOLITION WORK NEAR THE SEAWALL. NOTIFY SEOR OF ANY MOVEMENT EXCEEDING 1/4".

XVI. DESIGN CRITERIA

1. APPLICABLE CODE: 2022 CALIFORNIA BUILDING CODE
2. GRAVITY LOADS:
 - A. DEAD LOADS - VARY BASED ON ACTUAL WEIGHTS
 - B. LIVE LOADS
 - a. STAIRS: 100 PSF
3. SHORING DESIGN PARAMETERS (PER GEOTECH REPORT)
 - A. TIEBACKS ALLOWABLE SKIN FRICTION: 21 PSI
4. DESIGN ASSUMPTIONS REGARDING SHARING OF LOAD BETWEEN NEW AND EXISTING TIEBACKS
 - A. NEW TIEBACKS AT STRAIGHT WALL SEGMENTS ARE DESIGNED TO RESIST 75% OF THE LATERAL SOIL LOADS (WITH THE EXISTING TIEBACKS RESISTING 25%)
 - B. NEW TIEBACKS AT THE CURVED WALL SEGMENT ARE DESIGNED TO RESIST 50% OF THE LATERAL SOIL LOADS (WITH EXISTING TIEBACKS RESISTING 50%).

XVII. PROJECT SEQUENCING

1. PRIOR TO ALL REPAIR WORK, CONTRACTOR TO
 - A. BRACE WALL AS REQUIRED
 - B. INSTALL ADEQUATE PROTECTION TO PREVENT SEA WATER FROM CONTACTING WALL DURING REPAIRS.
 - C. SET UP MONITORING CONTROL POINTS AS IDENTIFIED.
2. SEQUENCE OF WALL REPAIRS ARE AS FOLLOWS:
 - A. DEMOLITION, REPAIR, AND INSTALLATION OF WALL REBAR PER DETAIL 6/S-511.
 - B. CORE THROUGH (E) WALL AND INSTALL TIEBACK.
 - C. SHOTCRETE INFILL EXCEPT FOR AREA OF TIEBACK BLOCKOUT PER DETAIL 7/S-541 OR 9/S-541.
 - D. TEST TIEBACKS PER XIII OF GENERAL NOTES.
 - E. INFILL TIE-BACK BLOCKOUT WITH CONCRETE OR NON-SHRINK GROUT
 - F. CONTRACTOR MAY SUBMIT ALTERNATE SEQUENCE FOR EOR REVIEW.

EROSION & SEDIMENT CONTROL NOTES

TEMPORARY EROSION/SEDIMENT CONTROL, PRIOR TO COMPLETION OF FINAL IMPROVEMENTS, SHALL BE PERFORMED BY THE CONTRACTOR OR QUALIFIED PERSON AS INDICATED BELOW:

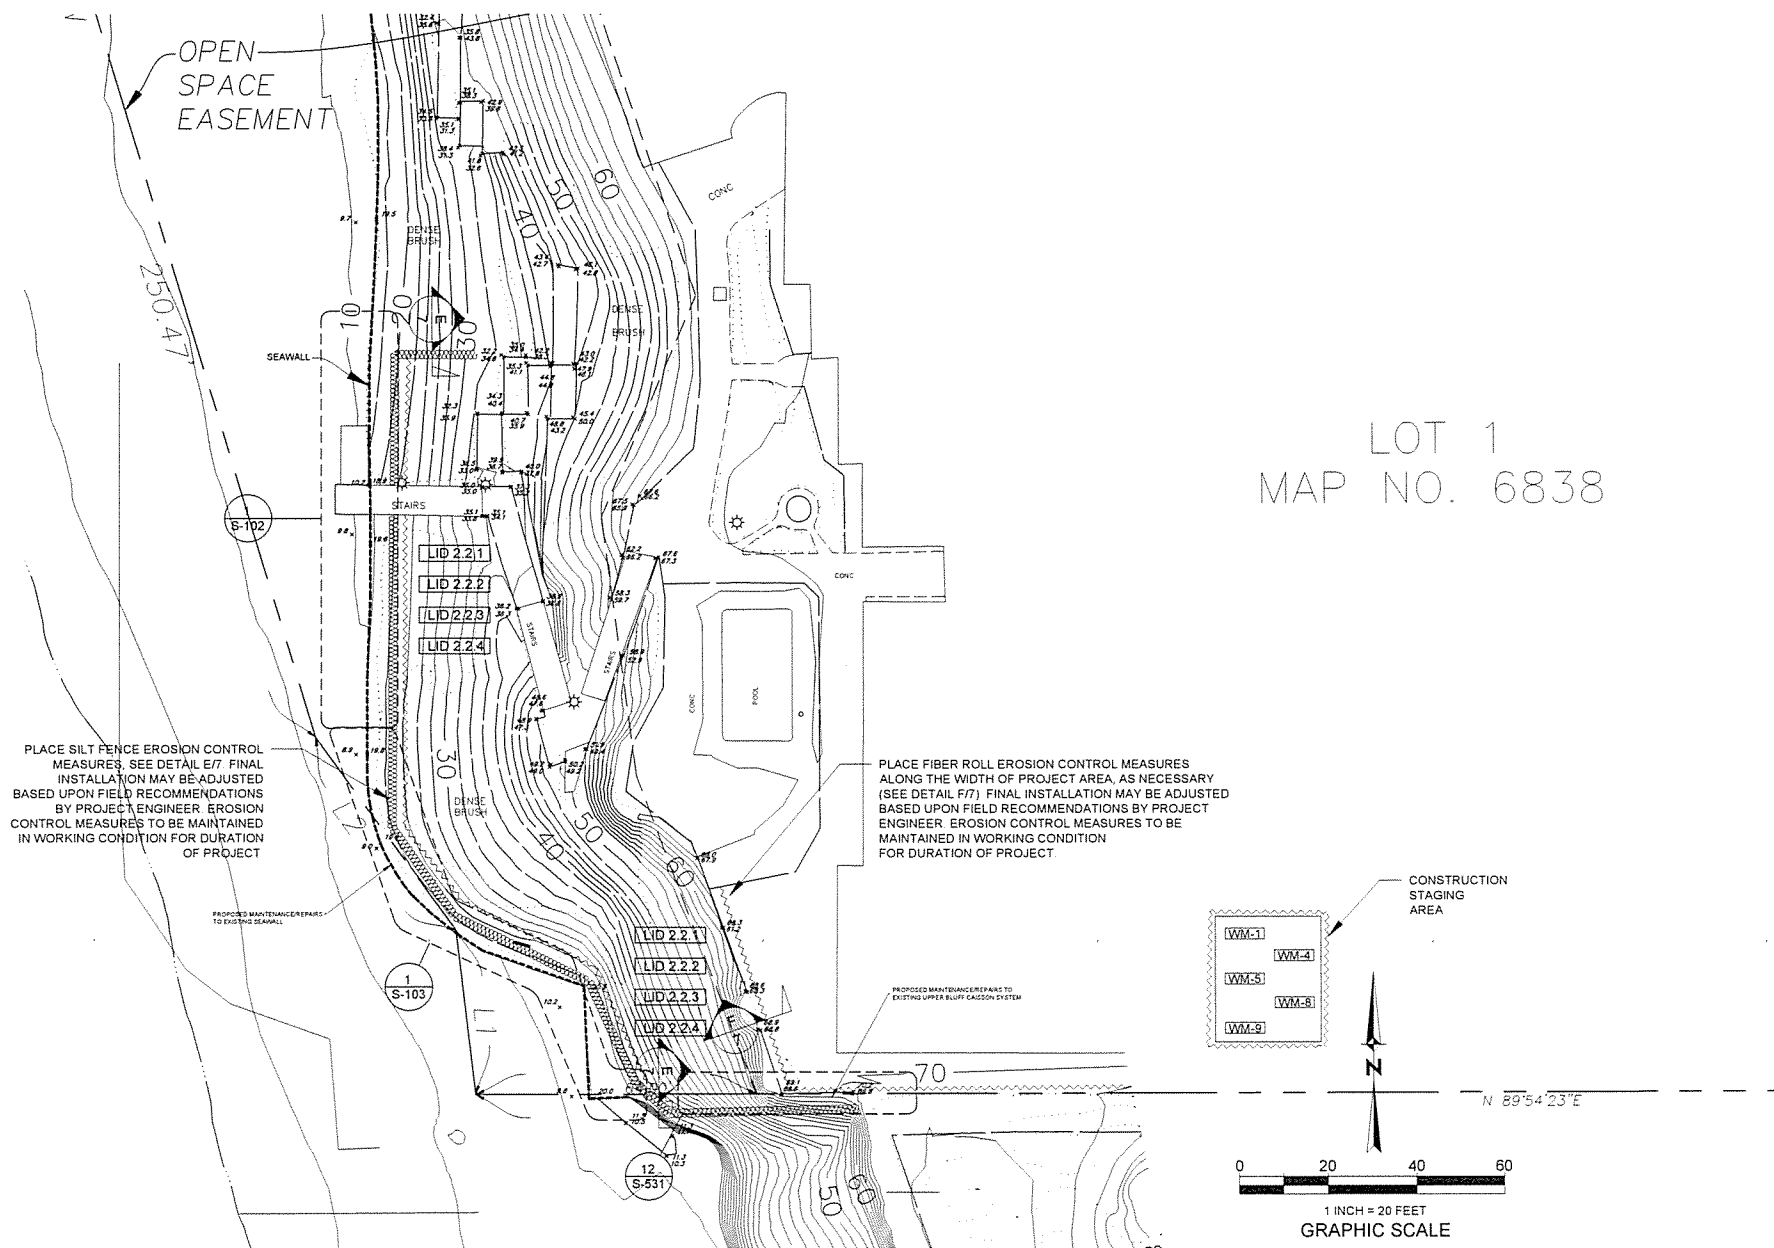

1. ALL REQUIREMENTS OF THE CITY OF SOLANA BEACH STORM WATER STANDARDS MUST BE INCORPORATED INTO THE DESIGN AND CONSTRUCTION OF THE PROPOSED GRADING/IMPROVEMENTS CONSISTENT WITH THE APPROVED STORM WATER POLLUTION PREVENTION PLAN (SWPPP) AND/OR WATER POLLUTION CONTROL PLAN (WPCP) FOR CONSTRUCTION LEVEL BMP'S.
2. FOR STORM DRAIN INLETS, PROVIDE A GRAVEL BAG SILT BASIN IMMEDIATELY UPSTREAM OF INLET AS INDICATED ON DETAILS.
3. FOR INLETS LOCATED AT SUMPS ADJACENT TO TOP OF SLOPES, THE CONTRACTOR SHALL ENSURE THAT WATER DRAINING TO THE SUMP IS DIRECTED INTO THE INLET AND THAT A MINIMUM OF 1.00' FREEBOARD EXISTS AND IS MAINTAINED ABOVE THE TOP OF THE INLET. IF FREEBOARD IS NOT PROVIDED BY GRADING SHOWN ON THESE PLANS, THE CONTRACTOR SHALL PROVIDE IT VIA TEMPORARY MEASURES, I.E. GRAVEL BAGS OR DIKES.
4. THE CONTRACTOR OR QUALIFIED PERSON SHALL BE RESPONSIBLE FOR CLEANUP OF SILT AND MUD ON ADJACENT STREET(S) AND STORM DRAIN SYSTEM DUE TO CONSTRUCTION ACTIVITY.
5. THE CONTRACTOR OR QUALIFIED PERSON SHALL CHECK AND MAINTAIN ALL LINED AND UNLINED DITCHES AFTER EACH RAINFALL.
6. THE CONTRACTOR SHALL REMOVE SILT DEBRIS AFTER EACH MAJOR RAINFALL.
7. EQUIPMENT AND WORKERS FOR EMERGENCY WORK SHALL BE MADE AVAILABLE AT ALL TIMES DURING THE RAINY SEASON. ALL NECESSARY MATERIALS SHALL BE STOCKPILED ON SITE AT CONVENIENT LOCATIONS TO FACILITATE RAPID CONSTRUCTION OF TEMPORARY DEVICES WHEN RAIN IS IMMINENT.
8. THE CONTRACTOR SHALL RESTORE ALL EROSION/SEDIMENT CONTROL DEVICES TO WORKING ORDER TO THE SATISFACTION OF THE CITY ENGINEER OR RESIDENT ENGINEER AFTER EACH RUN-OFF PRODUCING RAINFALL.
9. THE CONTRACTOR SHALL INSTALL ADDITIONAL EROSION/SEDIMENT CONTROL MEASURES AS MAY BE REQUIRED BY THE RESIDENT ENGINEER DUE TO UNCOMPLETED GRADING OPERATIONS OR UNFORESEEN CIRCUMSTANCES, WHICH MAY ARISE.
10. THE CONTRACTOR SHALL BE RESPONSIBLE AND SHALL TAKE NECESSARY PRECAUTIONS TO PREVENT PUBLIC TRESPASS ONTO AREAS WHERE IMPOUNDED WATERS CREATE A HAZARDOUS CONDITION.
11. ALL EROSION/SEDIMENT CONTROL MEASURES PROVIDED PER THE APPROVED GRADING PLAN SHALL BE INCORPORATED HEREON. ALL EROSION/SEDIMENT CONTROL FOR INTERIM CONDITIONS SHALL BE DONE TO THE SATISFACTION OF THE RESIDENT ENGINEER.
12. GRADED AREAS AROUND THE PROJECT PERIMETER MUST DRAIN AWAY FROM THE FACE OF THE SLOPE AT THE CONCLUSION OF EACH WORKING DAY.
13. ALL REMOVABLE PROTECTIVE DEVICES SHOWN SHALL BE IN PLACE AT THE END OF EACH WORKING DAY WHEN RAIN IS IMMINENT.
14. THE CONTRACTOR SHALL ONLY GRADE, INCLUDING CLEARING AND GRUBBING FOR THE AREAS FOR WHICH THE CONTRACTOR OR QUALIFIED PERSON CAN PROVIDE EROSION/SEDIMENT CONTROL MEASURES.
15. THE CONTRACTOR SHALL ARRANGE FOR WEEKLY MEETINGS DURING OCTOBER 1ST TO APRIL 30TH FOR PROJECT TEAM (GENERAL CONTRACTOR, QUALIFIED PERSON, EROSION CONTROL SUBCONTRACTOR IF ANY, ENGINEER OF WORK, OWNER/DEVELOPER AND THE RESIDENT ENGINEER) TO EVALUATE THE ADEQUACY OF THE EROSION/SEDIMENT CONTROL MEASURES AND OTHER RELATED CONSTRUCTION ACTIVITIES.

CONCRETE REPAIR NOTES

REPAIR CRITERIA

- 1. THE CRACKS AND SPALLS IDENTIFIED IN THESE DRAWINGS REPRESENT THE MAJORITY OF THE SIGNIFICANT CRACKS/SPALLS OBSERVED; HOWEVER, IT IS NOT MEANT TO BE A COMPREHENSIVE AND COMPLETE PORTRAYAL OF ITEMS REQUIRING MITIGATION. IN ADDITION, THEIR LENGTH & LOCATION ARE APPROXIMATE IN NATURE.

MATERIALS AND PRODUCTS

- 1. BONDING AGENTS:
A. EPOXY-MODIFIED, CEMENTITIOUS BONDING AND ANTICORROSION AGENT...
2. MORTAR SCRUB COAT: MIX CONSISTING OF 1 PART PORTLAND CEMENT AND 1 PART FINE AGGREGATE...
3. PATCHING MORTAR:
A. GENERAL:
a. ONLY USE PATCHING MORTARS THAT ARE RECOMMENDED BY MANUFACTURER...
B. CEMENTITIOUS PATCHING MORTAR: PACKAGED, DRY MIX FOR REPAIR OF CONCRETE...
C. POLYMER-MODIFIED, CEMENTITIOUS PATCHING MORTAR: PACKAGED, DRY MIX FOR REPAIR OF CONCRETE...
4. EPOXY CRACK INJECTION MATERIALS
A. EPOXY CRACK-INJECTION ADHESIVE: ASTM C 881/C 881M, TYPE IV AT STRUCTURAL LOCATIONS...
B. BASIS-OF-DESIGN PRODUCT: SUBJECT TO COMPLIANCE WITH REQUIREMENTS...
C. CAPPING ADHESIVE: PRODUCT MANUFACTURED FOR USE WITH CRACK INJECTION ADHESIVE...

SURFACE PREPARATION FOR PATCH LOCATIONS (WHERE CORROSION IS OBSERVED)

- 1. LOCATION AND MARKING OF WORK
A. CONTRACTOR TO LOCATE SPALLS AND DELAMINATIONS BY VISUAL INSPECTION AND CONCRETE SOUNDING...
B. AREAS TO BE REMOVED SHALL BE AS STRAIGHT AND RECTANGULAR AS PRACTICAL...
C. CONTRACTOR TO LOCATE ALL EMBEDDED POST-TENSIONING TENDONS AND REINFORCEMENT...
2. CONCRETE REMOVAL
A. DELAMINATED, SPALLED, AND UNSOUND CONCRETE FLOOR AREAS SHALL HAVE THEIR MARKED BOUNDARIES SAWCUT...
B. ALL CONCRETE SHALL BE REMOVED FROM WITHIN THE MARKED BOUNDARY...
C. WHERE EMBEDDED REINFORCEMENT IS EXPOSED BY CONCRETE REMOVAL...
D. IF RUST IS PRESENT ON EMBEDDED REINFORCEMENT WHERE IT ENTERS SOUND CONCRETE...
3. REINFORCEMENT IN REPAIR AREA
A. ALL EMBEDDED REINFORCEMENT EXPOSED DURING SURFACE PREPARATION THAT HAS LOST MORE THAN 20%...
B. CONCRETE SHALL BE REMOVED TO PROVIDE A MINIMUM OF 3/4 INCH CLEARANCE...
4. CLEANING OF REINFORCING
A. ALL EXPOSED STEEL SHALL BE CLEANED OF RUST TO BARE METAL...
5. PREPARATION OF CAVITY FOR PATCH PLACEMENT
A. THOROUGHLY CLEAN REMOVAL AREAS OF LOOSE CONCRETE, DUST AND DEBRIS...
B. PERFORM ADDITIONAL PREPARATION AND CLEANING OF THE SPALL CAVITY...
C. COAT REBAR AND CAVITY WITH SIKA ARMATEC 110 PER MANUFACTURER RECOMMENDATIONS.

APPLICATION OF PATCH MATERIALS

- 1. APPLICATION OF PATCHING MORTAR: PLACE AS FOLLOWS UNLESS OTHERWISE RECOMMENDED...
A. PROVIDE FORMS WHERE NECESSARY TO CONFIN PATCH TO REQUIRED SHAPE.
B. WET SUBSTRATE AND FORMS THOROUGHLY AND THEN REMOVE STANDING WATER.
C. APPLY BONDING AGENT PER MANUFACTURER RECOMMENDATIONS.
D. GENERAL PLACEMENT: PLACE PATCHING MORTAR BY TROWELING TOWARD EDGES...
E. VERTICAL PATCHING: PLACE MATERIAL IN LIFTS OF NOT MORE THAN 1-1/2 INCHES...
F. OVERHEAD PATCHING: PLACE MATERIAL IN LIFTS OF NOT MORE THAN 1-1/2 INCHES...
G. CONSOLIDATION: AFTER EACH LIFT IS PLACED, CONSOLIDATE MATERIAL...
H. FINISHING: ALLOW SURFACES OF LIFTS THAT ARE TO REMAIN EXPOSED...
I. CURING: WET-CURE CEMENTITIOUS PATCHING MATERIALS...
2. APPLICATION OF DRY PACK MORTAR: USE FOR DEEP CAVITIES AND WHERE INDICATED...
A. PROVIDE FORMS WHERE NECESSARY TO CONFIN PATCH TO REQUIRED SHAPE.
B. WET SUBSTRATE AND FORMS THOROUGHLY AND THEN REMOVE STANDING WATER.
C. APPLY BONDING AGENT PER MANUFACTURER RECOMMENDATIONS.
D. PLACE DRY-PACK MORTAR INTO CAVITY BY HAND, AND COMPACT TIGHTLY...
E. AFTER CAVITY IS FILLED AND PATCH IS COMPACTED, TROWEL SURFACE...
F. WET-CURE PATCH FOR NOT LESS THAN SEVEN DAYS...
3. PLACEMENT OF CONCRETE PATCH: BASIS OF DESIGN FOR FORM AND POUR REPAIRS IS SIKACRETE 211 SCC PLUS
A. APPLY BONDING AGENT PER MANUFACTURER RECOMMENDATIONS.
B. STANDARD PLACEMENT:
a. PROVIDE FORMS WHERE NECESSARY TO CONFIN PATCH TO REQUIRED SHAPE.
b. WET SUBSTRATE AND FORMS THOROUGHLY AND THEN REMOVE STANDING WATER.
c. APPLY BONDING AGENT PER MANUFACTURER RECOMMENDATIONS.
d. PLACE MATERIAL PER MANUFACTURER'S RECOMMENDATIONS
C. WET-CURE CONCRETE FOR NOT LESS THAN SEVEN DAYS...
D. FILL PLACEMENT CAVITIES WITH DRY-PACK MORTAR AND REPAIR VOIDS...

EPOXY CRACK INJECTION

- 1. EPOXY CRACK INJECTION: BASIS OF DESIGN IS SIKADUR 35
A. CLEAN AREAS TO RECEIVE CAPPING ADHESIVE OF OIL, DIRT, AND OTHER SUBSTANCES...
B. PLACE INJECTION PORTS AS RECOMMENDED BY EPOXY MANUFACTURER...
C. SEAL CRACKS AT EXPOSED SURFACES WITH A RIBBON OF CAPPING ADHESIVE...
D. INJECT EPOXY ADHESIVE, BEGINNING AT WIDEST PART OF CRACK...
E. AFTER EPOXY ADHESIVE HAS SET, REMOVE INJECTION PORTS AND GRIND SURFACES SMOOTH

FIELD QUALITY CONTROL

- 1. PERFORM THE FOLLOWING TESTS AND INSPECTIONS:
A. PACKAGED, CEMENTITIOUS PATCHING MORTAR: 2 RANDOMLY SELECTED SETS...
B. JOB-MIXED PATCHING MORTAR: 2 RANDOMLY SELECTED SETS...
2. PRODUCT WILL BE CONSIDERED DEFECTIVE IF IT DOES NOT PASS TESTS...
3. PREPARE TEST AND INSPECTION REPORTS.

PROJECT SEQUENCING

SEE SECTION XVII OF GENERAL NOTES ON S-002 FOR CONCRETE REPAIR AND TIEBACK INSTALLATION WORK SEQUENCING.

SURFACE PREPARATION FOR PATCH LOCATIONS (WHERE CORROSION NOT OBSERVED)

- 1. LOCATION AND MARKING OF WORK
A. WITHIN THE REGIONS IDENTIFIED IN THE ELEVATIONS, CONTRACTOR TO LOCATE SPALLS DELAMINATIONS...
B. AREAS TO BE REMOVED SHALL BE AS STRAIGHT AND RECTANGULAR AS PRACTICAL...
C. CONTRACTOR TO LOCATE ALL EMBEDDED POST-TENSIONING TENDONS AND REINFORCEMENT...
2. CONCRETE REMOVAL
A. FOR VERTICAL AND OVERHEAD SURFACES THE MARKED BOUNDARY MAY BE SAWCUT...
B. ALL CONCRETE SHALL BE REMOVED FROM WITHIN THE MARKED BOUNDARY...
C. WHERE EMBEDDED REINFORCEMENT IS EXPOSED BY CONCRETE REMOVAL...
3. PREPARATION OF CAVITY FOR PATCH PLACEMENT
A. THOROUGHLY CLEAN REMOVAL AREAS OF LOOSE CONCRETE, DUST AND DEBRIS...
B. PERFORM ADDITIONAL PREPARATION AND CLEANING OF THE SPALL CAVITY...

NOTES:

- Ld = DEVELOPMENT LENGTH
Ls = TYPE 'B' LAP SPLICE LENGTH
Ldh = HK DEVELOPMENT LENGTH
- WHEN SPLICING BARS OF DIFFERENT SIZE, USE LAP SPLICE LENGTH OF LARGER BAR, UON
- STAGGER SPLICES AS INDICATED ON DRAWINGS.
COUPLER OR WELDED SPLICE
- TABULATED VALUES ARE BASED ON GRADE 60 REINFORCING BARS. FOR GRADES GREATER THAN 60, UP TO GRADE 80, MULTIPLY THE ABOVE LENGTHS BY THE RATIO OF THE PROPOSED GRADE AND 60.
- FOR LIGHTWEIGHT AGGREGATE CONCRETE, MULTIPLY THE TABULATED VALUES FOR 'NWC' TYPE CONCRETE BY 1.33.
- TABLES INCLUDE INCREASED DEVELOPMENT AND SPLICE LENGTHS DUE TO EPOXY COATING.

Reference: Del Mar Beach Club – Phase I Seawall & Upper Bluff Repair
825 S. Sierra Avenue
Solana Beach, California

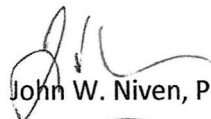

Dear Mr. Hines:

In response to your request, we have reviewed the “Grading & Improvement Plans for: Del Mar Beach Club – Phase I Seawall & Upper Bluff Repair”, prepared by Degenkolb Engineers. Based on our review, the plans and structural calculations have been prepared in general accordance, from a geotechnical perspective, with the recommendations included in our geotechnical report.

Following completion of tie-back exposure and testing, and having documented that the existing tiebacks have little to no retention capacity, it is our opinion that failure of segments of the seawall could occur at any time. Such failure would likely result in significant up-slope failure that would ultimately impact the southwestern condominium building. Therefore, we recommend that this project be addressed an emergency.

This opportunity to be of service is sincerely appreciated. If you have any questions, please call this office.

Respectfully submitted,
SOIL ENGINEERING CONSTRUCTION, INC.

John W. Niven, P.E.

Robert D. Mahony, G.E., C.E.G.

UES/CTE Job No. 4830.2300109

City of Solana Beach
635 South Highway 101
Solana Beach, California 92075

Attention: Ms. Corey Andrews
(858) 720-2434
candrews@cosb.org

Subject: Application Submittal Geotechnical Review -3rd Review
Del Mar Beach Club Seawall Repair
825 South Sierra Avenue, Solana Beach, California 92075

References: At End of Document

Ms. Andrews:

As requested, Universal Engineering Sciences (UES/CTE) has reviewed the submittal application documents referenced at the end of this letter. The purpose of our review was to assess whether the proposed project is in substantial compliance with the City of Solana Beach's (City) Local Coastal Plan (LCP) policies.

Based on CTE's review and report of the project geotechnical consultant (SEC), the proposed work consists of an emergency repair to the existing lower sea-wall (a length of approximately 170 ft north from the southern extent of the wall), and repair to the existing upper bluff pier wall running east/west at the southern property line.

- 1) The City should note that the applicant's geotechnical engineer has indicated an emergency condition in the referenced letter (SEC, Sept. 2023).
- 2) It has been noted that grout sampling will be performed daily. **Previous request is satisfied.**
- 3) It has been noted that monitoring points have been identified on the plan sheets and a threshold movement of $\frac{1}{4}$ " is indicated. **Previous request is satisfied.**
- 4) The structural engineer has confirmed that the wall has been designed for hydrostatic pressures for the full wall height. **Previous request is satisfied.**
- 5) The project Geotechnical Engineer has indicated that they have reviewed the project plans and calculations, from a geotechnical perspective, and finds them to be in general conformance with their recommendations (SEC, 2023). **Previous request is satisfied.**

Based on our review of referenced documents, no additional information is requested. If referenced plans or documents are revised, they should be provided to UES/CTE for review.

LIMITATIONS

UES/CTE has reviewed the referenced documents for this review from a geotechnical perspective and for geotechnical conformance with the City of Solana Beach's (City) Local Coastal Plan (LCP) policies and regionally accepted geotechnical standards of practice. It is not in UES/CTE's scope of work or responsibility to perform an independent geotechnical investigation or analysis of the proposed work site. The proposed site exists on an actively eroding coastal bluff, and as such, local and global stability are unpredictable and subject to change based on internal and external factors. UES/CTE makes no warranties as to the effectiveness or appropriateness of the applicant's proposed work.

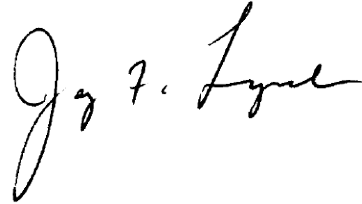

We appreciate this opportunity to be of service on this project. If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Respectfully,

UNIVERSAL ENGINEERING SCIENCES (UES/CTE)

Colm J. Kenny, GE #3201
Senior Engineer

Jay F. Lynch, CEG #1890
Principal Engineering Geologist

1.0 INTRODUCTION AND OVERVIEW

This report summarizes the findings of the Soil Engineering Construction, Inc. (SEC) updated geotechnical recommendations for the coastal bluff area at the south and west portions of the subject site. Coastal bluff retreat has adversely affected the subject site since the early 1980's. To protect improvements on-site, the DMBC has permitted and constructed various coastal protection devices over the years. These include a lower bluff seawall which fronts the western boundary of the subject property, a drilled pier wall within the building pad near the southwest property corner, and a pile supported wall with shotcrete facing on the bluff face at the southwest property corner. Ongoing erosion and bluff failures in this area have worsened conditions from a geotechnical standpoint, maintenance repairs to the protective devices are now required.

Purpose of this updated geotechnical evaluation for the DMBC:

- Document the condition of the previously installed coastal protection devices within the subject area;
- Provide opinions of the stability of the subject property related to the deterioration of coastal protection devices;
- Document whether an imminent threat of damage or failure to the coastal protective devices or structures on-site now exists as a result of continuing mid/upper bluff failure at the southwest property corner; and,
- Provide recommendations for improvements to the coastal protection devices. Elements of the report include an evaluation of previous geotechnical studies and a presentation of useful information relevant to the coastline erosion processes in the area. The site location is depicted on Figure 1 in Appendix B

2.0 SCOPE OF WORK

The scope of this geotechnical evaluation includes:

- Review of geological, topographical, and historic aerial imagery and literature pertaining to the site and vicinity. (see **Appendix A**).
- Geological reconnaissance to record, measure and map portions of the coastal bluff and document the current conditions of the previously installed coastal protective devices.
- Destructive testing to expose the steel reinforcement of the existing seawall.

- Load testing of the previously installed tie-back anchors associated with the existing seawall.
- Assess previous laboratory test data relative to strength parameters for the soil/geologic units of the area.
- Present site topographic plans and provide geological cross-section profiles of the coastal bluff properties.
- Geotechnical analysis of the previous data obtained relative to existing bluff stability as well as proposed bluff conditions once recommended repairs are implemented at the site (see **Appendix B**).
- Preparation of this final report.

3.0 GEOLOGIC SETTING

The site is located within the coastal portion of the Peninsular Ranges Geomorphic Province of California. This province, which extends 900 miles from Southern California to the southern tip of Baja California, is characterized by northwest-trending structural blocks. The coastal portion of the province in San Diego County is typically comprised of upper Cretaceous-aged to Tertiary-aged (1.8 million to 65 million years) marine and non-marine sedimentary bedrock units that have been deposited within a northwest trending basin known as the San Diego Embayment (Norris & Webb, 1976). Recent geologic uplift along the San Diego coastal margin, combined with sea level changes, have created marine terraces and associated deposits consisting of near-shore marine, beach estuarine, and lagoonal facies. These deposits range from early to mid-Quaternary-aged (45,000 to 1.5 million years) and are designated in geologic literature as Paralic Deposits.

According to the geologic literature, the site is underlain by Quaternary-aged surficial deposits designated Old Paralic Deposits, Unit 6. These deposits are in turn underlain by the Tertiary-aged Torrey Sandstone. The site location is identified on the Geologic Plan (Figure 5 in Appendix B). Geologic literature describes the Paralic Deposits as, “poorly sorted, moderately permeable, reddish-brown, interfingering strandline, beach, estuarine and colluvial deposits composed of siltstone, sandstone and conglomerate.” The Torrey Sandstone is described as, “white to light brown, medium to coarse grained, moderately well indurated, massive and broadly cross bedded, arkosic sandstone” (Kennedy and Tan, 2008).

4.0 SITE STRATIGRAPHY

The subsurface descriptions presented below are interpreted from the conditions exposed during the referenced field investigation conducted by others, recent mapping of the bluff exposure and/or inferred from local geologic literature. Cross Section A-A', Figure 4 in Appendix B, which was adapted from the referenced investigation by Group Delta, depicts the subsurface profile and changes in the bluff profile over time.

Old Paralic Deposits – Unit 6 (Qop6) – Old surficial deposits designated Quaternary-aged Old Paralic Deposits, Unit 6 were encountered during the referenced investigation. These deposits are associated with the Nestor marine terrace and are approximately 120,000 years old and are often referred to as Terrace Sands or Terrace Deposits. The upper approximate 20 feet were generally logged as a light reddish brown, medium dense, fine to medium grained sandstone. Below the approximate 20-foot depth within the paralic deposits an increase in density was noted.

Mapping of the bluff revealed the moderately cemented reddish brown sandstone or “beach ridge” deposits within the upper approximate 5 feet of the bluff, forming a cap across the lot that is more resistant to erosion as indicated by the near vertical exposures of this material. Underlying the “beach ridge” cap, two zones of poorly cemented tan sandstone were identified. These zones, which are more susceptible to erosion, form the sloping terrain, which extends down to the underlying bedrock sea cliff.

Bedrock – Torrey Sandstone (Tt) – Bedrock of the Tertiary-aged Torrey Sandstone was mapped underlying the Paralic Deposits at an approximate elevation of 28 feet MSL, and was generally described as a well indurated, medium to coarse grained, tan to light gray sandstone. The sandstone forms an approximate 15-foot-high sea cliff, the base of which is within beach sands. The face of the sea cliff is at or beyond vertical with several feet of overhang along some portions. General bedding with a southeasterly dip on the order of 2 degrees, along with localized higher angled cross bedding with random orientations, was measured within exposures of the Torrey Sandstone. Several minor sea caves or notches were noted within the base of the sea cliff at the existing beach grade.

5.0 SITE-SPECIFIC COASTAL BLUFF TOP RETREAT

A site-specific coastal bluff top retreat rate was evaluated utilizing small scale (1" = 2000') stereo-pair historical aerial photos ranging from 1969 through 1998, large scale (1" = 40') aerial photographs ranging from 1994 through 2010, and higher resolution oblique aerials ranging from 1972 to 2013. Based on a review of these images, there appears to have been relatively small changes in the bluff top configuration along the western perimeter of the lot. Three oblique aerials, 1972, 1989, and 2013, which were shot at similar angles, were selected and roughly scaled for comparative purposes. Over the approximate 40-year period with the three images, it is evident that the subject bluff top experienced a very minor level of erosion during this period.

It should be noted that site-specific erosion rates have likely been reduced as the base of bluff has been improved with a concrete and wood seat wall. Similar improvements were noted along the base of bluff to neighboring lots both north and south of the subject site. These conditions would tend to reduce erosion caused by wave action along the base of bluff along with associated bluff top retreat. For purposes of our evaluation, an average retreat rate consistent with those established by regional studies which are summarized in the next section was utilized. In this case, an average rate of 0.25 ft/year was adopted for the site.

6.0 REVIEW OF COASTAL BLUFF RETREAT DOCUMENTS AND STUDIES

In addition to the review of aerial images, published reports which address coastal bluff retreat rates in the Solana Beach, Encinitas and Leucadia area were reviewed.

A FEMA funded study conducted by Benumof and Griggs (1999), evaluated sea cliff erosion rates along several coastline sites within San Diego County including a 0.5 mile stretch of Encinitas located south of the subject site. These rates were determined over a 62-year period 1932 through 1994 and include short-term erosional episodes related to severe winter storms, including sea cave or notch overhand collapses. The study reported average long-term retreat rate for the Encinitas area of 7.7 cm/year or 0.25 ft/year.

A 2015 study by the U.S. Army Corps of Engineers evaluated the potential impacts from coastal erosion in the Encinitas area from the south end of Solana Beach to the north end of Leucadia. The study was divided into nine different zones or reaches, with the subject lot located in Reach 1, which extends from Leucadia Boulevard north to La Costa Avenue. Reach 1 was described as having many properties with bluff base improvements similar to the wall identified at the subject property. Bluff composition for the reach was described as having a flatter upper bluff slope with vegetation cover, and an erosion resistant bluff base comprised of bedrock and a continuous cobble berm. The study concluded sea cliff retreat rates of 0.3 ft/year, and bluff top retreat rates of 0.2 ft/year.

7.0 POTENTIAL SEA LEVEL RISE IMPACT

As part of our investigation, and in accordance with the State of California Sea-Level Rise Guidance 2018 Update, we evaluated potential site impact regarding sea-level rise. For evaluation purposes, we utilized data from gauge (#9410230) in La Jolla and assumed a project lifespan target date for 2090.

Based on information from the NOAA.gov website, the La Jolla tide gauge has tide level measurements dating back to 1924. Historical tide gauge measurements over the previous 97 years indicate a sea-level trend of 2.04 mm/year, with a 95 percent confidence interval of +/- 0.23 mm/year. The sea-level trend data projected to a 75-year lifespan indicates a sea-level rise ranging from 135 mm to 170 mm. Although useful, the historical sea-level trend does not consider the impact of climate change on sea-level rise.

The State of California Sea-Level Rise Guidance (2018) document provides projected sea-level rise, with climate change taken into account, for 12 tide gauges located along the California coastline from Crescent City in Northern California to San Diego in Southern California. Tables for each of the 12 tide gauges are provided with sea-level rise projections at 10-year intervals for years ranging from 2030 to 2150 and projected ranges including median, likely, 1-in-20 chance, and 1-in-200 chance. Different risk aversion levels, including low, medium-high, and extreme, are also provided for project planning purposes. The low-risk aversion is associated with the “likely” range with a 66 percent probability of occurrence, and the medium-high risk aversion is “1-in-200 chance” with a 0.5 percent probability of occurrence. There is also an extreme risk aversion category that is not associated with a specific climate change projection and is intended for projects with a low tolerance for risks, such as power plants, airports, and hazardous waste storage sites. For years beyond 2050, different emission scenarios, either low emission or high emission, are also provided.

As previously mentioned, the La Jolla tide gauge was identified as #9410230, and a project lifespan target date of 2090 was utilized for our evaluation. The following table summarizes sea level rise

**SOIL
ENGINEERING
CONSTRUCTION_{INC.}**

projections provided in “Table 34: Projected Sea-Level Rise (in feet) for San Diego” from the State of California Sea-Level Rise Guidance (2018) document. These values can be utilized for determining potential site impact from sea level rise.

SEA LEVEL RISE PROJECTIONS						
	MEDIAN	LIKELY		1-in-20 Chance	1-in-200 Chance	H++ scenario (Sweet et al, 2017) *Single scenario
	50% probability sea level rise meets or exceeds...	66% probability sea level rise is between...		5% probability sea level rise meets or exceeds...	0.5% probability sea level rise meets or exceeds...	
			Low Risk Aversion		Medium – High Risk Aversion	Extreme Risk Aversion
Low emissions (2090)	1.6’	1.0’	2.2’	2.9’	4.8’	--
High emissions (2090)	2.2’	1.6’	3.0’	3.7’	5.7’	8.3’

The project designers can consider the potential impacts of sea-level rise on the proposed development.

8.0 GROUNDWATER AND SURFACE WATER

No significant groundwater seepage was observed at the contact of the Pleistocene terrace deposits over the Torrey Sandstone. We note that seasonal perched groundwater levels and conditions can fluctuate due to factors such as rainfall amounts, rainfall intensity, temperatures, or other factors. Changes in this perched groundwater condition can affect the stability of the upper bluff area.

9.0 CONCLUSIONS, FINDINGS & RECOMMENDATIONS

Based on our investigation, the previously installed protective devices have been adversely impacted by on-going erosion and bluff failures. These devices have undergone both chemical and physical weathering as a result of exposure to the elements including sea air and wave action. To extend the lifespan of the devices, and minimize the potential impacts to the improvements on-site, maintenance and repairs are warranted. For the purposes of this report, there are two areas proposed for immediate maintenance/improvement. Our findings and recommendations are discussed in further detail below. A photo image depicting the current site conditions is provided as Proposed South end Caisson Repair, Figure 2 in Appendix B, and a topographic plan view of the subject area is provided as Section Plan View, Figure 3 in Appendix B.

The first area for required maintenance and repairs is the southern +/- 170 lineal feet of the lower sea wall. As part of our geotechnical work, several tieback anchorage heads along the seawall were exposed by removing the concrete anchorage encasements. Severe corrosion of the tieback

SOIL ENGINEERING CONSTRUCTION_{INC.}

anchor tendons, anchor heads and bearing plates were observed. SEC attempted to pull test several individual anchor tendons at different tieback locations using a calibrated center hole jack. Each of the tested tieback tendons failed at relatively low loads, less than 50% of a typical tendon load, with some tendons failing at near zero loads behind the bearing plate, due to corrosion. Based on our observations and experience, it is our finding that most of the existing lower bluff seawall tiebacks have been severely compromised, see photo below, and that as part of the wall repair project a new row of tiebacks should be installed. Relying on the existing tiebacks for lateral support of the existing seawall is not recommended.

The proposed new seawall tiebacks should be designed assuming unbonded lengths and loading consistent with the original seawall design. It is recommended that the new tieback unbonded zone should 20 feet and a bond stress of 21 psi can be assumed for tieback anchor design.

SEC also observed severe concrete spalling along most of the entire length of the lower bluff seawall. A few areas in the concrete seawall face were opened up to observe the outer layer of reinforcing steel. It appears that a new outer reinforcing steel mat will be required, in most areas, to be replaced due to corrosion. We recommend that all spalled concrete be removed and reinforcing steel be replaced or cleaned and a new shotcrete cover be installed over the length of the repair.

No weep holes were observed in the seawall. It is recommended that weep holes be installed at or above elevation +7msl. Installing weep holes at lower elevations may cause piping behind the wall from ocean surges during high tides and storm conditions. If it is decided to install weep holes at a higher elevation, like +7' msl, then the structural engineer should consider adding hydrostatic pressures in design of the lateral support anchors.

The second area for required maintenance and repairs is the upper bluff pier wall and adjacent bluff face along the southern property line of the DMBC condominium complex. Based on our recent review the bluff has receded eastward approximately 8 feet since the pier wall and shotcrete were previously installed. This greatly exceeds the normal annual bluff retreat rate, and is a result of bluff failures. Ongoing upper-bluff failures and associated erosion will continue resulting in the exposure of the concrete piers and potentially threatening to undermine the existing bluff-top structures. At a minimum, we recommend a reinforced shotcrete skin be installed over the existing 18-inch diameter drilled piers for the full length of the current erosion exposure, approximately 4 lineal feet +/- . The new reinforced shotcrete covering should extend a minimum of 3 feet into the underlying bluff materials. If additional tiebacks are necessary, then the minimum unbonded length should be 20 feet. A bond stress in the upper native terrace deposits may be assumed as 15psi. In order to keep tiebacks at a reasonable design load, we recommend a minimum of 3 rows of anchors. The anchors shall be proof tested to 133% of design load. We recommend that the project structural engineer evaluate the existing wall design and make a determination if additional tieback anchors are required. A preliminary wall loading diagram is provided in Figure 6, Appendix B.

10.0 SAFETY CONSIDERATIONS

Due to the large-scale failures that have occurred to the bluff face, the safety factor at the top and base of bluff is a very important issue. Recent bluff failures in the immediate vicinity have resulted in fatalities and/or significant injuries. Contractors, engineers, pedestrians, and *any other persons in the vicinity*, should be aware and warned of the severity of the bluff face conditions.

The present condition of the bluff profile constitutes an active hazard to properties and persons living and/or working above the bluff profile. The present condition also constitutes a hazard to persons along the base of the bluff profile. This hazard along the base of the bluff is estimated to extend approximately 50 feet seaward of the base of the bluff.

Without the proposed shore protection measures, the section along the beach-level area does not have ample space between the bluff face and the ocean during high tide periods for a person

SOIL ENGINEERING CONSTRUCTION_{INC.}

to walk and not be in a region of hazard. Generally, beach hazards include complete collapse of sea caves and undercut and over-steepened bluffs, as well as massive slope failures of the bluff above the bedrock. Potential failures along the top of the bluff profile may extend landward from approximately several feet to 20-foot.

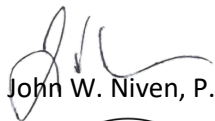

11.0 LIMITATIONS AND CHANGING CONDITIONS

This updated geotechnical evaluation report addresses limited geotechnical conditions at DMBC site, and is based on our document review, our experience in bluff projects, and our observations of the geological conditions exposed in the bluff at this locality. This report assumes that the geologic/soils conditions do not deviate appreciably from those observed. The recommendations of this report pertain only to the subject site.

The findings of this report are valid as of this date. Changes in conditions of this region can occur with the passage of time, through natural processes or the work of man at this vicinity. In addition, applicable standards may be changed by legislation or the broadening of knowledge in the fields of geotechnical engineering or geology. Hence, the findings of this report may be invalidated wholly or in part by changes beyond our control.

If there are questions regarding the information contained herein, we should be contacted. We will not be responsible for the misinterpretation by others of the information herein. Our services consist of professional consultation, and no warranty of any kind whatsoever, express or implied, is made or intended in connection with the work performed by us.

Respectfully submitted,
SOIL ENGINEERING CONSTRUCTION, INC.

APPENDIX C

DEL MAR BEACH CLUB PROPOSED MAINTENANCE/REPAIRS TO EXISTING SEAWALL AND UPPER BLUFF CAISSON SYSTEM - PHASE 1

GENERAL NOTES

- APPROVAL OF THIS GRADING PLAN DOES NOT CONSTITUTE APPROVAL OF VERTICAL OR HORIZONTAL ALIGNMENT OF ANY PRIVATE ROAD SHOWN HEREIN FOR PUBLIC ROAD PURPOSES.
- FINAL APPROVAL OF THESE GRADING PLANS IS SUBJECT TO FINAL APPROVAL OF THE ASSOCIATED IMPROVEMENT PLANS WHERE APPLICABLE FINAL CURB GRAD ELEVATIONS MAY REQUIRE CHANGES IN THESE PLANS.
- IMPORT MATERIALS SHALL BE LEGALLY OBTAINED.
- A SEPARATE PERMIT FROM THE CITY ENGINEER WILL BE REQUIRED FOR ANY WORK IN THE PUBLIC RIGHT-OF-WAY.
- ALL SLOPES OVER THREE FEET IN HEIGHT SHALL BE LANDSCAPED AND IRRIGATED.
- THE CONTRACTOR SHALL VERIFY THE EXISTENCE AND LOCATION OF ALL UTILITIES BEFORE COMMENCING WORK. NOTICE OF PROPOSED WORK SHALL BE GIVEN TO THE FOLLOWING AGENCIES:

UNDERGROUND SERVICE ALERT 1811

CITY OF SOLANA BEACH PUBLIC WORKS: 858 720-2470

- THE SOILS REPORT TITLED: UPDATED GEOTECHNICAL RECOMMENDATIONS: PROPOSED MAINTENANCE REPAIRS EXISTING LOWER BLUFF SEAWALL & SOUTH PROPERTY LINE UPPER BLUFF CAISSON SYSTEM DEL MAR BEACH CLUB HOA 825 S. SIERRA AVENUE, SOLANA BEACH, CALIFORNIA 92075, PREPARED BY SOIL ENGINEERING CONSTRUCTION, INC. AND DATED 04/03/21, SHALL BE CONSIDERED AS PART OF THIS GRADING PLAN, AND GRADING SHALL BE DONE IN ACCORDANCE WITH THE RECOMMENDATIONS AND SPECIFICATIONS CONTAINED IN SAID REPORT.
- APPROVAL OF THESE PLANS BY THE CITY ENGINEER DOES NOT AUTHORIZE ANY WORK OR GRADING TO BE PERFORMED UNTIL THE PROPERTY OWNER'S PERMISSION HAS BEEN OBTAINED AND A VALID GRADING PERMIT HAS BEEN ISSUED.
- THE CITY ENGINEER'S APPROVAL OF THESE PLANS DOES NOT CONSTITUTE THE BUILDING OFFICIALS' APPROVAL OF ANY FOUNDATION FOR STRUCTURES TO BE LOCATED ON THE AREA COVERED BY THESE PLANS. NO WATER OF THE GRADING ORDINANCE REQUIREMENTS CONCERNING MINIMUM COVER OVER EXPANSIVE SOILS IS MADE OR IMPLIED.
- ALL OPERATIONS CONDUCTED ON THE PREMISES, INCLUDING THE WARNING, U, REPAIR, REMOVAL, DEPARTURE OR RUNNING OF TRUCKS, EARTHMOVING EQUIPMENT, CONSTRUCTION EQUIPMENT, AND ANY OTHER ASSOCIATED GRADING EQUIPMENT SHALL BE LIMITED TO THE PERIOD BETWEEN 7:00 AM TO 6:00 PM, MONDAY THROUGH FRIDAY AND NO EARTHMOVING OR GRADING OPERATIONS SHALL BE CONDUCTED ON THE PREMISES ON SATURDAYS, SUNDAYS OR HOLIDAYS WITHOUT THE WRITTEN PERMISSION OF THE CITY ENGINEER.
- ALL MAJOR SLOPES SHALL BE ROUNDED INTO EXISTING TERRAIN TO PRODUCE A SMOOTH TRANSITION FROM CUT OR FILL SURFACES TO NATURAL GROUND AND ABUTTING CUT OR FILL SURFACES.
- TO WITHSTAND THE MINIMUM STANDARDS SET FORTH IN THE EXCAVATION AND GRADING CODE AND NOTWITHSTANDING THE APPROVAL OF THESE GRADING PLANS, THE PERMITTEE IS RESPONSIBLE FOR THE PREVENTION OF DAMAGE TO THE ADJACENT PROPERTY. NO PERSON SHALL EXCAVATE ON LAND SO CLOSE TO THE PROPERTY LINE AS TO ENDANGER ANY ADJACENT PUBLIC STREET, SIDEWALK, ALLEY, FUNCTION OF ANY SEWAGE DISPOSAL SYSTEM OR ANY OTHER PUBLIC OR PRIVATE PROPERTY WITHOUT SUPPORTING AND PROTECTING SUCH PROPERTY FROM SETTLING, CRACKING, EROSION, SILTING, SCOUR, OR OTHER DAMAGE WHICH MIGHT RESULT FROM THE GRADING DESCRIBED ON THIS PLAN. THE CITY WILL HOLD THE PERMITTEE RESPONSIBLE FOR CORRECTION ON NON-DEDICATED IMPROVEMENTS, WHICH DAMAGE ADJACENT PROPERTY.
- SLOPE RATIOS: CUT 2:1 FILL 2:1
CUT: 2:1 CY. FILL: 2:1 CY.
IMPORT/EXPORT: 3:1 CY.
NOTE: A SEPARATE PERMIT MUST EXIST FOR OFFSITE IMPORT OR EXPORT AREAS.
- SPECIAL CONDITIONS: IF ANY ARCHEOLOGICAL RESOURCES ARE DISCOVERED ON THE SITE OF THIS GRADING DURING GRADING OPERATIONS, SUCH OPERATIONS WILL CEASE IMMEDIATELY AND THE PERMITTEE WILL NOTIFY THE CITY ENGINEER OF THE DISCOVERY. GRADING OPERATIONS WILL NOT COMMENCE UNTIL THE PERMITTEE HAS RECEIVED WRITTEN AUTHORITY FROM THE CITY ENGINEER TO DO SO.
- THE CONTRACTOR SHALL NOTIFY THE CITY OF SOLANA BEACH AT (858) 720-2470, 24 HOURS BEFORE GRADING OPERATIONS ARE TO BE INITIATED.
- FINISHED GRADING AND PLANTING SHALL BE ACCOMPLISHED ON ALL SLOPES PRIOR TO OCTOBER 1, OR IMMEDIATELY UPON COMPLETION OF ANY SLOPES GRADED BETWEEN OCTOBER 1 AND APRIL 1. PRIOR TO ANY PLANTING, ALL LANDSCAPING SHALL BE APPROVED BY THE PLANNING DEPARTMENT AT THE DEVELOPMENT REVIEW STAGE, OR BY SEPARATE LANDSCAPING PLAN.
- ALL OFF-SITE MAIL ROUTES SHALL BE SUBMITTED BY THE CONTRACTOR TO THE CITY ENGINEER FOR APPROVAL 72 HOURS PRIOR TO BEGINNING WORK.

19. UPON FINAL COMPLETION OF THE WORK UNDER THE GRADING PERMIT, BUT PRIOR TO FINAL GRADING APPROVAL, AND/OR FINAL RELEASE OF SECURITY, AN AS-GRADED CERTIFICATE SHALL BE PROVIDED STATING: "THE GRADING UNDER PERMIT NO. _____ HAS BEEN PERFORMED IN SUBSTANTIAL CONFORMANCE WITH THE APPROVED GRADING PLAN OR AS SHOWN ON THE ATTACHED AS-GRADED PLAN." THIS STATEMENT SHALL BE FOLLOWED BY THE DATE AND SIGNATURE OF THE CIVIL ENGINEER WHO CERTIFIES SUCH GRADING OPERATION.

20. THE CONTRACTOR SHALL DESIGN, CONSTRUCT AND MAINTAIN ALL SAFETY DEVICES INCLUDING SHORING AND SHALL BE SOLELY RESPONSIBLE FOR CONFORMING TO ALL LOCAL, STATE AND FEDERAL SAFETY AND HEALTH STANDARDS, LAWS AND REGULATIONS.

EROSION CONTROL NOTES

- STORM WATER AND NON-STORM WATER DISCHARGE CONTROL: BEST MANAGEMENT PRACTICES SHALL BE DEVELOPED AND IMPLEMENTED TO MANAGE STORM WATER AND NON-STORM WATER DISCHARGES FROM THE SITE AT ALL TIMES DURING EXCAVATION, AND GRADING ACTIVITIES.
- EROSION AND SEDIMENT CONTROL: EROSION PREVENTION SHALL BE EMPHASIZED AS THE MOST IMPORTANT MEASURE FOR KEEPING SEDIMENT ON SITE DURING EXCAVATION AND GRADING ACTIVITIES. SEDIMENT CONTROLS SHALL BE USED AS A SUPPLEMENT TO EROSION PREVENTION FOR KEEPING SEDIMENT ON SITE.
- EROSION CONTROL ON SLOPES SHALL BE MITIGATED BY INSTALLING LANDSCAPING AS PER APPROVED LANDSCAPE PLANS AS REQUIRED BY THE DEVELOPMENT REVIEW CONDITIONS, OR BY TEMPORARY EROSION CONTROLS CONFORMING TO THE FOLLOWING:

NON-IRRIGATED HYDRUSED MIX WITH A BONDED FIBER MATRIX APPLIED AT 4,000 LB/ACRE

LB5/ACRE	% PURITY/ACRE	SEED SPECIES
20	70% PLUS	ATRIPEX GR CALICA
6		PLANTAGE INSULARIS
6		ENCELIS FARRANGSA
6		LOTUS SCOPARIUS
7	50% PLUS	EXCISCHIZIA CALIFORNIA

TOTAL 91 LBS.

4. THE TOPS OF ALL SLOPES TALLER THAN 5' SHALL BE DUNKED OR TRENCHED TO PREVENT WATER FLOWING OVER CRESTS OF SLOPES.
5. CATCH BASINS, DESILTING BASINS AND STORM DRAIN SYSTEMS SHALL BE INSTALLED TO THE SATISFACTION OF THE CITY ENGINEER.
6. SAND BAG CHECK DAMS, SILT FENCES, FIBER ROLLS OR OTHER APPROVED BMP'S SHALL BE PLACED IN UNPAVED AREAS WITH GRADIENTS IN EXCESS OF 2%, AS WELL AS AT OR NEAR EVERY POINT WHERE CONCENTRATED FLOW LEAVE THE SITE.
7. SAND BAGS SHALL BE PLACED ON THE UPSTREAM SIDE OF ALL DRAINAGE INLETS TO MINIMIZE SILT BUILDUP IN THE INLETS AND PIPES.
8. THE CONTRACTOR SHALL REPAIR ANY ERODED SLOPES AS DIRECTED BY THE OFFICE OF THE CITY ENGINEER.
9. THE CONTRACTOR SHALL SWEEP ROADWAYS AND ENTRANCES TO AND FROM THE SITE ON A REGULAR BASIS TO KEEP THEM FREE OF SOIL ACCUMULATION AND AT ALL OTHER TIMES DIRECTED BY THE CITY ENGINEER.
10. THE CONTRACTOR SHALL WATER SITE ON A CONTINUOUS BASIS TO MINIMIZE AIR BORNE DUST CREATED FROM GRADING AND HAULING OPERATIONS OR EXCESSIVE WIND CONDITIONS, AND AT ALL TIMES DIRECTED BY THE CITY ENGINEER.
11. IN THE EVENT SILT DOES ENTER THE EXISTING PUBLIC STORM DRAIN SYSTEM, REMOVAL OF THE SILT FROM THE SYSTEM WILL BE AT THE DEVELOPER'S EXPENSE.

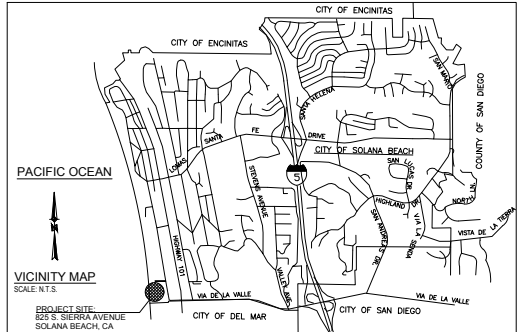

AS-BUILT:

UPON COMPLETION, AND PRIOR TO RELEASING THE SECURITIES, THE ENGINEER OF WORK SHALL "AS-BUILT" THE ORIGINAL MYLAR PLANS. INITIALLY, TWO COPIES OF RED-LINED PLANS SHOWING ALL AS-BUILT INFORMATION, INCLUDING ALL NEW UNDERGROUND FACILITIES (MAIN LINES, SERVICES AND LATERALS), IS TO BE SUBMITTED TO THE ENGINEERING DEPARTMENT. WHEN THE RED LINES ARE APPROVED, THE ORIGINAL MYLAR PLANS WILL BE CHECKED OUT TO THE ENGINEER. THE ENGINEER SHALL MAKE THE CHANGES, SIGN EACH SHEET UNDER "AS-BUILT", AND RETURN ORIGINAL MYLAR TO THE CITY.

FLOOD STATEMENT

I, _____, A REGISTERED CIVIL ENGINEER/SURVEYOR, HEREBY CERTIFY THAT THE PAID STRUCTURES SHOWN ON THIS AS-BUILT GRADING PLAN HAVE BEEN VERIFIED BY ME AND THAT SAID ELEVATIONS ARE AT OR ABOVE THE BASE FLOOD ELEVATION SHOWN ON THE FLOOD INSURANCE RATE MAP OF THE COUNTY OF SAN DIEGO.

SIGNED _____ DATE 04/03/21
R.C.E. NO. 1649 EXP. 03/025

OWNER/DEVELOPER CERTIFICATE

I, _____, AS OWNER/DEVELOPER OF THE PROPERTY DESCRIBED HEREIN, ACKNOWLEDGE THESE PLANS HAVE BEEN PREPARED AT MY DIRECTION WITH MY FULL CONSENT, I FULLY UNDERSTAND AND ACCEPT THE TERMS AND CONDITIONS CONTAINED HEREIN AND AS ATTACHED BY REFERENCE ON THIS GRADING PLAN.

IT IS FURTHER AGREED THAT THE OWNER/DEVELOPER SHALL HAVE A REGISTERED CIVIL ENGINEER MAKE SUCH CHANGES, ALTERATIONS OR ADDITIONS TO THESE PLANS WHICH THE CITY ENGINEER DETERMINES ARE NECESSARY AND DESIRABLE FOR THE PROPER COMPLETION OF THE IMPROVEMENTS.

I FURTHER AGREE TO COMMENCE WORK ON ANY IMPROVEMENTS SHOWN ON THESE PLANS WITHIN EXISTING CITY RIGHT-OF-WAY WITHIN 9 MONTHS AFTER ISSUANCE OF THE CONSTRUCTION PERMIT AND TO PURSUE SUCH WORK ACTIVELY ON EVERY NORMAL WORKING DAY UNTIL COMPLETED, RESPECTIVE AND INDEPENDENT OF ANY OTHER WORK ASSOCIATED WITH THIS PROJECT OR UNDER MY CONTROL.

PROJECT SCOPE

PHASE 1 OF THIS PROJECT INCLUDES STRUCTURAL REPAIRS TO THE APPROXIMATE 170 FT LONG SOUTHERN SEGMENT OF THE COASTAL BLUFF SEAWALL EXTENDING FROM THE BEACH ACCESS STARWAY TO THE SOUTHERN PROPERTY LINE AND TO THE (2) CONCRETE COLLUMNS THAT SUPPORT THE LOWER PLATFORM LANDING OF THE BEACH-ACCESS STARWAY. THERE IS ALSO AN APPROXIMATE 100 FT LONG SEGMENT OF THE UPPER BLUFF ALONG THE SOUTHERN PROPERTY LINE THAT IS TO BE FILLED WITH NEW SHOTCRETE

GENERAL NOTES:

- GENERAL**
- MATERIALS AND WORKMANSHIP** TO CONFORM WITH THE 2022 EDITION OF THE CALIFORNIA BUILDING CODE WITH CITY OF SOLANA BEACH AMENDMENTS AND THE REQUIREMENTS OF THE CONTRACT DOCUMENTS.
- REFERENCE TO CODES, RULES, REGULATIONS, STANDARDS, MANUFACTURERS INSTRUCTIONS OR REQUIREMENTS OF REGULATORY AGENCIES IS TO THE LATEST PRINTED EDITION OF EACH IN EFFECT AT THE DATE OF SUBMISSION OF BID UNLESS THE DOCUMENT DATE IS SHOWN.**
- DRAWINGS INDICATE GENERAL AND TYPICAL DETAILS OF CONSTRUCTION.** WHERE CONDITIONS ARE NOT SPECIFICALLY INDICATED BUT ARE OF SIMILAR CHARACTER TO DETAILS SHOWN, USE SIMILAR DETAILS OF CONSTRUCTION, SUBJECT TO REVIEW BY THE ENGINEER.
- DETAILS ON SHEETS TITLED "TYPICAL DETAILS" APPLY TO SITUATIONS OCCURRING ON THE PROJECT THAT ARE THE SAME OR SIMILAR TO THOSE SPECIFICALLY REFERENCED.** SUCH DETAILS ARE NOT NOTED AT EACH LOCATION THAT THEY OCCUR.
- DO NOT SCALE THE DRAWINGS.**
- PROVIDE MEASURES NECESSARY TO PROTECT THE STRUCTURE DURING CONSTRUCTION.** SUCH MEASURES INCLUDE, BUT MAY NOT BE LIMITED TO, BRACING AND SHORING FOR LOADS DURING CONSTRUCTION. RETAIN A REGISTERED CIVIL ENGINEER WHO IS PROPERLY QUALIFIED TO DESIGN BRACING, SHORING, ETC. VISITS TO THE SITE BY THE ENGINEER WILL NOT INCLUDE OBSERVATION OF THE ABOVE NOTED ITEMS.
- INFORMATION SHOWN ON THE DRAWINGS RELATED TO EXISTING CONDITIONS REPRESENTS THE PRESENT KNOWLEDGE, BUT WITHOUT GUARANTEE OF ACCURACY.** REPORT CONDITIONS THAT CONFLICT WITH THE CONTRACT DOCUMENTS TO THE ENGINEER. DO NOT DEVIATE FROM THE CONTRACT DOCUMENTS WITHOUT WRITTEN DIRECTION FROM THE ENGINEER.
- THE CONTRACTOR IS SOLELY RESPONSIBLE FOR PROVIDING A SAFE PLACE TO WORK AND MEETING THE REQUIREMENTS OF ALL APPLICABLE JURISDICTIONS. EXECUTE WORK TO ENSURE THE SAFETY OF PERSONS AND ADJACENT PROPERTY AGAINST DAMAGE BY FALLING DEBRIS AND OTHER HAZARDOUS CONNECTION WITH THIS WORK.**
- NOTWITHSTANDING THE MINIMUM STANDARDS SET FORTH IN THE EXCAVATION AND GRADING CODE, AND NOTWITHSTANDING THE APPROVAL OF THESE GRADING PLANS, THE PERMITEE IS RESPONSIBLE FOR THE PROTECTION OF THE ADJACENT PROPERTY.** NO PERSON SHALL EXCAVATE ON LAND SO CLOSE TO THE PROPERTY LINE AS TO ENDANGER ANY ADJOINING PUBLIC STREET, SIDEWALK, ALLEY, FUNCTION OF ANY SEWER DISPOSAL SYSTEM, OR ANY OTHER PUBLIC OR PRIVATE PROPERTY WITHOUT SUPPORTING AND PROTECTING SUCH PROPERTY FROM SETTLING, CRACKING, EROSION, SLIDING, SCOUR OR OTHER DAMAGE WHICH MIGHT RESULT FROM THE GRADING DESCRIBED IN THIS PLAN. THE CITY WILL HOLD THE PERMITEE RESPONSIBLE FOR CORRECTION ON NON-GUARANTEED IMPROVEMENTS, WHICH DAMAGE ADJACENT PROPERTY.
- THE DESIGN IS BASED ON ANTICIPATED SOIL CONDITIONS ON THE BASIS OF THE BORINGS AND SOIL REPORT PREPARED BY SOIL ENGINEERING CONSTRUCTION, TITLED "UPDATED GEOTECHNICAL RECOMMENDATIONS FOR PROPOSED IMPROVEMENTS TO THE EXISTING LOWER BLUFF SEAWALL & SOUTH PROPERTY LINE UPPER BLUFF CAISSON SYSTEM", DATED FEBRUARY 8, 2022. IF THE SOIL FIELD CONDITIONS VARY FROM THE ASSUMED CONDITIONS, ADJUSTMENTS WILL BE MADE AT THE DIRECTION OF THE GEOTECHNICAL ENGINEER AND THE STRUCTURAL ENGINEER.**
- ELEVATIONS SHOWN ARE FROM THE ORIGINAL DRAWINGS. VERIFY IN FIELD & NOTIFY ENGINEER OF ANY DISCREPANCIES BEFORE PROCEEDING.**
- SUBMITTALS**
- SUBMIT REQUIRED SUBMITTALS TO THE ENGINEER FOR REVIEW.**
- CONCRETE REINFORCING STEEL:**
A. SHOP DRAWINGS FOR FABRICATION, BENDING AND PLACEMENT OF CONCRETE REINFORCEMENT IN ACCORDANCE WITH ACI 315 DETAILS AND DETAILING OF CONCRETE REINFORCEMENT.
B. CAST-IN-PLACE CONCRETE: MIX DESIGNS PREPARED, STAMPED AND SIGNED BY A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF CALIFORNIA FOR EACH CLASS OF CONCRETE. INCLUDE RESULTS OF SLUMP, SHRINKAGE AND COMPRESSION TESTS USED TO ESTABLISH MIX PROPORTIONS AND CERTIFIED MATERIAL CERTIFICATES FOR EACH COMPONENT OF THE MIX.
C. PROPOSED CONSTRUCTION JOINT AND CONTROL JOINT LOCATIONS FOR REVIEW.
D. PRODUCT DATA FOR CURING MATERIALS.
E. PRODUCT DATA FOR NON-SHRINK GROUT.
- SHOTCRETE:**
A. MIX DESIGNS PREPARED, STAMPED AND SIGNED BY A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF CALIFORNIA FOR EACH CLASS OF CONCRETE. INCLUDE RESULTS OF SLUMP, SHRINKAGE AND COMPRESSION TESTS USED TO ESTABLISH MIX PROPORTIONS AND CERTIFIED MATERIAL CERTIFICATES FOR EACH COMPONENT OF THE MIX.
B. PROPOSED CONSTRUCTION JOINT AND CONTROL JOINT LOCATIONS FOR REVIEW.
C. PRODUCT DATA FOR CURING MATERIALS.
- STRUCTURAL STEEL:**
A. SHOP DRAWINGS PRIOR TO FABRICATION IN ACCORDANCE WITH AISC 303 CODE OF STANDARD PRACTICE FOR STEEL BUILDINGS AND BRIGES.
B. SIGNED WELDING PROCEDURE SPECIFICATION (WPS) PER AWS D1.1 FOR EACH TYPE OF WELD TO BE USED ON THE PROJECT AND PRODUCT DATA FOR WELDING ELECTRODES, CLEARLY IDENTIFY WELD LOCATIONS FOR USE OF ELECTRODES.
- ADHESIVE ANCHORS:**
A. PRODUCT DATA FOR EACH TYPE OF ADHESIVE ANCHORING SYSTEM USED.
- SEQUENCING PLAN FOR ALL WORK, INCLUDING DEMOLITION AND COLUMN SHORING, INDICATING SEQUENTIAL AND CONCURRENT OPERATIONS.**
- SHOP DRAWINGS FOR ALL TIEBACKS INDICATING THE ASTM MATERIAL DESIGNATIONS, MEMBER DIMENSIONS, INSTALLATION LOCATIONS, EMBEDMENT DEPTHS, DESIGN LOADS, AND CONNECTING DETAILS TO BE SHOWN AT EACH LOCATION FOR USE OF ELECTRODES.**
- CERTIFIED MILL TEST REPORTS FOR EACH OF THE FOLLOWING:**
A. EACH EACH TYPE OF TIEBACK.
B. TEST DATA CERTIFYING THAT TIEBACK HAS SUITABLE PHYSICAL PROPERTIES TO FULLY DEVELOP THE MINIMUM GUARANTEED ULTIMATE TENSILE STRENGTH OF THE TIEBACK.

- FORMWORK**
- DESIGN AND CONSTRUCT FORMWORK IN ACCORDANCE WITH ACI 347 "RECOMMENDED PRACTICE FOR CONCRETE FORMWORK" AND ACI 301 "SPECIFICATIONS FOR STRUCTURAL CONCRETE" UNLESS OTHERWISE NOTED.**
- PROVIDE FOUR POCKETS IN FORMS AND UNDER EXISTING STRUCTURAL MEMBERS AS REQUIRED TO PREVENT AIR POCKETS AND/OR "HONEYCOMB" UNDER OR AROUND THE EXISTING MEMBERS. CONCRETE CAST WITH AIR POCKETS AND/OR "HONEYCOMB" UNDER OR AROUND THE MEMBERS IS NOT ACCEPTABLE.**
- PROVIDE 3/4 INCH x 3/4 INCH CHAMFER STRIPS ON ALL EXTERNAL CORNERS OF BEAMS, COLUMNS AND WALLS, UNLESS OTHERWISE NOTED.**
- REMOVE FORMS AND SHORES IN ACCORDANCE WITH THE FOLLOWING:**

LOCATION	REMOVE NO SOONER THAN
BOTTOM FORMS AND SHORES FOR MILDLY REINFORCED SLABS, BEAMS AND GIRDERS	7 DAYS AND 1 1/2 - 3000 PSI MINIMUM
SIDE FORMS FOR BEAMS AND GIRDERS	72 HOURS
COLUMNS AND WALLS	72 HOURS
FOOTINGS AND GRADE BEAMS	48 HOURS
- FOAM FILL: ASTM C919, EXPANDED POLYSTYRENE (EPS) WITH MINIMUM COMPRESSIVE STRENGTH OF 40 PSI AT 10% DEFORMATION.**
- REINFORCING STEEL**
- FABRICATE AND PLACE REINFORCING STEEL IN ACCORDANCE WITH ACI 315 "DETAILS AND DETAILING OF CONCRETE REINFORCEMENT" AND ACI 301 "SPECIFICATIONS FOR STRUCTURAL CONCRETE, UNLESS OTHERWISE NOTED.**
- REINFORCING TO CONFORM TO THE FOLLOWING, UNLESS OTHERWISE NOTED:**
 - REINFORCING STEEL:**
TYPE
#8 AND SMALLER
#8 AND SMALLER
#6 AND SMALLER
WIRE POST-TENSIONING STRAND
WIRE FABRIC
SMOOTH DOWELS IN SLAB ON GRADE
ASTM A615, 60 KSI
ASTM A615, 60 KSI
ASTM A615, 75 KSI
ASTM A416, 270 KSI
ASTM A185, 70 KSI
ASTM A36, 36 KSI
 - MECHANICAL COUPLERS:** TYPE 2 PER ACI-318, UNLESS OTHERWISE NOTED.
 - WELD REINFORCING STEEL IN ACCORDANCE WITH AWS D1.4 USING QUALIFIED WELDERS.**
 - TERMINATE REINFORCING STEEL IN STANDARD HOOKS, UNLESS OTHERWISE SHOWN.**
 - ALL STEEL REINFORCEMENT TO EPOXY COATED**
- EPOXY-COATED REINFORCEMENT**
- REINFORCEMENT SHALL BE SHOP FABRICATED PRIOR TO COATING AND SHALL CONFORM TO THE REQUIREMENTS OF AASHTO M 284.**
- VISIBLE VOIDS IN THE COATING, REGARDLESS OF CAUSE, SHALL BE PATCHED IF THE TOTAL AREA OF VOIDS EXCEEDS 0.2% OF THE SURFACE AREA OF THE BAR. BARS THAT REQUIRE SURFACE AREA PATCHING LESS THAN 0.1% OF THE TOTAL SURFACE AREA OF THE BAR MAY BE FIELD COATED WITH AN APPROVED PATCH MATERIAL SUPPLIED BY THE EPOXY FABRICATOR. BARS WHICH REQUIRE SURFACE PATCHING IN EXCESS OF 0% OF THE TOTAL SURFACE AREA OF THE BAR WILL BE REJECTED.**
- ALL SYSTEMS FOR HANDLING COATED BARS SHALL HAVE PADDED CONTACT AREAS FOR THE BARS WHENEVER POSSIBLE. ALL BUNDLING BANDS SHALL BE PADDED AND ALL BUNDLES WILL BE LIFTED WITH STRONG BACK, MULTIPLE SUPPORTS OR A PLATFORM BRIDGE SO AS TO PREVENT BAR-TO-BAR ABRASION FROM SAGS IN THE BAR BUNDLE.**
- ALL STEEL REINFORCEMENT TO BE EPOXY COATED.**
- CAST-IN-PLACE CONCRETE**
- PROPORTION, MIX, TRANSPORT AND PLACE CAST-IN-PLACE CONCRETE IN ACCORDANCE WITH ACI 301 "SPECIFICATIONS FOR STRUCTURAL CONCRETE" UNLESS OTHERWISE NOTED.**
- CONCRETE IS REINFORCED AND CAST-IN-PLACE UNLESS OTHERWISE NOTED. WHERE REINFORCING IS NOT SPECIFICALLY SHOWN OR WHERE DETAILS ARE NOT GIVEN, PROVIDE REINFORCING SIMILAR TO THAT SHOWN FOR SIMILAR CONDITIONS, SUBJECT TO REVIEW BY THE ENGINEER'S REPRESENTATIVE.**
- ROUGHEN CONCRETE SURFACES OF CONSTRUCTION JOINTS TO 1/4 INCH AMPLITUDE AND CLEAN OF LANTAGE, FOREIGN MATTER, AND LOOSE PARTICLES AT THE FOLLOWING LOCATIONS (WHERE CAST AGAINST EXISTING CONCRETE: AT WALL, COLUMN AND BEAM JOINTS; WHERE CAST EXISTING MASONRY/STONE, ETC.)**
- REFER TO ARCHITECTURAL AND MECHANICAL DRAWINGS FOR LOCATIONS OF ADDITIONAL CONCRETE CURBS AND HOUSEKEEPING PADS NOT SHOWN.**
- CONCRETE CLEAR COVER TO REINFORCING BARS IS AS FOLLOWS, UNLESS OTHERWISE NOTED:**

LOCATION	CLEAR COVER
CONCRETE PLACED AGAINST EARTH	3 INCHES
CONCRETE SURFACES EXPOSED TO WEATHER OR IN CONTACT WITH EARTH:	
#2 BARS AND SMALLER	2 INCHES
#3 BARS AND SMALLER	1 1/2 INCHES
SLABS, ORDERED AND COLUMNS NOT EXPOSED TO WEATHER OR EARTH	1 1/2 INCHES
WALL SLAB SURFACES NOT EXPOSED TO WEATHER OR EARTH:	
#2 & SMALLER	3/4 INCH
#3	1 INCH
#4, #5, #6 & #11	1 1/2 INCHES
#1 & #18	2 1/2 INCHES

- CONCRETE TYPES:**
 - SEAWALL AND BLUFF WEILL-
 - 28-DAY STRENGTH: FC = 5,000 PSI
 - WORKING WEIGHT
 - WATER-CEMENT RATIO: 0.40 MAX
 - WATER-SOLUBLE CHLORIDE ION CONTENT IN CEMENT: 0.15 MAX
 - WATER-SOLUBLE CHLORIDE ION CONTENT THAT IS CONTRIBUTED FROM THE INGREDIENTS INCLUDING WATER AGGREGATES, CEMENTITIOUS MATERIALS, AND ADMIXTURES SHALL BE DETERMINED ON THE CONCRETE MIXTURE BY ASTM C1121 AT AGE BETWEEN 28 AND 42 DAYS.
- DRYING SHRINKAGE:** PER ASTM C192 & C157, MEASURED AT 28 DAYS AIR DRY AGE.
 - TYPICAL 0.15% MAXIMUM
 - PROVIDE SHRINKAGE REDUCING ADMIXTURE WHEN SHRINKAGE TEST DATA NOT AVAILABLE.
- FLY ASH:** ASTM C618, CLASS F. MINIMUM OF (2%) PERCENT OF CEMENTITIOUS MATERIAL BY WEIGHT.
- ADMIXTURES TO BE COMPATIBLE WITH ALL OTHER COMPONENTS IN THE MIX AND INCLUDED IN THE MIX DESIGN. WHEN USED COMPLY THE FOLLOWING:**
 - OR ENTRAINMENT: ASTM C269
 - WATER REDUCING, RETARDING AND ACCELERATING: ASTM C494, TYPES A THROUGH G.
 - SHRINKAGE REDUCING: ASTM C494 & ASTM C157.
- CONTINUOUSLY MOIST CURE CONCRETE SLABS ON GRADE FOR 7 DAYS MINIMUM USING WATER FOG SPRAYS, PONDING, SATURATED ABSORPTIVE COVERS OR MOISTURE RETAINING COVERS.**
- LIQUID CURING COMPOUND:** ASTM C309, TYPE I, CLEAR OR TRANSLUCENT.
 - FOR SURFACES TO BE FINISHED, CONFIRM THAT CURING COMPOUND IS COMPATIBLE WITH FINISH.
- NON-SHRINK GROUT:** ASTM C1107, WITH MINIMUM COMPRESSIVE STRENGTH OF 7,000 PSI.
- SHOTCRETE**
- PROPORTION, MIX, TRANSPORT AND PLACE SHOTCRETE IN ACCORDANCE WITH ACI 308.2 "SPECIFICATION FOR SHOTCRETE" WITH TOLERANCES SHOWN IN SHOTCRETE TO CONFORM TO ACI 117 "STANDARD SPECIFICATION FOR TOLERANCES FOR CONCRETE CONSTRUCTION AND MATERIALS" FOR CAST-IN-PLACE CONCRETE.**
- USE SHOTCRETE ONLY WHERE DESIGNATED ON THE DRAWINGS. NO SUBSTITUTION OF SHOTCRETE FOR CAST-IN-PLACE CONCRETE IS ALLOWED.**
- COMPLY WITH THE REQUIREMENTS OF THE CAST-IN-PLACE CONCRETE AND REINFORCING STEEL SECTIONS OF THESE GENERAL NOTES, EXCEPT AS MODIFIED IN THIS SECTION.**
- SHOTCRETE TYPES:**

ROD DIA OR BAR SIZE	CMN	TEST LOAD (LBS)	
		ANCHOR LOCATED < 6" FROM EDGE	ANCHOR LOCATED 6" - 12" FROM EDGE
3/8", #3	2"	1,300	1,600
1/2", #4	2 1/2"	2,000	3,400
5/8", #5	3"	2,800	4,200
3/4", #6	4"	3,700	5,000
7/8", #7	4 1/2"	3,700	5,000
1", #8	5"	4,800	6,100
- MAXIMUM AGGREGATE SIZE:** 3/8 INCH
- MEAN CORE GRADE PER ACI 506.2 2.5**
- A PREQUALIFICATION TEST PANEL IS REQUIRED FOR EACH HOZZLEMAN. EACH TEST PANEL TO BE 4 FEET BY 4 FEET BY 8 INCHES THICK AND TO HAVE REINFORCING STEEL SIMILAR TO THE MOST CONGESTED CONDITION ON THE PROJECT. A MEAN TEST PANEL, CORE GRADE IS REQUIRED FOR EACH HOZZLEMAN.**
- CLEAN SUBSTRATES AND FORMS OF LOOSE OR UNDESIRABLE MATERIAL PRIOR TO THE PLACEMENT OF SHOTCRETE. WET CEMENTITIOUS OR ABSORPTIVE SUBSTRATES AND FORMS PRIOR TO SHOOTING. DO NOT PLACE SHOTCRETE AGAINST SURFACES WITH STANDING OR RUNNING WATER.**
- COMPLETELY FILL AREAS AND COMPLETELY ENCASE REINFORCEMENT. REMOVE REBOUND AND OTHER LOOSE MATERIAL FROM NEW CONSTRUCTION.**
- DO NOT REBOUND OR OVERSPRAY.**
- FINISHED APPEARANCE / COSMETIC SHOTCRETE: IF IS THE INTENT OF THESE SPECIFICATIONS THAT THE COMPLETE FACE OF SHOTCRETE ON ANCHORED WALLS HAVE AN UNEVEN SURFACE PROFILE AND COLOR SIMILAR IN APPEARANCE TO THAT OF THE ADJACENT BLUFFS.**
- KEEP SHOTCRETE CONTINUOUSLY MOIST BY DIRECT WATER APPLICATION FOR 24 HOURS AFTER SHOOTING. FOLLOW BY CURING THE SHOTCRETE WITH A FOG SPRAY OR AN APPROVED MOISTURE-RETAINING COVER, MEMBRANE, OR CURING COMPOUND UNTIL 7 DAYS AFTER SHOOTING.**
- LIQUID CURING COMPOUND:** ASTM C309, TYPE I, CLEAR OR TRANSLUCENT.
 - FOR SURFACES TO BE FINISHED, CONFIRM THAT CURING IS COMPATIBLE WITH FINISH.
 - APPLY AT TWICE THE MANUFACTURER'S RECOMMENDED COVERAGE.
- STRUCTURAL STEEL**
- FABRICATE AND WELD STRUCTURAL STEEL IN ACCORDANCE WITH AISC 360, AISC 303 AND AISC 340. EXECUT CONNECTIONS TO CONFORM TO AWS D1.1 AND AISC 341.**
- STRUCTURAL STEEL TO CONFORM TO THE FOLLOWING UNLESS OTHERWISE NOTED:**

SECTIONS	TYPE
ROLLED SHAPES:	
WIDE FLANGES	ASTM A992
CHANNELS, ANGLES, & OTHER	ASTM A36
PLATES:	
COLUMN BASE PLATES	ASTM A572, GR 50
BRACE CURSET PLATES	ASTM A572, GR 50
BEAM SHEAR CONNECTION PLATES	ASTM A572, GR 50
COLUMN GUSSET PLATES	ASTM A572, GR 50
BEAM STIFFENER PLATES	ASTM A36
EDGE OF DECK BENT PLATE	ASTM A36
OTHER	ASTM A572, GR 50
STEEL PIPE	ASTM A53 GRADE B
COLD FORMED STRUCTURAL TUBING (HSS)	ASTM A500 GRADE B
STAINLESS STEEL SHAPES, PLATES & BARS	ASTM A276, TYPE 304L
BOLTS	ASTM F1554, GRADE A308, F192X
MACHINE BOLTS	ASTM A307, GRADE A
STAINLESS STEEL BOLTS	ASTM A193, B16, CLASS 1
ANCHOR RODS	ASTM A154, GR55 W WELDABLE SUPPLIES
	ASTM A163(A572, GR50)
ALL-THREAD ROD AND THRU BOLTS	ASTM A193 B7, GR105
HIGH STRENGTH ALL-THREAD ROD	ASTM A193 B7, CLASS 2
STAINLESS STEEL ALL-THREAD ROD	ASTM A193 B7M, CLASS 2
HANGER ROD	ASTM A572, GR50
WELDED SHEAR STUD CONNECTORS	ASTM A108, GRADE 1015 TO 1020
WELDED THREADED STUDS	ASTM A108, GRADE 1015 TO 1020
NUTS FOR BOLTS AND MACHINE BOLTS	ASTM A409
STAINLESS STEEL NUTS	ASTM A194 GRIM
HARDENED WASHERS FOR BOLTS	ASTM A194, ANSI B18.22.1
STAINLESS STEEL WASHERS	ASTM A193, TYPE 304
BEVELED WASHERS	ANSI B18.23.1
- HOT DIP GALVANIZE IN ACCORDANCE WITH ASTM A123 AND ASTM A153 STRUCTURAL STEEL AND FASTENERS. REPAIR GALVANIZING AFTER WELDING IN ACCORDANCE WITH ASTM A780. HOT DIP GALVANIZE ASTM F1554 BOLTS IN ACCORDANCE WITH ASTM F2239.**

- ARC-WELDING ELECTRODES/FILLER METALS TO BE LOW HYDROGEN TYPES E70TXX, E7XTXX OR E70XX MINIMUM AS APPLICABLE. ELECTRODES WITH CHERRY V ANCHOR TESTS VALUES OF A MINIMUM 20 FOOT POUNDS AT 4 DEGREES FAHRENHEIT AND 40 FOOT POUNDS AT 70 DEGREES FAHRENHEIT ARE TO BE USED AT ALL WELDS ON THE VESSELS FORCE RESISTING SYSTEM (FSRS), WHERE DESIGNATED "DC" ON THE DRAWINGS AND THE FOLLOWING LOCATIONS:**
 - COMPLETE JOINT PENETRATION WELDS.
 - BEAM TO COLUMN MEMBER CONNECTIONS - INCLUDING FLANGE, WEB DOUBLER PLATES, BASE PLATES, AND CONTINUITY PLATE FLARE AND PARTIAL JOINT PENETRATION WELDS.
 - BRACE CONNECTIONS - INCLUDING BRACE, GUSSET, BASE PLATES, BEAM STIFFENER PLATES, AND CONTINUITY PLATE FLARE AND PARTIAL JOINT PENETRATION WELDS.
 - COLLECTORS - SHEAR TABS, FLANGE AND WEB WELDS.
- WELDERS TO BE QUALIFIED IN ACCORDANCE WITH AWS D1.1 WITH SUPPLEMENTAL QUALIFICATIONS PER AWS D1.8.**
- WHERE FELD WELDING IS NOTED, THE DESIGNATION IS GIVEN AS A SUGGESTED CONSTRUCTION PROCEDURE ONLY.**
- ADHESIVE ANCHORS AND DOWELS**
- ANCHORS AND DOWELS INSTALLED INTO CONCRETE:** HLT-HIT-800-V3 (ICC-ESR-3814), SIMPSON STRONG-TIE SET 3G (ICC-ESR-4007) OR DEWALT FURU-110 (ICC-ESR-3288). ALL EMBEDMENT DEPTHS NOTED ON DRAWINGS ARE EFFECTIVE EMBEDMENT PER MANUFACTURER.
- THE TESTING LABORATORY IS TO PERFORM TENSION TESTS ON 10% OF ANCHORS AND DOWELS INSTALLED INTO CONCRETE TO THE FOLLOWING TEST LOADS:**

ROD DIA OR BAR SIZE	CMN	TEST LOAD (LBS)	
		ANCHOR LOCATED < 6" FROM EDGE	ANCHOR LOCATED 6" - 12" FROM EDGE
3/8", #3	2"	1,300	1,600
1/2", #4	2 1/2"	2,000	3,400
5/8", #5	3"	2,800	4,200
3/4", #6	4"	3,700	5,000
7/8", #7	4 1/2"	3,700	5,000
1", #8	5"	4,800	6,100

- ANCHORS AND DOWELS INSTALLED INTO UNREINFORCED BRICK MASONRY (URM):** HLT-HV 270 (ICC-ESR-414), SIMPSON STRONG-TIE SET (ICC-ESR-1772, OR DEWALT AC108-GOLD (ICC-ESR-4105). USE SCREENS AS SPECIFIED BY THE MANUFACTURER.
- ANCHORS:** ASTM A36 THREADED RODS WITH ASTM A563 GRADE 8 NUTS AND ANSI B18.22.1 TYPE A WASHERS, UNLESS OTHERWISE NOTED. ANCHORS DESIGNATED AS ASTM A193 GRADE B7 THREADED RODS TO USE ASTM A563 GRADE 8H HEAVY HEX NUTS AND ASTM A536 WASHERS.
- REBAR DOWELS:** ASTM A615 GRADE 60 REINFORCING STEEL.
- INSTALL ANCHORS IN ACCORDANCE WITH LATEST ICC-ESR REPORT AND MANUFACTURER INSTRUCTIONS.**
- IF REINFORCEMENT IS ENCOUNTERED DURING DRILLING, ABANDON AND SHIFT THE HOLE LOCATION TO AVOID THE REINFORCEMENT. PROVIDE A MINIMUM OF ANCHOR DIAMETERS OR 1 INCH, WHICHEVER IS LARGER, OF SOLID CONCRETE BETWEEN THE DOWEL AND THE ABANDONED HOLE. FILL THE ABANDONED HOLE WITH NON-SHRINK GROUT. IF THE ANCHOR OR DOWEL MAY NOT BE SHIFTED AS NOTED ABOVE, THE ENGINEER WILL DETERMINE A NEW LOCATION.**
- LOCATE REINFORCEMENT AND CONFIRM FINAL ANCHOR LOCATIONS PRIOR TO FABRICATING PLATES, MEMBERS, OR OTHER STEEL ASSEMBLIES ATTACHED WITH ADHESIVE ANCHORS.**
- EROSION CONTROL NOTES**
- STORM WATER AND NON-STORM WATER DISCHARGE CONTROL: BEST MANAGEMENT PRACTICES SHALL BE DEVELOPED AND IMPLEMENTED TO MANAGE STORM WATER AND NON-STORM WATER DISCHARGES FROM THE SITE AT ALL TIMES DURING EXCAVATION AND GRADING ACTIVITIES.**
- EROSION AND SEDIMENT CONTROL: EROSION PROTECTION SHALL BE EMPHASIZED AS THE MOST IMPORTANT MEASURE FOR KEEPING SEDIMENT ON SITE DURING EXCAVATION AND GRADING ACTIVITIES. SEDIMENT CONTROLS SHOULD BE USED AS A SUPPLEMENT TO EROSION PREVENTION FOR KEEPING SEDIMENT ON SITE.**
- THE TOPS OF ALL SLOPES SHALL BE BEEKED OR TRENCHEED TO PREVENT WATER FLOWING OVER CRESTS OF SLOPES.**
- THE CONTRACTOR SHALL REPAIR ANY ERODED SLOPES AS DIRECTED BY THE OFFICE OF THE CITY ENGINEER.**
- THE CONTRACTOR SHALL SWEEP ROADWAYS AND ENTRANCES TO AND FROM THE SITE ON A REGULAR BASIS TO KEEP THEM FREE OF SOIL ACCUMULATION AND AT ALL OTHER TIMES DIRECTED BY THE CITY ENGINEER.**
- THE CONTRACTOR SHALL WATER SITE ON A CONTINUOUS BASIS TO MINIMIZE AIR BORNE DUST CREATED FROM GRADING AND HAULING OPERATIONS OR EXCESSIVE WIND CONDITIONS, AND AT ALL TIMES DIRECTED BY THE CITY ENGINEER.**
- THE EVENT SHALL THE DOES ENTER THE EXISTING PUBLIC STORM DRAIN SYSTEM, REMOVE THE SILT FROM THE SYSTEM WILL BE AT THE CONTRACTOR'S EXPENSE.**

D:\My Projects\2023\1676031-00_Del Mar Beach Club - Sewell_S20_Branch\367WFLV.rvt

GENERAL NOTES CONT:

- XI. PERMANENT TIEBACKS**
 1. PERMANENT TIEBACK ROOS SHALL BE COLD STRETCHED HIGH STRENGTH ALLOY TIEBACKS (STEEL BARS) (TENSILE STRENGTH) CONFORMING TO ASTM A722 WITH A MINIMUM ULTIMATE TENSILE STRENGTH OF 150,000 PSI (REGULAR GRADE REINFORCING BARS). THE UNBONDED LENGTH SHALL BE 12 INCHES MINIMUM IN A SMOOTH PLASTIC SHEATHING, SUCH AS PVC OR POLYETHYLENE, TO PREVENT BRUISING. RODS SHALL BE FULL LENGTH WITH NO SPLICES OR COUPLERS, UNKINKED, AND FREE FROM NICKS OR ABRASIONS.
 2. PERMANENT TIEBACK STRANDS SHALL BE EPOXY COATED, EPOXY FILLED IN THE INTERSTICES BETWEEN THE STRAND WIRES, GRI-IMPREGNATED, 0.6-INCH NOMINAL DIAMETER LOW-RELAXATION STRAND, CONSISTING OF 7 STRESS-RELIEVED STEEL STRANDS. THE STRAND SHALL BE IN ACCORDANCE WITH ASTM A852. THE STEEL STRANDS BENEATH THE COATING SHALL HAVE A MINIMUM ULTIMATE TENSILE STRENGTH OF 270 KSI, IN ACCORDANCE WITH ASTM A19, PLUS SUPPLEMENTS FOR LOW-RELAXATION WIRE AND LOW-RELAXATION STRAND. WIRES SHALL BE FULL LENGTH WITHOUT SPLICES OR COUPLERS, UNKINKED, AND FREE FROM NICKS OR ABRASIONS. USE FULL STRANDS, SUPPLIED BY INSTEL INDUSTRIES, INC. OR APPROVED EQUIVALENT FOR PERMANENT TIEBACKS.
 3. PERMANENT TIEBACK ASSEMBLIES SHALL BE DOUBLE CORROSION PROTECTED OVER THE ENTIRE LENGTH OF THE ANCHOR. DOUBLE CORROSION PROTECTION SHALL CONSIST OF EPOXY COATED BARS OR EPOXY COATED STRANDS IN CONTINUOUS GROUT. OVER THE UNBONDED LENGTH THE BARS/STRANDS SHALL BE INDIVIDUALLY GREASED AND SHEATHED TO PREVENT BONDING. CORROGATED PE SHEATHING SHALL BE PROVIDED OVER THE LENGTH OF THE TIEBACK.
 4. ANCHORAGES SHALL BE CAPABLE OF DEVELOPING NO LESS THAN 90% OF THE MINIMUM ULTIMATE TENSILE STRENGTH OF THE TENDONS, AND SHALL CONFORM TO THE STATIC STRENGTH REQUIREMENTS OF THE PTI GUIDE SPECIFICATION FOR POST-TENSIONING MATERIALS. AT BARS, ANCHOR HEADS SHALL BE DESIGNED TO ACCEPT THE BAR LOADS AND TRANSFER THE ENTIRE LOAD ONTO THE BEARING PLATE. AT STRANDS, ANCHOR HEADS SHALL BE DESIGNED TO ACCEPT INDIVIDUAL STRAND LOADS, SEAT THE WEDGES, AND TRANSFER THE ENTIRE TENSION LOAD ONTO THE BEARING PLATE.
 5. WEDGES FOR STRAND TIEBACKS SHALL BE BITE-THROUGH WEDGES, SPECIFICALLY DESIGNED AND MANUFACTURED FOR EPOXY COATING. USE OF EPOXY COATING TO ACCOMMODATE CONVENTIONAL WEDGES IS NOT ALLOWED.
 6. CENTRALIZERS AND SPACERS SHALL BE STEEL OR PLASTIC. WOOD SHALL NOT BE USED. CENTRALIZERS WITH STAINLESS STEEL LATERAL LOADS FROM THE BARS OR TENDONS. COMBINATION SPACER/CENTRALIZERS ARE ACCEPTABLE. SPACERS AND CENTRALIZERS SHALL NOT RESTRICT THE PASSAGE OF GROUT, AND SHALL BE ATTACHED SO THEY ARE RESTRAINED FROM MOVING UP OR DOWN THE BARS/STRANDS DURING INSTALLATION OR GROUTING.
 - A. SPACERS SHALL SEPARATE THE TENDON STRANDS SO THAT THE SURFACE OF EACH STRAND CAN BE SURROUNDED BY GROUT AND SO THAT INDIVIDUAL STRANDS HAVE CLEARANCES OF NO LESS THAN 0.5 INCHES FROM EACH OTHER.
 - B. CENTRALIZERS SHALL PROVIDE A MINIMUM 0.5 INCHES OF GROUT COVER BETWEEN THE OUTER PERIMETER ROW OF TENDON STRANDS AND THE BOREHOLE WALL.
 - C. WHERE PE SHEATHING IS PRESENT, CENTRALIZERS SHALL PROVIDE 0.5 INCHES OF GROUT COVER BETWEEN THE STRANDS AND THE SHEATHING AND AT LEAST 0.5 INCHES OF GROUT COVER BETWEEN THE PE SHEATHING AND THE BOREHOLE.
 7. ALL METAL COMPONENTS OF THE BAR/STRAND ANCHORAGE SYSTEM SHALL BE COMPATIBLE WITH RESPECT TO THEIR CORROSION POTENTIAL AND THE SOLDIER BEND CONNECTION.
 8. HANDLING, SHIPPING, AND STORAGE SHALL BE CONDUCTED IN A MANNER THAT PROTECTS ALL BARS AND TENSION ASSEMBLIES AND HARDWARE FROM MECHANICAL DAMAGE, ABRASION, CORROSION, CHEMICAL ATTACK, AND DIRT. EACH BARTENDON SHALL BE TAGGED AND IDENTIFIABLE AT ALL TIMES. THE CONTRACTOR SHALL PROVIDE PROPER STORAGE FACILITIES ON SITE FOR THE TIME BETWEEN DELIVERY AND INSTALLATION OF BAR/STRANDS AND HARDWARE. STORAGE FACILITIES SHALL BE DRY AND SHALL PROTECT EPOXY-COATED BAR/STRAND FROM EXPOSURE TO SUNLIGHT, IMPROPER HANDLING, SHIPMENT, OR STORAGE. WALLS WILL BE SUBJECTED TO SUNLIGHT, IMPROPER HANDLING, SHIPMENT, OR STORAGE FOR REJECTION OF TENDONS.
 9. THE BARS/TENDONS SHALL BE HANDLED AND PROTECTED DURING THEIR INSERTION IN THE HOLES IN SUCH A MANNER THAT PREVENTS PHYSICAL DAMAGE AND SHARP BLENDS AND PROTECTS THE EPOXY COATING AND OTHER CORROSION PROTECTION ELEMENTS. SPECIAL MEASURES SHALL BE TAKEN TO PREVENT ABRASION OF THE BARS/TENDONS AT THE BOREHOLE COLLAR. FOR STRAND TIEBACKS, EACH TENDON SHALL BE FITTED WITH A PROTECTIVE NOSE CONE PRIOR TO INSERTION TO KEEP INDIVIDUAL STRAND TIPS FROM CATCHING ON THE BOREHOLE WALLS.
 10. THE CONTRACTOR SHALL CUT THE BARTENDON STRAND LENGTHS PROTRUDING BEYOND THE ANCHOR HEAD. CUTTING OF BARTENDON PROTRUSIONS SHALL BE IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS. THE PRESERVED METHOD IS BY ABRASIVE BLADES. USE OF A CUTTING TORCH IS NOT ACCEPTABLE. CARE SHALL BE TAKEN NOT TO DAMAGE THE ANCHOR HEAD HARDWARE PACKAGE. THE EXPOSED CUT ENDS OF THE BARS/STRANDS SHALL BE CORROSION PROTECTED WITH EPOXY MATERIALS PER MANUFACTURER'S RECOMMENDATIONS.
 11. STRUCTURAL GROUT FOR TIEBACK HOLES SHALL CONTAIN A MINIMUM OF 50 SACKS OF CEMENT PER CUBIC YARD AND SHALL ATTAIN A MINIMUM COMPRESSIVE STRENGTH OF 4,000 PSI IN 7 DAYS. GROUT SHALL BE PUMPED INTO PLACE FROM THE BACK OF THE HOLE TOWARD THE FRONT. PERMANENT TIEBACKS SHALL BE FULLY GROUTED WITH STRUCTURAL GROUT FROM END TO END.
- XII. TIEBACK INSTALLATION**
 1. TIEBACK DETAILS AND PERFORMANCE SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. THE CONTRACTOR SHALL SELECT MATERIALS AND PROCEDURES SUITABLE FOR THE SITE AND THE PROJECT CONSISTENT WITH THE CONTRACT DOCUMENTS. THE BONDED TIEBACK LENGTHS INDICATED ON THE DRAWINGS ARE TO BE MAINTAINED. THE BONDED LENGTHS MAY BE DETERMINED ALTERNATIVELY DETERMINED BASED ON IN SITU TESTING. ULTIMATELY, THE BONDED LENGTH SHALL BE SUFFICIENT TO INDICATE THE TEST LOADS, AND THE BOREHOLE DIAMETER, ANCHOR LENGTH, INSTALLATION PROCEDURES, CURING TIME, AND ADJUSTMENTS PER ACTUAL FIELD CONDITIONS ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.
 2. TIEBACK HOLES SHALL BE EITHER DRILLED WITH CASING OR BY THE GEOTECHNICAL ENGINEER MAY PERMIT NO CASING BASED ON FIELD OBSERVATIONS. CONTRACTOR TO COORDINATE WITH GEOTECHNICAL ENGINEER REGARDING ALTERNATIVE DRILLING PROCEDURES AT ADVERSE CONDITIONS.
 3. HOLES DRILLED FOR TIEBACK ANCHORS SHALL BE DONE WITHOUT DETRIMENTAL LOSS OF GROUND, SLOUGHING OR CARVING OF MATERIALS, AND WITHOUT ENDANGERING PREVIOUSLY INSTALLED SHORING MEMBERS OR EXISTING FOUNDATIONS.
 4. DRILLING SHALL BE PERFORMED WITH CARE IN VICINITY OF POTENTIAL OBSTRUCTIONS. CONTRACTOR SHALL USE CARE IN CONTROLLING AND MEASURING DRILL ANGLE. TIEBACK LENGTHS, ANGLES, AND LOCATIONS HAVE BEEN COORDINATED TO THE FULLEST EXTENT POSSIBLE TO AVOID OBSTRUCTIONS. HOWEVER, IF OBSTRUCTIONS ARE ENCOUNTERED PRIOR TO COMPLETION OF DRILLING, THE HOLE SHALL BE ABANDONED AND FILLED WITH HEAT CEMENT GROUT. NOTIFY THE SHORING ENGINEER FOR DIRECTION. A NEW HOLE WITH THE ANGLE ADJUSTED SHALL BE DRILLED.
 5. ALL LOOSE MATERIAL SHALL BE REMOVED FROM THE HOLE PRIOR TO PLACEMENT OF THE TIEBACK. WHERE TIEBACKS EXTEND BELOW WATER TABLE, WATER MAY REMAIN IN THE CASED HOLD PROVIDED GROUT IS PLACED BY A GROUT TUBE EXTENDING TO THE BOTTOM OF THE HOLE.
 6. DO NOT INSTALL TIEBACK ROD UNTIL INSPECTOR OF RECORD AND GEOTECHNICAL ENGINEER HAVE VIEWED AND APPROVED THE HOLE.
 7. INSTALL GROUT OVER THE FULL LENGTH OF THE TIEBACK. GROUTING METHODS SHALL ENSURE THAT ALL VOIDS ARE FILLED AND THAT TIEBACKS MEET TESTING CRITERIA. ALL TIEBACKS SHALL BE EQUIPPED WITH POST GROUTING TUBES. POST GROUTING PROCEDURES SHALL BE USED FOR ALL TIEBACKS.
 8. GROUT MIXER SHALL PRODUCE GROUT FREE OF LUMPS AND INSUFFICIENT CEMENT. GROUTING EQUIPMENT SHALL BE SIZED TO ENABLE THE GROUT TO BE PUMPED IN A CONTINUOUS OPERATION. THE MIXER SHALL BE CAPABLE OF CONTINUOUSLY AGITATING THE GROUT.
 9. CONTRACTOR SHALL RECORD GROUT PRESSURE AND QUANTITY OF GROUT PLACED.
 10. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH REGROUTING, REDRILLING, OR REPLACEMENT OF TIEBACKS THAT FAIL TO MEET TEST CRITERIA.
 11. TIEBACK TESTING MAY COMMENCE 3 DAYS AFTER POST-GROUTING OPERATIONS PROVIDED GROUT COMpressive STRENGTH HAS REACHED 3000 PSI.
 12. AFTER THE HIGH STRENGTH GROUT HAS ACHIEVED 3000 PSI, THE TIEBACK SHALL BE STRESSED IN THE FOLLOWING MANNER:
 - A. INSTALL ANCHORAGE.
 - B. PERFORMANCE TEST SELECT TIEBACKS IN ACCORDANCE WITH THE TIEBACK TESTING SECTION OF THESE GENERAL NOTES.
 - C. PROOF TEST EVERY TIEBACK BY STRESSING TO TEST LOAD SHOWN IN THE SCHEDULE ON S-541 AND MAINTAINING THAT LOAD FOR 30 MINUTES. PROOF TEST IS SUCCESSFUL IF THE CRITERIA FOR PERFORMANCE TESTS, FOUND IN THE TIEBACK TESTING SECTION OF THESE GENERAL NOTES, ARE MET.
 - D. TEMPORARILY STRESS ANCHOR TO MAXIMUM 80% OF GROSS ULTIMATE TENSILE STRENGTH (GUTS) TO COMPENSATE FOR WEDGE SEATING LOSSES. ANCHOR SYSTEMS SUPPLIER TO PROVIDE STRESSING DATA SHEET PRIOR TO STRESSING.
 - E. ADJUST LOAD TO THE LOAD SHOWN IN THE TIEBACK SCHEDULE AND SECURE ANCHORAGE DEVICES.
 13. IF THE TIEBACK FAILS TO MAINTAIN THE TEST LOAD FOR TEN MINUTES, USE POST GROUTING PROCEDURES TO REPAIR TIEBACKS. A TUBE SHALL BE PROVIDED WITH THE TIEBACK FOR SUCH PURPOSES. AFTER POST GROUTING THE TIEBACKS SHALL BE RE-TESTED. IF THE TIEBACK STILL FAILS, AN ADDITIONAL TIEBACK SHALL BE ADDED AT THE DIRECTION OF THE SHORING ENGINEER AT THE CONTRACTOR'S EXPENSE.
 14. THE MINIMUM PRESSURE FOR POST GROUTING SHALL BE 300 PSI SUBJECT TO CONTROL TO PREVENT EXCESSIVE HEAVE OR FRACTURING. POST GROUTING SHALL TAKE PLACE AFTER INITIAL GROUT HAS SET FOR 24 HOURS. POST GROUTING SHALL OCCUR IN THE BONDED LENGTH ONLY. THE POST-GROUT PRESSURE SHALL BE SUFFICIENT TO FRACTURE THE INITIAL GROUT AND THEREAFTER SHALL BE REDUCED TO 300 PSI. THE CONTRACTOR SHALL DETERMINE THE QUANTITY OF GROUT TO BE PLACED AND THE NUMBER OF TIMES TO POST GROUT.
- XIII. TIEBACK TESTING**
 1. REVIEW MILL CERTIFICATIONS FOR ALL TIEBACK STEEL.
 2. PERFORM MATERIAL TESTING OF TIEBACKS. TWO SAMPLES OF EACH HEAT SHALL BE TENSION TESTED.
 3. PERFORM COMPRESSION TESTS OF TIEBACK GROUT USED ON A GIVEN DAY. PREPARE A CURING OR CURE AND TEST TUBE SAMPLE FROM EACH HEAT AND SAMPLE AT 7 DAYS. ONE SPECIMEN SHALL BE RETAINED FOR LATER TESTING, IF REQUIRED.
 4. VISUALLY INSPECT EACH TIEBACK ASSEMBLY IMMEDIATELY PRIOR TO INSERTION IN THE HOLE. THE PURPOSE OF THE INSPECTION WILL BE TO ASCERTAIN THE SUITABILITY AND ACCEPTABILITY OF THE ASSEMBLY FOR INSERTION INTO THE HOLE. THE PRESENCE OF ANY UNACCEPTABLE CONDITION OR DAMAGE SHALL BE SUFFICIENT CAUSE FOR REJECTION. A DETAILED LIST OF UNACCEPTABLE CONDITIONS AND TYPES OF DAMAGE INCLUDES ABRASIONS, KINKS, WELDS, WELD SPLATTERS, AND JOINT ASSEMBLIES SHALL ALSO BE FREE OF DIRT, GREASE, OIL, DETRIMENTAL RUST, PITTING, AND ALL OTHER DELETERIOUS SUBSTANCES.
 5. PROOF-TEST EVERY TIEBACK, UNLESS OTHERWISE NOTED. REFER TO TIEBACK INSTALLATION SECTION OF THESE GENERAL NOTES FOR ADDITIONAL INFORMATION AND FIT MANUAL FOR ADDITIONAL REQUIREMENTS.
 6. PERFORMANCE-TEST TWO PERCENT OF THE TIEBACKS, OR A MINIMUM OF THREE TIEBACKS, WHICHEVER IS GREATER. THE FIRST PRODUCTION TIEBACK SHALL BE PERFORMANCE TESTED. PERFORMANCE TESTING OF TIEBACKS SHALL BE IN ACCORDANCE WITH PTI(204) AND THE FOLLOWING PROCEDURES:
 - a. THE PERFORMANCE TEST SHALL BE MADE BY INCREMENTALLY LOADING AND UNLOADING THE TIEBACK IN ACCORDANCE WITH THE SCHEDULE ON S-541. THE LOAD SHALL BE RAISED FROM ONE INCREMENT TO ANOTHER IMMEDIATELY AFTER A DEFLECTION READING. DEFLECTION READINGS SHALL BE RECORDED TO THE NEAREST 0.001 INCHES WITH RESPECT TO AN INDEPENDENT FIXED REFERENCE POINT. THE FIXED REFERENCE FOR MOVEMENT RECORDING SHALL BE A FREE STANDING TRIP-MOUNTED DIAL GAUGE WITH A PRECISION OF 0.001 INCHES.
 - b. THE MAXIMUM LOAD IN A PERFORMANCE TEST SHALL BE HELD FOR 10 MINUTES. THE LOAD-HOLD PERIOD SHALL START AS SOON AS THE MAXIMUM LOAD IS APPLIED AND THE TIEBACK MOVEMENT SHALL BE MEASURED AND RECORDED AT 1 MINUTE, 2, 3, 4, 5, 6, AND 10 IF THE ANCHOR MOVEMENT BETWEEN 1 MINUTE AND 10 MINUTES EXCEEDS 0.04 INCHES. THE MAXIMUM LOAD SHALL BE HELD FOR AN ADDITIONAL 30 MINUTES. IF THE LOAD HOLD IS EXTENDED, THE ANCHOR MOVEMENT SHALL BE RECORDED AT 15, 20, 30, 40, 50, AND 60 MINUTES. IF AN ANCHOR FAILS IN CREEP, RE-TESTING WILL NOT BE ALLOWED.
 - c. A TIEBACK PERFORMANCE TEST WITH A 10 MINUTE LOAD HOLD IS ACCEPTABLE IF BOTH OF THE FOLLOWING ARE MET:
 1. THE TIEBACK CARRIES THE MAXIMUM LOAD WITH LESS THAN 0.04 INCHES OF MOVEMENT BETWEEN 1 AND 10 MINUTES.
 2. THE TOTAL MOVEMENT AT THE MAXIMUM LOAD EXCEEDS 80 PERCENT OF THE THEORETICAL ELASTIC ELONGATION OF THE TIEBACK UNBONDED LENGTH.
 - d. IF THE LOAD HOLD IS EXTENDED, THE TEST IS ACCEPTABLE IF THE TIEBACK CARRIES THE MAXIMUM LOAD WITH LESS THAN 0.04 INCHES OF MOVEMENT BETWEEN 1 AND 10 MINUTES AND SATISFIES ITEM C.2. ABOVE.
 7. LOCK OFF: SUCCESSFULLY TESTED TIEBACKS SHALL BE LOCKED OFF AT LEAST AT THE DESIGN LOAD OR GREATER (UNLESS OTHERWISE DIRECTED BY THE ENGINEER).
 8. ANCHORS SHALL BE STRESSED STRAIGHT AND TRUE. KINKING OR SHARP CURVATURE IN THE ANCHORS UNDER TENSION SHALL BE CAUSE FOR REJECTION.
 9. TIEBACKS THAT ULTIMATELY FAIL TO MEET THE TESTING CRITERIA MAY BE RETESTED AT A LOWER LOAD AND ASSIGNED A VALUE EQUAL TO THAT LOAD. IF THE ENGINEER APPROVES SUCH AN APPROACH, AN ADDITIONAL TIEBACK SHALL BE INSTALLED TO MAKE UP THE LOAD DEFICIENCY. THE LOCATION OF THE ADDITIONAL TIEBACK WILL BE DETERMINED BY THE ENGINEER.
 10. IF A TIEBACK CONTINUES TO FAIL A LOAD TEST, THE TIEBACK MAY BE POST-GROUTED AND RETESTED. IF TIEBACK FAILS AFTER SECOND POST-GROUT, TIEBACK IS REJECTED AND SHALL BE REPLACED.
- XIV. STRUCTURAL TESTS, INSPECTIONS, AND OBSERVATIONS**
 1. AN INDEPENDENT TESTING AGENCY AND SPECIAL INSPECTORS WILL BE RETAINED BY THE OWNER TO REFORM TESTS AND INSPECTION.
 2. THE FOLLOWING ITEMS REQUIRE TESTS AND INSPECTIONS IN ACCORDANCE WITH THE REQUIREMENTS OF THE CHAPTER "STRUCTURAL TESTS AND INSPECTIONS" OF THE APPLICABLE CODE. REQUIREMENTS FOR TESTS AND INSPECTIONS ARE IDENTIFIED IN THE SPECIFICATIONS.
 - A. REINFORCING STEEL
 - B. CAST-IN-PLACE CONCRETE
 - C. POST-INSTALLED ANCHORS
 - D. REPAIR MORTARS
 - E. TIEBACKS
 3. MONITORING
 1. ESTABLISH CONTROL POINTS ALONG THE EXISTING SEAWALL PRIOR TO START OF EXCAVATION OR CONSTRUCTION. MONITOR ANY MOVEMENT OF SEAWALL DURING TRENCHING OR EXCAVATIONS WORK NEAR THE SEAWALL. NOTIFY SEOR OF ANY MOVEMENT.
 4. DESIGN CRITERIA
 1. APPLICABLE CODE: 2022 CALIFORNIA BUILDING CODE
 2. APPLICABLE LOADS:
 - A. DEAD LOADS - VARY BASED ON ACTUAL WEIGHTS
 - B. LIVE LOADS:
 - a. STAIRS: 100 PSF
 3. SHORING DESIGN PARAMETERS (PER GEOTECH REPORT)
 - A. ALLOWABLE SKIN FRICTION: 21 PSI
 4. DESIGN ASSUMPTIONS REGARDING SHARING OF LOAD BETWEEN NEW AND EXISTING TIEBACKS:
 - A. NEW TIEBACKS AT STRAIGHT WALL SEGMENTS ARE DESIGNED TO RESIST 70% OF THE LATERAL SOIL LOADS (WITH THE EXISTING TIEBACKS RESISTING 30%)
 - B. NEW TIEBACKS AT THE CURVED WALL SEGMENT ARE DESIGNED TO RESIST 50% OF THE LATERAL SOIL LOADS (WITH EXISTING TIEBACKS RESISTING 50%).
 5. PROJECT SEQUENCING
 1. PRIOR TO ALL REPAIR WORK, CONTRACTOR TO
 - A. BARGE WALL AS REQUIRED
 - B. INSTALL ADEQUATE PROTECTION TO PREVENT SEA WATER FROM CONTACTING WALL DURING REPAIRS.
 2. SEQUENCE OF WALL REPAIRS ARE AS FOLLOWS:
 - A. DEMOLITION, REPAIR, AND INSTALLATION OF WALL REBAR PER DETAIL 6S-511.
 - B. CORE THROUGH (E) WALL AND INSTALL TIEBACK.
 - C. SHOTCRETE INFILL EXCEPT FOR AREA OF TIEBACK BLOCKOUT PER DETAIL 7IS-541 OR 9S-541.
 - D. TEST TIEBACKS PER XIII OF GENERAL NOTES.
 - E. INFILL TIEBACK BLOCKOUT WITH CONCRETE OR NON-SHRINK GROUT.
 - F. CONTRACTOR MAY SUBMIT ALTERNATE SEQUENCE FOR EOR REVIEW.

EROSION & SEDIMENT CONTROL NOTES

TEMPORARY EROSION/SEDIMENT CONTROL, PRIOR TO COMPLETION OF FINAL IMPROVEMENTS, SHALL BE PERFORMED BY THE CONTRACTOR OR QUALIFIED PERSON AS INDICATED BELOW.

1. ALL REQUIREMENTS OF THE CITY OF SOLANA BEACH STORM WATER STANDARDS MUST BE INCORPORATED INTO THE DESIGN AND CONSTRUCTION OF THE PROPOSED GRADING/IMPROVEMENTS CONSISTENT WITH THE APPROVED STORM WATER POLLUTION PREVENTION PLAN (SWPPP) AND/OR WATER POLLUTION CONTROL PLAN (WPCL) FOR CONSTRUCTION LEVEL BMP'S.
2. FOR STORM DRAIN INLETS, PROVIDE A GRAVEL BAG SILT BASIN IMMEDIATELY UPSTREAM OF INLET AS INDICATED ON DETAILS.
3. FOR INLETS LOCATED AT SLOPES ADJACENT TO TOP OF SLOPES, THE CONTRACTOR SHALL ENSURE THAT WATER DRAINING TO THE SUMP IS DIRECTED INTO THE INLET AND THAT A MINIMUM OF 1.0' FREEBOARD EXISTS AND IS MAINTAINED ABOVE THE TOP OF THE INLET. IF FREEBOARD IS NOT PROVIDED BY GRADINGS SHOWN ON THESE PLANS, THE CONTRACTOR SHALL PROVIDE IT VIA TEMPORARY MEASURES, I.E. GRAVEL BAGS OR DIKES.
4. THE CONTRACTOR OR QUALIFIED PERSON SHALL BE RESPONSIBLE FOR CLEANUP OF SILT AND MUD ON ADJACENT STREET(S) AND STORM DRAIN SYSTEM DUE TO CONSTRUCTION ACTIVITY.
5. THE CONTRACTOR OR QUALIFIED PERSON SHALL CHECK AND MAINTAIN ALL LINED AND UNLINED DITCHES AFTER EACH RAINFALL.
6. THE CONTRACTOR SHALL REMOVE SILT DEBRIS AFTER EACH MAJOR RAINFALL.
7. EQUIPMENT AND WORKERS FOR EMERGENCY WORK SHALL BE MADE AVAILABLE AT ALL TIMES DURING THE RAINY SEASON. ALL NECESSARY MATERIALS SHALL BE STOCKPILED ON SITE AT CONVENIENT LOCATIONS TO FACILITATE RAPID CONSTRUCTION OF TEMPORARY DEVICES WHEN RAIN IS IMMINENT.
8. THE CONTRACTOR SHALL RESTORE ALL EROSION/SEDIMENT CONTROL DEVICES TO WORKING ORDER TO THE SATISFACTION OF THE CITY ENGINEER OR RESIDENT ENGINEER AFTER EACH RUN-OFF PRODUCING RAINFALL.
9. THE CONTRACTOR SHALL INSTALL ADDITIONAL EROSION/SEDIMENT CONTROL MEASURES AS MAY BE REQUIRED BY THE RESIDENT ENGINEER DUE TO UNCOMPLETED GRADING OPERATIONS OR UNFORESEEN CIRCUMSTANCES, WHICH MAY ARISE.
10. THE CONTRACTOR SHALL BE RESPONSIBLE AND SHALL TAKE NECESSARY PRECAUTIONS TO PREVENT PUBLIC TRESPASS ONTO AREAS WHERE IMPOUNDED WATERS CREATE A HAZARDOUS CONDITION.
11. ALL EROSION/SEDIMENT CONTROL MEASURES PROVIDED PER THE APPROVED GRADING PLAN SHALL BE INCORPORATED HEREON. ALL EROSION/SEDIMENT CONTROL FOR INTERIM CONDITIONS SHALL BE DONE TO THE SATISFACTION OF THE RESIDENT ENGINEER.
12. GRADED AREAS AROUND THE PROJECT PERIMETER MUST DRAIN AWAY FROM THE FACE OF THE SLOPE AT THE CONCLUSION OF EACH WORKING DAY.
13. ALL REMOVABLE PROTECTIVE DEVICES SHOWN SHALL BE IN PLACE AT THE END OF EACH WORKING DAY WHEN RAIN IS IMMINENT.
14. THE CONTRACTOR SHALL ONLY GRADE, INCLUDING CLEARING AND GRUBBING FOR THE AREAS FOR WHICH THE CONTRACTOR OR QUALIFIED PERSON CAN PROVIDE EROSION/SEDIMENT CONTROL MEASURES.
15. THE CONTRACTOR SHALL ARRANGE FOR WEEKLY MEETINGS DURING OCTOBER 1ST TO APRIL 30TH FOR PROJECT TEAM (GENERAL CONTRACTOR, QUALIFIED PERSON, EROSION CONTROL SUBCONTRACTOR IF ANY, ENGINEER OF WORK, OWNER/DEVELOPER AND THE RESIDENT ENGINEER) TO EVALUATE THE ADEQUACY OF THE EROSION/SEDIMENT CONTROL, MEASURES AND OTHER RELATED CONSTRUCTION ACTIVITIES.

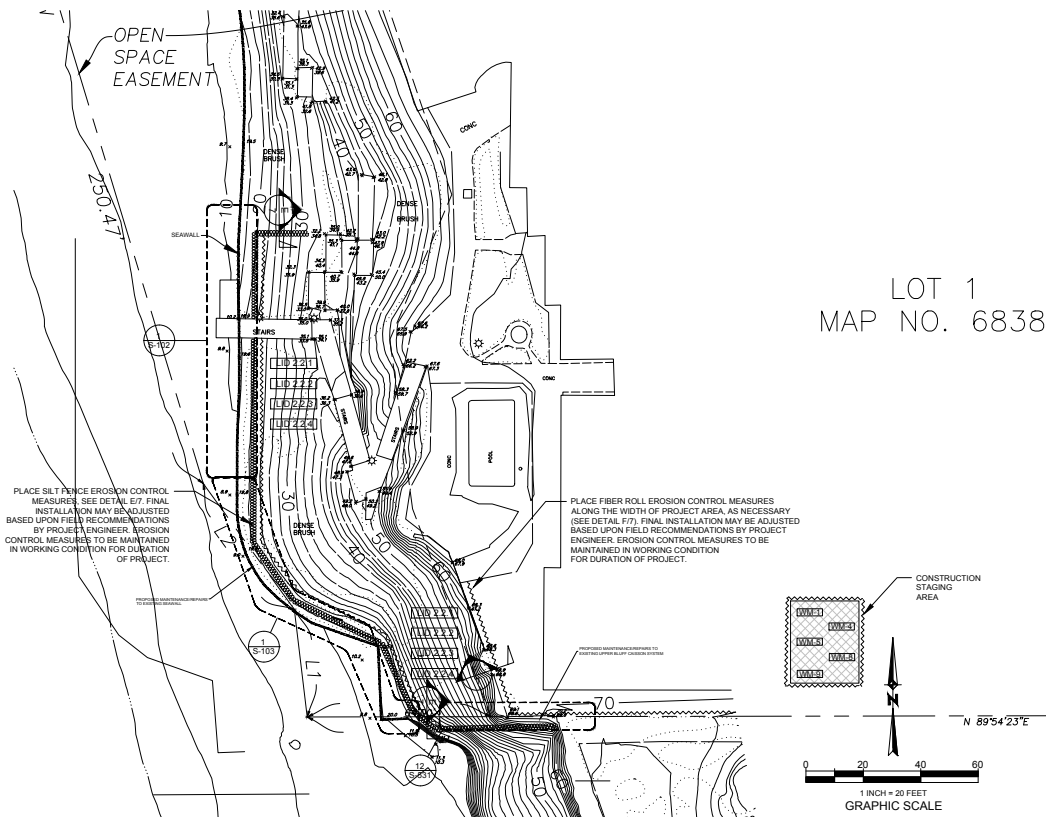

ALT. SECTION-SILT FENCE EROSION CONTROL
SCALE: 1"=1'-0"

NOTE:
- INSTALLATION OF FIBER ROLL IS PREFERRED OPTION FOR EROSION CONTROL.
- EROSION CONTROL MEASURES SHALL BE INSTALLED ALONG CONTOUR WHENEVER POSSIBLE.
- FINAL LOCATION AS DIRECTED BY GEOTECHNICAL CONSULTANT IN FIELD.

SECTION-FIBER ROLL
SCALE: 1"=1'-0"

PLACE SILT FENCE EROSION CONTROL MEASURES, SEE DETAIL E7. FINAL INSTALLATION MAY BE ADJUSTED BASED UPON FIELD RECOMMENDATIONS BY PROJECT ENGINEER. EROSION CONTROL MEASURES TO BE MAINTAINED IN WORKING CONDITION FOR DURATION OF PROJECT.

PLACE FIBER ROLL EROSION CONTROL MEASURES ALONG THE WIDTH OF PROJECT AREA, AS NECESSARY (SEE DETAIL F7). FINAL INSTALLATION MAY BE ADJUSTED BASED UPON FIELD RECOMMENDATIONS BY PROJECT ENGINEER. EROSION CONTROL MEASURES TO BE MAINTAINED IN WORKING CONDITION FOR DURATION OF PROJECT.

BMP LEGEND

DIRECTION OF LOT DRAINAGE →

MATERIAL & WASTE MANAGEMENT CONTROL BMP'S:

- WM-1 MATERIAL DELIVERY & STORAGE
- WM-2 SPILL PREVENTION & CONTROL
- WM-3 SOLID WASTE MANAGEMENT
- WM-4 CONCRETE WASTE MANAGEMENT
- WM-5 SANITARY WASTE MANAGEMENT

TEMPORARY RUNOFF CONTROL BMP'S:

- SC-1 SILT FENCE
- SC-2 FIBER ROLL
- SC-3 GRAVEL BAGS
- SC-4 STREET SWEEPING DAILY, OR AS DIRECTED
- SC-5 STORM INLET PROTECTION, AS APPLICABLE

LOW IMPACT DEVELOPMENT BMP'S:

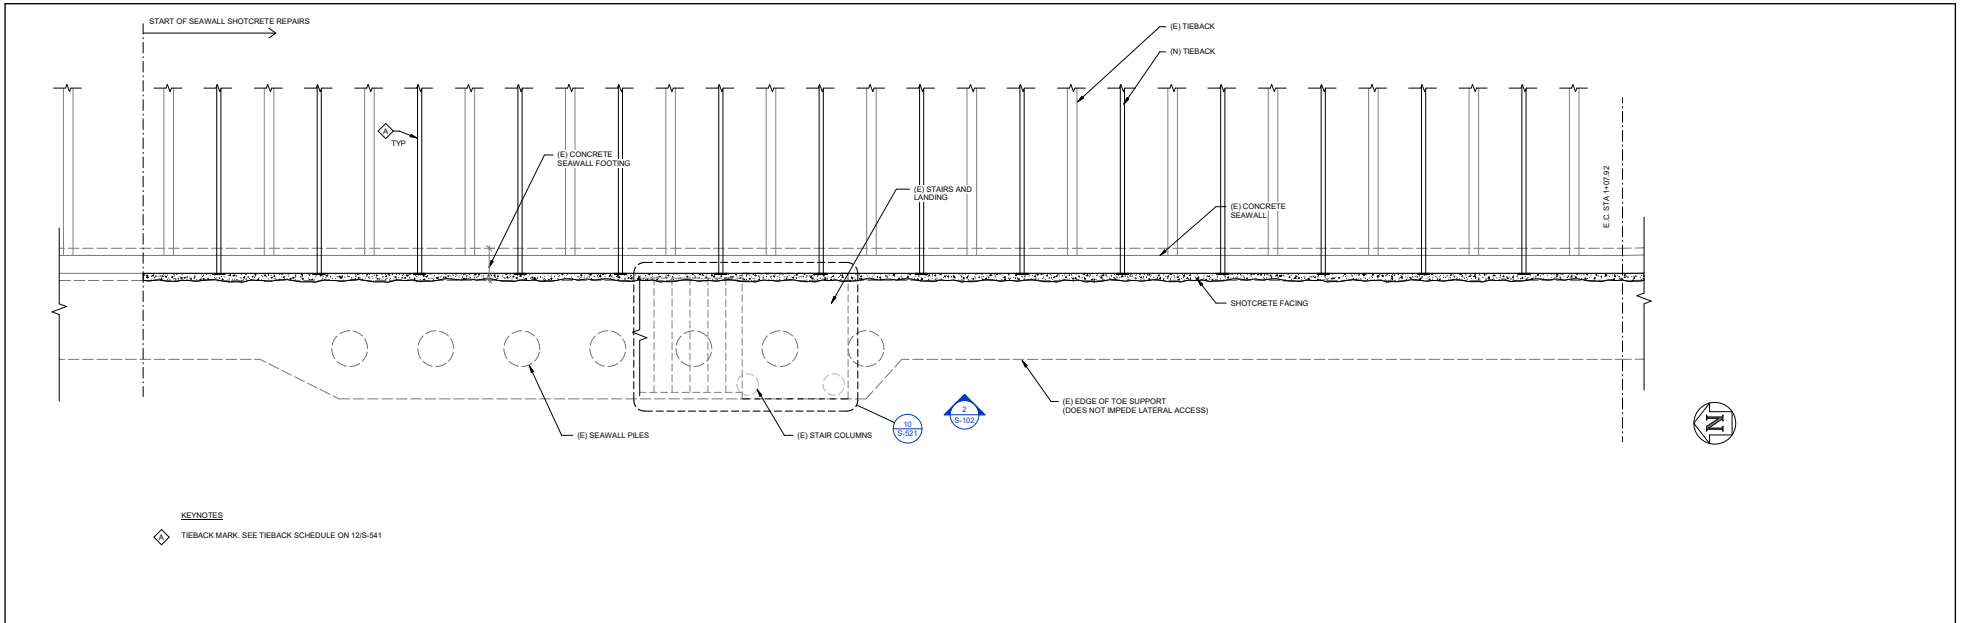

- LID 2.2.1 CONSERVATION OF NATURAL DRAINAGES, WELL DRAINED SOILS AND SIGNIFICANT VEGETATION
- LID 2.2.2 MINIMIZE DISTURBANCES TO NATURAL DRAINAGES
- LID 2.2.3 MINIMIZE AND DISCONNECT IMPERVIOUS SURFACES
- LID 2.2.4 MINIMIZE SOIL COMPACTION

CONCRETE REPAIR NOTES

REPAIR CRITERIA

1. THE CRACKS AND SPALLS IDENTIFIED IN THESE DRAWINGS REPRESENT THE MAJORITY OF THE SIGNIFICANT CRACKS/SPALLS OBSERVED. HOWEVER, IT IS NOT MEANT TO BE A COMPREHENSIVE AND COMPLETE PORTRAYAL OF ITEMS REQUIRING MITIGATION. IN ADDITION, THEIR LENGTH & LOCATION ARE APPROXIMATE IN NATURE.

MATERIALS AND PRODUCTS

1. BONDING AGENTS:

A. EPOXY-MODIFIED, CEMENTITIOUS BONDING AND ANTICORROSION AGENT: MANUFACTURED PRODUCT THAT CONSISTS OF WATER-INSENSITIVE EPOXY ADHESIVE, PORTLAND CEMENT, AND WATER-BASED SOLUTION OF CORROSION-INHIBITING CHEMICALS THAT FORMS A PROTECTIVE FILM ON STEEL REINFORCEMENT. ACCEPTABLE PRODUCTS INCLUDE:

- a. EUCLID CHEMICAL COMPANY; DURALPREP A.C.
b. Sika CORPORATION; ARMACTEC 110 EPOCERM.

2. MORTAR SCRUB COAT: MIX CONSISTING OF 1 PART PORTLAND CEMENT AND 1 PART FINE AGGREGATE COMPLYING WITH ASTM C 144 EXCEPT 100 PERCENT PASSING AND .16 (1-1/8MM) SIEVE.

3. PATCHING MORTAR:

A. GENERAL:

a. ONLY USE PATCHING MORTARS THAT ARE RECOMMENDED BY MANUFACTURER FOR EACH APPLICABLE HORIZONTAL, VERTICAL, OR OVERHEAD USE ORIENTATION.

b. COARSE AGGREGATE FOR PATCHING MORTAR: ASTM C 33, WASHED AGGREGATE, SIZE NO. 8, CLASS SS. ADD TO PATCHING-MORTAR MIX ONLY AS PERMITTED BY PATCHING-MORTAR MANUFACTURER.

B. CEMENTITIOUS PATCHING MORTAR: PACKAGED, DRY MIX FOR REPAIR OF CONCRETE.

a. BASIS-OF-DESIGN PRODUCT: SUBJECT TO COMPLIANCE WITH REQUIREMENTS, PROVIDE PRODUCT INDICATED ON DRAWINGS OR COMPARABLE PRODUCT BY ONE OF THE FOLLOWING:

- BASF CONSTRUCTION CHEMICALS - BUILDING SYSTEMS
• DAYTON SUPERIOR CORPORATION
• EUCLID CHEMICAL COMPANY
• Sika CORPORATION; CONSTRUCTION PRODUCT DIVISION

a. COMPRESSIVE STRENGTH: NOT LESS THAN 5000 PSI AT 28 DAYS WHEN TESTED ACCORDING TO ASTM C 109/C 109M

3. POLYMER-MODIFIED, CEMENTITIOUS PATCHING MORTAR: PACKAGED, DRY MIX FOR REPAIR OF CONCRETE AND THAT CONTAINS A NON-RESPERISBLE LATEX ADDITIVE AS EITHER A DRY POWDER OR A SEPARATE LIQUID THAT IS ADDED DURING MIXING.

a. BASIS-OF-DESIGN PRODUCT: SUBJECT TO COMPLIANCE WITH REQUIREMENTS, PROVIDE PRODUCT INDICATED ON DRAWINGS OR COMPARABLE PRODUCT BY ONE OF THE FOLLOWING:

- BASF CONSTRUCTION CHEMICALS - BUILDING SYSTEMS
• DAYTON SUPERIOR CORPORATION
• EUCLID CHEMICAL COMPANY
• Sika CORPORATION; CONSTRUCTION PRODUCT DIVISION

a. COMPRESSIVE STRENGTH: NOT LESS THAN 5000 PSI AT 28 DAYS WHEN TESTED ACCORDING TO ASTM C 109/C 109M

4. EPOXY CRACK INJECTION MATERIALS

A. EPOXY CRACK-INJECTION ADHESIVE: ASTM C 881/C 881M, TYPE IV AT STRUCTURAL LOCATIONS AND WHERE NOT INDICATED.

B. BASIS-OF-DESIGN PRODUCT: SUBJECT TO COMPLIANCE WITH REQUIREMENTS, PROVIDE PRODUCT INDICATED ON DRAWINGS OR COMPARABLE PRODUCT BY ONE OF THE FOLLOWING:

- a. EUCLID CHEMICAL COMPANY
b. Sika CORPORATION; CONSTRUCTION PRODUCT DIVISION
c. SIMPSON STRONG TIE, INC

D. CAPPING ADHESIVE: PRODUCT MANUFACTURED FOR USE WITH CRACK INJECTION ADHESIVE BY SAME MANUFACTURER

SURFACE PREPARATION FOR PATCH LOCATIONS (WHERE CORROSION IS OBSERVED)

1. LOCATION AND MARKING OF WORK

A. CONTRACTOR TO LOCATE SPALLS AND DELAMINATIONS BY VISUAL INSPECTION AND CONCRETE SOUNDING AND MARK THEIR BOUNDARIES WITH CHALK OR PAINT.

B. AREAS TO BE REMOVED SHALL BE AS STRAIGHT AND RECTANGULAR AS PRACTICAL TO ENCOMPASS THE REPAIR AND PROVIDE A NEAT PATCH.

C. CONTRACTOR TO LOCATE ALL EMBEDDED POST-TENSIONING TENDONS AND REINFORCEMENT IN THE REPAIR AREA AND MARK THESE LOCATIONS FOR REFERENCE DURING THE CONCRETE REMOVAL IN CONCRETE SLAB.

2. CONCRETE REMOVAL

A. DELAMINATED, SPALLED, AND UNSOUND CONCRETE FLOOR AREAS SHALL HAVE THEIR MARKED BOUNDARIES SAWCUT TO A DEPTH OF 1/4 INCH INTO THE FLOOR SLAB, UNLESS OTHERWISE NOTED. FOR VERTICAL AND OVERHEAD SURFACES THE MARKED BOUNDARY MAY BE SAWCUT, GROUND OR CHIPPED TO A DEPTH OF 1/4 INCH INTO EXISTING CONCRETE. MEASURED FROM THE ORIGINAL SURFACE. EXTRA CAUTION SHALL BE EXERCISED DURING THE SAWCUTTING OPERATIONS TO AVOID DAMAGING EXISTING REINFORCEMENT (ESPECIALLY POST-TENSIONING TENDONS AND SHEATHS).

B. ALL CONCRETE SHALL BE REMOVED FROM WITHIN THE MARKED BOUNDARY TO A MINIMUM DEPTH OF 1/2 INCH USING CHIPPING HAMMERS LESS THAN 15 LBS AT SLABS AND LESS THAN 30 LBS AT COLUMNS AND WALLS. IF UNSOUND CONCRETE EXISTS BEYOND THE MINIMUM REMOVAL DEPTH, THEN CHIPPING SHALL CONTINUE UNTIL ALL UNSOUND CONCRETE HAS BEEN REMOVED FROM THE CAVITY.

C. WHERE EMBEDDED REINFORCEMENT IS EXPOSED BY CONCRETE REMOVAL, EXTRA CAUTION SHALL BE EXERCISED TO AVOID DAMAGING IT DURING REMOVAL OF ADDITIONAL UNSOUND CONCRETE. IF BOND BETWEEN EXPOSED EMBEDDED REINFORCEMENT AND ADJACENT CONCRETE IS IMPAIRED BY THE CONTRACTOR'S REMOVAL OPERATIONS, THEN THE CONTRACTOR SHALL PERFORM ADDITIONAL REMOVAL AROUND AND BEYOND THE PERIMETER OF THE REINFORCEMENT FOR A MINIMUM OF 3/4 INCH ALONG THE ENTIRE LENGTH AFFECTED.

D. IF RUST IS PRESENT ON EMBEDDED REINFORCEMENT WHERE IT ENTERS SOUND CONCRETE, THEN ADDITIONAL REMOVAL OF CONCRETE ALONG AND BENEATH THE REINFORCEMENT WILL BE REQUIRED. SUCH ADDITIONAL REMOVAL SHALL CONTINUE UNTIL NONRUSTED REINFORCEMENT IS EXPOSED, OR AS DIRECTED BY THE ENGINEER.

3. REINFORCEMENT IN REPAIR AREA

A. ALL EMBEDDED REINFORCEMENT EXPOSED DURING SURFACE PREPARATION THAT HAS LOST MORE THAN 20% OF THE ORIGINAL CROSS-SECTIONAL AREA DUE TO CORROSION SHALL BE CONSIDERED DEFECTIVE, AND WILL REQUIRE REMOVAL AND REPLACEMENT. CONTRACTOR TO NOTIFY ENGINEER OF THESE CONDITIONS.

B. CONCRETE SHALL BE REMOVED TO PROVIDE A MINIMUM OF 3/4 INCH CLEARANCE ON ALL SIDES OF DEFECTIVE OR DAMAGED EXPOSED REBAR. CONCRETE THAT IS LEFT IN PLACE, A MINIMUM OF 1 1/2 INCH CONCRETE COVER SHALL BE PROVIDED OVER ALL NEW AND EXISTING REINFORCEMENT. CONCRETE COVER OVER REINFORCEMENT MAY BE REDUCED TO 3/4 INCH WITH THE ENGINEER'S APPROVAL IF COATED WITH AN APPROVED EPOXY RESIN.

4. CLEANING OF REINFORCEMENT

A. ALL EXPOSED STEEL SHALL BE CLEANED OF RUST TO BARE METAL BY SANDBLASTING OR WIRE BRUSHING.

5. PREPARATION OF CAVITY FOR PATCH PLACEMENT

A. THOROUGHLY CLEAN REMOVAL AREAS OF LOOSE CONCRETE, DUST AND DEBRIS. VERIFY FRACTURED PROFILE OF AT LEAST 18 INCH OCCURS AT PATCH LOCATION.

B. PERFORM ADDITIONAL PREPARATION AND CLEANING OF THE SPALL CAVITY AS REQUIRED BY THE PATCHING MATERIAL MANUFACTURER.

C. COAT REBAR AND CAVITY WITH Sika ARMACTEC 110 PER MANUFACTURER RECOMMENDATIONS.

APPLICATION OF PATCH MATERIALS

1. APPLICATION OF PATCHING MORTAR: PLACE AS FOLLOWS UNLESS OTHERWISE RECOMMENDED IN WRITING BY MANUFACTURER. BASIS OF DESIGN FOR SHALLOW SURFACE REPAIRS IS SIKADUR 109 PLUS.

A. PROVIDE FORMS WHERE NECESSARY TO CONFINE PATCH TO REQUIRED SHAPE.

B. WET SUBSTRATE AND FORMS THOROUGHLY AND THEN REMOVE STANDING WATER.

C. APPLY BONDING AGENT PER MANUFACTURER RECOMMENDATIONS.

D. GENERAL PLACEMENT: PLACE PATCHING MORTAR BY TROWELING TOWARD EDGES OF PATCH TO FORCE INTIMATE CONTACT WITH EXISTING SURFACES. FOR LARGE PATCHES, FILL EDGES FIRST AND THEN WORK TOWARD CENTERS. ALWAYS TROWELING TOWARD EDGES OF PATCH. AT FULLY EXPOSED REINFORCING BARS, FORCE PATCHING MORTAR TO FILL SPACE BEHIND BARS BY COMPACTING WITH TROWEL FROM SIDES OF BARS.

E. VERTICAL PATCHING: PLACE MATERIAL IN LIFTS OF NOT MORE THAN 1-1/2 INCHES NOR LESS THAN 1/8 INCH. DO NOT FEATHER EDGE.

F. OVERHEAD PATCHING: PLACE MATERIAL IN LIFTS OF NOT MORE THAN 1-1/2 INCHES NOR LESS THAN 1/8 INCH. DO NOT FEATHER EDGE.

G. CONSOLIDATION: AFTER EACH LIFT IS PLACED, CONSOLIDATE MATERIAL AND SCREED SURFACE.

H. FINISHING: ALLOW SURFACES OF LIFTS THAT ARE TO REMAIN EXPOSED TO BECOME FIRM AND THEN FINISH TO A SURFACE MATCHING ADJACENT CONCRETE.

I. CURING: WET-CURE CEMENTITIOUS PATCHING MATERIALS, INCLUDING POLYMER-MODIFIED CEMENTITIOUS PATCHING MATERIALS, FOR NOT LESS THAN SEVEN DAYS BY WATER-FOG SPRAY OR WATER-SATURATED ABSORPTIVE COVER. ALTERNATIVELY, USE CURING COMPOUND APPROVED BY THE EOR AND REPAIR MORTARGROUT MANUFACTURER.

2. APPLICATION OF DRY PACK MORTAR: USE FOR DEEP CAVITIES AND WHERE INDICATED. PLACE AS FOLLOWS UNLESS OTHERWISE RECOMMENDED IN WRITING BY MANUFACTURER.

A. PROVIDE FORMS WHERE NECESSARY TO CONFINE PATCH TO REQUIRED SHAPE.

B. WET SUBSTRATE AND FORMS THOROUGHLY AND THEN REMOVE STANDING WATER.

C. APPLY BONDING AGENT PER MANUFACTURER RECOMMENDATIONS.

D. PLACE DRY-PACK MORTAR INTO CAVITY BY HAND, AND COMPACT TIGHTLY INTO PLACE. DO NOT PLACE MORE MATERIAL AT A TIME THAN CAN BE PROPERLY COMPACTED. CONTINUE PLACING AND COMPACTING UNTIL PATCH IS APPROXIMATELY LEVEL WITH SURROUNDING SURFACE.

E. AFTER CAVITY IS FILLED AND PATCH IS COMPACTED, TROWEL SURFACE TO MATCH PROFILE AND FINISH OF SURROUNDING CONCRETE. A THIN COAT OF PATCHING MORTAR MAY BE TROWELED INTO THE SURFACE OF PATCH TO HELP OBTAIN REQUIRED FINISH.

F. WET-CURE PATCH FOR NOT LESS THAN SEVEN DAYS BY WATER-FOG SPRAY OR WATER-SATURATED ABSORPTIVE COVER. ALTERNATIVELY, USE CURING COMPOUND APPROVED BY THE EOR AND REPAIR MORTARGROUT MANUFACTURER.

3. PLACEMENT OF CONCRETE PATCH: BASIS OF DESIGN FOR FORM AND POUR REPAIRS IS SIKACRETE 211 SCC PLUS

A. APPLY BONDING AGENT PER MANUFACTURER RECOMMENDATIONS.

B. STANDARD PLACEMENT:

a. PROVIDE FORMS WHERE NECESSARY TO CONFINE PATCH TO REQUIRED SHAPE.

b. WET SUBSTRATE AND FORMS THOROUGHLY AND THEN REMOVE STANDING WATER.

c. APPLY BONDING AGENT PER MANUFACTURER RECOMMENDATIONS.

d. PLACE MATERIAL PER MANUFACTURER'S RECOMMENDATIONS

C. WET-CURE CONCRETE FOR NOT LESS THAN SEVEN DAYS BY LEAVING FORMS IN PLACE OR KEEPING SURFACES CONTINUOUSLY WET BY WATER-FOG SPRAY OR WATER-SATURATED ABSORPTIVE COVER. ALTERNATIVELY, USE CURING COMPOUND APPROVED BY THE EOR AND REPAIR MORTARGROUT MANUFACTURER.

D. FILL PLACEMENT CAVITIES WITH DRY-PACK MORTAR AND REPAIR VOIDS WITH PATCHING MORTAR. FINISH TO MATCH SURROUNDING CONCRETE.

EPOXY CRACK INJECTION

1. EPOXY CRACK INJECTION: BASIS OF DESIGN IS SIKADUR 35

A. CLEAN AREAS TO RECEIVE CAPPING ADHESIVE OF OIL, DIRT, AND OTHER SUBSTANCES THAT WOULD INTERFERE WITH BOND, AND CLEAN CRACKS WITH OIL-FREE COMPRESSED AIR OR LOW-PRESSURE WATER TO REMOVE LOOSE PARTICLES.

B. PLACE INJECTION PORTS AS RECOMMENDED BY EPOXY MANUFACTURER, SPACING NO FARTHER APART THAN THICKNESS OF MEMBER BEING INJECTED. SEAL INJECTION PORTS IN PLACE WITH CAPPING ADHESIVE.

C. SEAL CRACKS AT EXPOSED SURFACES WITH A RIBBON OF CAPPING ADHESIVE AT LEAST 1/4 INCH (6 MM) THICK BY 1 INCH (25 MM) WIDER THAN CRACK.

D. INJECT EPOXY ADHESIVE, BEGINNING AT WIDEST PART OF CRACK AND WORKING TOWARD NARROWER PARTS. INJECT ADHESIVE INTO PORTS TO REFUSAL, CAPPING ADJACENT PORTS WHEN THEY EXTRUDE EPOXY. CAP INJECTED PORTS AND INJECT THROUGH ADJACENT PORTS UNTIL CRACK IS FULLED.

E. AFTER EPOXY ADHESIVE HAS SET, REMOVE INJECTION PORTS AND GRIND SURFACES SMOOTH

FIELD QUALITY CONTROL

1. PERFORM THE FOLLOWING TESTS AND INSPECTIONS:

A. PACKAGED, CEMENTITIOUS PATCHING MORTAR: 2 RANDOMLY SELECTED SETS OF SAMPLES FOR EACH TYPE OF MORTAR REQUIRED. TESTED ACCORDING TO ASTM C 928

B. JOB MIXED PATCHING MORTAR: 2 RANDOMLY SELECTED SETS OF SAMPLES FOR EACH TYPE OF MORTAR REQUIRED. TESTED FOR COMPRESSIVE STRENGTH ACCORDING TO ASTM C 109/109M.

2. PRODUCT WILL BE CONSIDERED DEFECTIVE IF IT DOES NOT PASS TESTS AND INSPECTIONS.

3. PREPARE TEST AND INSPECTION REPORTS.

PROJECT SEQUENCING

SEE SECTION XVI OF GENERAL NOTES ON S-002 FOR CONCRETE REPAIR AND TIEBACK INSTALLATION WORK SEQUENCING.

SURFACE PREPARATION FOR PATCH LOCATIONS (WHERE CORROSION NOT OBSERVED)

1. LOCATION AND MARKING OF WORK

A. WITHIN THE REGIONS IDENTIFIED IN THE ELEVATIONS, CONTRACTOR TO LOCATE SPALLS DELAMINATIONS HONEYCOMBS, ROCK POCKETS AND VOIDS MORE THAN 1 INCH IN ANY DIMENSION TO SOLID CONCRETE BY VISUAL INSPECTION AND CONCRETE SOUNDING AND MARK THEIR BOUNDARIES WITH CHALK OR PAINT.

B. AREAS TO BE REMOVED SHALL BE AS STRAIGHT AND RECTANGULAR AS PRACTICAL TO ENCOMPASS THE REPAIR AND PROVIDE A NEAT PATCH.

C. CONTRACTOR TO LOCATE ALL EMBEDDED POST-TENSIONING TENDONS AND REINFORCEMENT IN THE REPAIR AREA AND MARK THESE LOCATIONS FOR REFERENCE DURING THE CONCRETE REMOVAL IN CONCRETE SLAB.

2. CONCRETE REMOVAL

A. FOR VERTICAL AND OVERHEAD SURFACES THE MARKED BOUNDARY MAY BE SAWCUT TO A DEPTH OF 1/4 INCH INTO THE EXISTING CONCRETE. MEASURED FROM THE ORIGINAL SURFACE. EXTRA CAUTION SHALL BE EXERCISED DURING THE SAWCUTTING OPERATIONS TO AVOID DAMAGING EXISTING REINFORCEMENT.

B. ALL CONCRETE SHALL BE REMOVED FROM WITHIN THE MARKED BOUNDARY TO A MINIMUM DEPTH OF 1/2 INCH USING CHIPPING HAMMERS LESS THAN 15 LBS AT SLABS AND LESS THAN 30 LBS AT COLUMNS AND WALLS. IF UNSOUND CONCRETE EXISTS BEYOND THE MINIMUM REMOVAL DEPTH, THEN CHIPPING SHALL CONTINUE UNTIL ALL UNSOUND CONCRETE HAS BEEN REMOVED FROM THE CAVITY.

C. WHERE EMBEDDED REINFORCEMENT IS EXPOSED BY CONCRETE REMOVAL, EXTRA CAUTION SHALL BE EXERCISED TO AVOID DAMAGING IT DURING REMOVAL OF ADDITIONAL UNSOUND CONCRETE. IF BOND BETWEEN EXPOSED EMBEDDED REINFORCEMENT AND ADJACENT CONCRETE IS IMPAIRED BY THE CONTRACTOR'S REMOVAL OPERATIONS, THEN THE CONTRACTOR SHALL PERFORM ADDITIONAL REMOVAL AROUND AND BEYOND THE PERIMETER OF THE REINFORCEMENT FOR A MINIMUM OF 3/4 INCH ALONG THE ENTIRE LENGTH AFFECTED.

3. PREPARATION OF CAVITY FOR PATCH PLACEMENT

A. THOROUGHLY CLEAN REMOVAL AREAS OF LOOSE CONCRETE, DUST AND DEBRIS. VERIFY FRACTURED PROFILE OF AT LEAST 18 INCH OCCURS AT PATCH LOCATION.

B. PERFORM ADDITIONAL PREPARATION AND CLEANING OF THE SPALL CAVITY AS REQUIRED BY THE PATCHING MATERIAL MANUFACTURER. NOTIFY ENGINEER OF COMPLETION OF PREPARATION OF CAVITY.
